## INCIDENT MANAGEMENT SITUATION REPORT TUESDAY OCTOBER 4, 1994 - 0530 MDT NATIONAL PREPAREDNESS LEVEL III

Current Situation: Cool temperatures and higher humidities continue to assist containment efforts on large fires. Initial attack activity remained low throughout the West. One new large fire was reported in southern California. Steady demobilization continued through NICC.

Northern Rockies Area Large Fires:

KOOCANUSA COMPLEX, Kootenai NF. A Type II Incident Management Team (Suenram) is assigned. Crews were back on the fireline, completing handline and mopping up. Rehabilitation of suppression lines has begun.

CWF = Clearwat	er NI	?										·

Eastern Great Basin Area Large Fires:

THUNDERBOLT, Boise NF. A Type II Incident Management Team (McAtee) is assigned. Fire activity was limited to one division. The fire increased by about 200 acres.

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. Lee's Type I Team has arrived and the transition is in progress. Fire activity continues to be low due to cool temperatures and high humidities.

CHICKEN COMPLEX, Payette NF. Air operations went well, until poor visibility from precipitation grounded the aircraft. Demobilization is in progress. Safety concerns include hypothermia.

INCIDENT	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST

Outlook: \*\*\* RED FLAG WARNINGS and WATCHES are posted in Washington, Oregon, northern California and Arizona for strong winds and low humidities. \*\*\* The weather will change very little today from yesterday. A strong upper level low pressure system will push into northern California from Idaho. This will continue to bring cold temperatures and moisture with a chance of rain or snow into the northwest quarter of the U.S. The upper level flow will reinforce a strong surface pressure gradient, which has prompted the red flag warnings and watches. Fire activity on most large fires is expected to be minimal. Initial attack activity should remain low, except where red flag conditions exist. Demobilization will continue.
