INCIDENT MANAGEMENT SITUATION REPORT MONDAY OCTOBER 3, 1994 - 0530 MDT NATIONAL PREPAREDNESS LEVEL III

Current Situation: Several fires in the Northern Rockies met containment with help from cold temperatures, rain and snow. Initial attack activity remained low throughout the U.S. A Type I Incident Management Team was ordered to replace a team in the Eastern Great Basin. Demobilization has increased through NICC.

Northern Rockies Area Large Fires:

SIAM, Clearwater NF. A Type II Incident Management Team (Kechter) is assigned. Fire activity continued to decrease due to light rain and some snow.

KOOCANUSA COMPLEX, Kootenai NF. A Type II Incident Management Team (Suenram) is assigned. Due to rain, snow and winds, no crews were put out on the line yesterday. Direct attack is planned on Division A today. Demobilization is in progress.

YNP = Yellowstone NP

Great Basin Area Large Fires:

THUNDERBOLT, Boise NF. A Type II Incident Management Team (McAtee) is assigned. Fire activity was limited. Crews continue to construct line and mop-up.

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. Fire activity continues to be low due to cool temperatures and higher humidities.

CHICKEN COMPLEX, Payette NF. The fire is still very active on some of the lines, even with the precipitation and cool temperatures. Good progress is being made on lines. Cooler weather and snow are making work difficult.

Alaska Incidents:

KOYUKUK FLOOD, Alaska State. A Type I Incident Management Team (Johnson) is assigned. Johnson's team continues to transition with Liebersbach's team. The Federal Emergency Management Agency (FEMA) continues to develop a long term mitigation plan. A private construction management company and the local tribal council will ultimately take over the role of managing of construction and health and human services.

Outlook: *** A RED FLAG WARNING has been posted for strong winds in Washington. A RED FLAG WATCH has been posted for strong winds and low humidities in northern California and Arizona. *** An upper level low pressure system will push into southern Idaho today. This will bring cold temperatures and a chance of rain or snow into the northwest quarter of the U.S. The upper level flow will reinforce a strong surface pressure gradient, which has prompted the red flags. Minimal fire activity is expected on large fires. Initial attack activity should remain low in most areas, however, a chance for increased activity exists where red flags are posted. Demobilization is expected to accelerate, as several fires have met containment.
