As this system moves to the south, strong high pressure will build behind it over the Pacific Northwest, bringing strong east northeast winds. A subtropical low pressure system will remain stationary off the southern California coast, this will continue to spread scattered thunderstorms over the southern half of the West. Temperatures will range from the 50's and 60's in the Rocky Mountain states to the $70^{\prime}$ s in the Pacific Northwest and up to the $80^{\prime} \mathrm{s}$ and $90^{\prime} \mathrm{s}$ in the South.
