INCIDENT MANAGEMENT SITUATION REPORT TUESDAY SEPTEMBER 13, 1994 - 0530 MDT NATIONAL PREPAREDNESS LEVEL IV

Current Situation: Increased activity occurred on some fires in Idaho. Containment targets were met on several fires in Montana. A Type I Incident Management Team has been ordered for the floods in Alaska. The 3-11th Field Artillery, I Corps Battalion on the Koocanusa Complex were demobilized yesterday.

Colonel Chip Leonard, USA, is the Task Force Commander of one Battalion and one Aviation Unit assigned to the Corral Creek and Blackwell fires. Colonel Joseph Leigh, USA, is the Task Force Commander of one Battalion assigned to the Koocanusa Complex.

Eastern Great Basin Area Large Fires:
CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Monahan) and the 1st Engineer Battalion, 1st Infantry Division, USA (Lt. Col. Bostick, Commander) are assigned. The 1st Engineer Battalion has been released and will demob to Ft. Riley tomorrow. Helicopter support is being provided by the 4th Battalion, 1st Aviation Brigade, (Lt. Col. Brostrom, Commander) and the A/6-158th Aviation Unit, USAR. Fire activity was low, due to higher humidity and cooler temperatures. Rehabilitation and mop-up continued.

IDAHO CITY COMPLEX, Boise NF. A Type I Incident Management Team (Maupin) is assigned. The complex consists of the BANNOCK, BEAR RIVER, RABBIT CREEK, NORTH FORK and STAR GULCH fires. Despite relatively high humidities the fire made a run into the upper reaches of Wapiti Creek. The fire spotted across the South Fork of the Payette River, all spots were picked up by crews.

CHICKEN COMPLEX, Payette NF. A Type I Incident Management Team (Birch) is assigned. The fire made a run threatening the Davis Ranch. Crews and engines provided excellent structure protection. Torching occurred on all flanks of the fire, increasing the size by 1,990 acres.

TROJAN II, Uinta NF. A Type II Incident Management Team (Fitzgerald) is assigned. Crews minimized fire spread in spite of 50 MPH winds. Mop-up efforts were concentrated around the Trojan Powder Company to alleviate safety concerns. Line construction is progressing well.

THUNDERBOLT, Boise NF. A Type II Incident Management Team (Martin) is assigned. The 4th Battalion, 1st Aviation Brigade, USA is providing helicopter support. Evening cloud cover, with high humidities retarded fire activity. A portable retardant plant was activated for helicopter use to support a burnout operation on the southeast flank.

TIN CUP COMPLEX, Caribou NF. Burnout operations continued on the north and west flanks.

Northern Rockies Area Large Fires:
SMITH CREEK, Gallatin NF. A Type II Incident Management Team (Cowin) is assigned. Crews made good progress in completing control lines on the northwest flank. Mop-up continued around private structures. Unburned islands of timber within the fire perimeter continue to present a potential threat to control lines.

WINDY POINT, Lewistown District, BLM. A Type II Incident Management Team (Bosworth/Stone) is assigned. Good progress is being made on handline construction along the west flank due to moderate temperatures and higher humidities. Steep terrain and very limited access is hindering the progress of line construction on the east flank of the fire. A shortage of available water is limiting helicopter support.

MOOREHEAD COMPLEX, Miles City District, BLM. The complex consists of the DOONAN, TURTLE, PLUM, WINCOOP, BIRTHDAY, SPUR, BAYHORSE, THOMPSON CREEK and FLUFFY fires. All fires are contained except the Birthday Fire, which is expected to be contained this morning.

ROBINSON, Yellowstone NP. Heavy utilization of aerial support (retardant and helicopters) is expected to continue. Demand for initial attack resources in Yellowstone Park and the Greater Yellowstone Area continues to be high.

NORTH FORK COMPLEX, Glacier NP. The major fires in the complex are: STARVATION, HOWLING and ADAIR II. Management actions on the North Fork Complex continue to include suppression and management of natural fires. Daily aerial monitoring is continuing on all fires, and on-the-ground monitoring is being carried out on the Howling. The Adair II and Starvation fires showed negligible acreage increases.

RED KNOB, Miles City District, BLM. Overcast skies, cooler temperatures and high humidities have helped containment efforts this fire. Good progress has been made. No problems are anticipated.

Northwest Area Large Fires:
TWIN LAKES, Wallowa-Whitman NF. A Type I Incident Management Team (Liebersbach) and a Type II Incident Management Team (Duke) are assigned. The portion of the fire in the Eagle Cap Wilderness will be placed in a confinement suppression strategy. Warmer temperatures and higher winds increased fire activity late in the afternoon. Transition began in preparation for the release of Duke's Team tomorrow.

Alaska Incidents:
KOYUKUK FLOOD, Alaska State. A Type I Incident Management Team (Johnson) has been ordered. A Type II Incident Management Team (Abbott) is assigned. The villages of Hughes, Allakaket and Alatna have been affected by the floods. Two hundred fifty-two residents from these villages are being sheltered in Fairbanks. The Team is managing the efforts in Hughes to salvage property.

Outlook: *** A RED FLAG WARNING is posted in Utah and western Wyoming for low humidity and strong, gusty winds. A RED FLAG WATCH is posted in northwest Arizona for low humidity and strong, gusty winds. *** A major, cool, upper level trough has moved into the Intermountain West. The upper low is positioned over northeast Nevada and will continue to bring the threat of showers and thundershowers across the Intermountain West. Strong, gusty winds will continue across eastern Utah and western Wyoming. A high pressure ridge will continue to move into the Pacific Northwest, bringing warmer and drier conditions. Temperatures will be warmer in the Northwest and northern California, while cooler temperatures will move into Idaho, Utah and western Wyoming. Fire activity will continue with the potential for increased activity in areas with red flag conditions.
