Outlook: A RED FLAG WARNING has been posted for eastern and southern Nevada for low humidities and high Haines indices. High pressure will continue to dominate the desert Southwest and part of the Great Basin Area. A Cool, upper level trough will move into the Pacific Northwest, this should bring cooler temperatures. Sandwiched between these two systems will be a strong southwest flow. Scattered thunderstorms will continue in the desert Southwest, Colorado and southern Wyoming. Southern California will continue to be hot and dry. New lightning fires will be minimal. Large fires will continue to burn with slightly lessened intensity.
