

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY 7/1/94 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued throughout most of the western U.S. The Southwest, Rocky Mountain and Great Basin continue to report shortages of initial attack resources. Fire restrictions of some sort are in effect in most of the western states. Fire indices are very high and extreme on most units in the Southwest, Great Basin, Rocky Mountain and California.

Containment of several large fires in California has made some critical resources available to the Southwest. Good progress was made on large fires in the Great Basin and Rocky Mountain Areas as some achieved containment. Large fire activity continues to plague the Southwest Area. Although several fires have reached containment in the Southwest Area, new ignitions are escaping initial attack faster than resources are able to respond. Most of the mobilization through NICC is to support the Southwest. Eight MAFFS units will move from South Zone California to the Southwest Area this morning.

Eastern Great Basin Large Fires:

BITTER CREEK, Moab District, BLM, 3,500 acres. A Type II Incident Management Team (Williams) is committed. Spotty burning continues within the fire perimeter, however the perimeter did not increase yesterday.

COALBED, Moab District, BLM, 600 acres. A Type II Incident Management Team (Fitzgerald) is committed. Good progress was made in reinforcing the line. Acreage decreased due to refining the mapping. Demobilization is expected to begin today.

CHOKER CHERRY FLAT, Salt Lake District, BLM, 1,400 acres. The fire escaped the containment lines on the south, southwest and north lines.

California

South Zone Large Fires:

PIUTE COMPLEX, California Desert District, BLM, 3,500 acres. A Type II Incident Management team (McClain) is committed. This complex is comprised of 17 fires.

Southwest Area Large Fires:

RATTLESNAKE, Coronado NF, 600 acres. A Type I Incident Management Team (Denton) has just assumed command of the fire. A Boy Scout Camp and other structures are threatened. No other information is available.

PIMA, Coronado NF, 200 acres. The fire is burning in the Pusch Wilderness next to the Tucson urban area.

CATCLAW COMPLEX, Prescott NF, 800 acres. A Type II Incident Management Team (Butler) is committed. The CATCLAW fire is contained, while the PECK is only 10% contained. The complex has assumed two new fires, the FORT, 100 acres and the CASTLE at 3,000 acres. Thirty residences are threatened.

ARMOR, Tonto NF, 3,000 acres. A Type II Incident Management Team (Whitney) is enroute. Private property and campgrounds are currently threatened.

BIG ROCKS, Lincoln NF, 200 acres. A Type II Incident Management Team (Bedlion) is committed. The Patos fire, 150 acres has also been assumed by this team.

Rocky Mountain Area Large Fires:

BUNIGER, Grand Junction District, BLM, 1,600 acre. A Type II Incident Management Team (Hart) is committed. The fire is in mop-up and operations will begin to shift to the Long Canyon fire, another fire being suppressed by this team.

LONG CANTON, Grand Junction District, BLM, 620 acres. This fire is also being suppressed by the Buniger team. The fire is burning in mixed pinon and juniper northwest of Grand Junction. Airtankers made 11 runs to the fire keeping spread to a minimum.

SQUAW MTN., Casper District, BLM, 200 acres. The fire is burning in bug killed timber with 5 homes within a mile of the fire.

BATTELEMENT MESA, Colorado State, 175 acres. The fire is burning adjacent to a mountain community of homes. Residences are threatened and evacuations occurred. Homeowners were later allowed to return. Aggressive air attack has kept the fire from burning any homes. One outbuilding was destroyed.

Outlook: A strong high pressure system remains in place over southern Arizona and New Mexico and near record temperatures will continue to occur. Scattered afternoon lightning is forecast. The influence of a storm moving into Canada and the northwest will bring slightly cooler temperatures and increased winds in that area and to California, Nevada and Utah. Fire activity is expected to increase with continued hot and dry conditions coupled with the risk of increased human caused fires during the 4th of July holiday weekend.

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JULY 2, 1994 0900 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued throughout most areas of the western U.S. even draining initial attack resources more. Fire restrictions are in effect in numerous areas of the West. Very High and extreme fire indices prevail on most units in the Southwest, Great Basin, Rocky Mountain and California.

High temperatures, low humidities, high winds and steep, rocky, inaccessible terrain were reported as control problems on numerous large fires. Twelve type II crews were reassigned to the Hour Glass fire in Colorado. New large fires were reported in the Southwest, Rocky Mountain, Great Basin, California and the Northern Rockies. NICC continues to mobilize resources to these Areas.

Northern Rockies Large Fires:

ROBERTSON, Lolo NF, 1,000 acres. A Type II Incident Management Team (Suenram) is committed. The fire is 3 miles east of U.S. Highway 135 and U.S. Highway 200 junction. The fire is not burning towards any structures at this time, but eight are being protected by engines as a precaution. The fire experienced rapid growth, fanned by 25 mph winds.

Rocky Mountain Area Large Fires:

✓ HOUR GLASS, Roosevelt NF. The fire is estimated to be between 400-1,000 acres. Type I Incident Management Team (Richer) is committed. The fire is located approximately 28 miles west of Fort Collins on the National Forest and CSU forestry campus at Pingree Park. Three buildings have been destroyed and two more were involved. People were evacuated from Pingree Park and Sky Ranch early yesterday afternoon. Colorado Governor Roy Romer was in Fort Collins at forest headquarters for an update.

✓ SQUAW MTN., Casper District, BLM, 200 acres. The fire is burning in bug killed timber 15 miles southwest of Wheatland, WY. A Type II Incident Management Team (Green) is committed. One home was saved, 5 more homes and livestock are threatened. All fire lines were lost due to a 180 degree wind shift.

MEXICAN RIDGE, Colorado State, 483 acres. The fire escaped containment yesterday and is threatening commercial timber.

Southwest Area Large Fires:

CATCLAW COMPLEX, Prescott NF, 8,333 acres. A Type II Incident Management Team (Butler) is committed. The Castle and Fort fires have burned together. Thirty residences and other values are threatened. Evacuation notifications were made, but ended up not necessary. The fire received a light rain. A major burnout is planned for tomorrow.

RATTLESNAKE, Coronado NF, 1,425 acres. A Type I Incident Management Team (Denton) is committed. The fire made a major run that threatened summer homes and a historic Forest Service site in the Rustler Park area.

ARMER, Tonto NF, 5,760 acres. A Type II Incident Management Team (Whitney) is committed. Precautionary evacuations were made at Rose Creek, Reynolds Creek and at a YMCA camp. Cloud cover brought on lower temperatures and higher humidities assisting in limiting the forward rate of spread.

REDDINGTON, Arizona State, 9,800 acres. A Type II Incident Management Team (Bedlion) is committed. The fire is located within one mile of 3 ranches with homes and associated outbuildings approximately 5 miles from Saguaro National Monument.

Eastern Great Basin Large Fires:

BUTTE CITY, Idaho Falls District, BLM, 12,000 acres. The fire has made fast runs due to high winds. Current threats are to the town of Howe, Idaho, powerlines and nuclear test facilities. The fire has caused power outages in the Little Lost area of Howe Valley.

POINT WELL, Burley District, BLM, 20,480 acres. The fire continued to be active into the night. The fire line is 95% complete. Livestock troughs, water supply pipeline, fences and two wells have been destroyed.

Western Great Basin Large Fires:

GREGERSON COMPLEX, Las Vegas District, BLM, 10,000 acres. The fire is burning into two wilderness study areas approximately 90 miles north of Las Vegas. Several military electronic sites are currently threatened.

California

South Zone Large Fires:

LAKE HEMET COMPLEX, San Bernardino NF, 300 acres. This complex consists of 20 lightning fires. The Lake Hemet campground, RV park and picnic areas were evacuated early yesterday, but were later allowed to return.

PIUTE COMPLEX, California Desert District, BLM, 10,909 acres. A Type II Incident Management team (McClain) is committed. This complex is comprised of 18 fires, 17 of which are contained.

Outlook: RED FLAG WARNINGS for eastern Washington for strong winds, and Utah for dry lightning in the south and a dry cold front in the north. RED FLAG WATCH'S have been posted in northern California for gusty north winds, southern Idaho and southwestern Wyoming for strong gusty winds and low humidity, all of Colorado and central Wyoming for dry lightning and gusty winds. Continued hot and dry with low humidities over the southwestern U.S. Some scattered thunderstorms are expected over the desert southwest. Winds will increase in the Northwestern U.S. with a little cooler temperatures predicted. Initial attack and large fire activity is expected to increase in the western U.S. with the forecasted weather coupled with the 4th of July weekend influence.

INCIDENT MANAGEMENT SITUATION REPORT
 SUNDAY, JULY 3, 1994 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued across the western U.S. Resources continue to be reassigned as they become available. Very high and extreme fire indices persist on numerous units in the Southwest, Great Basin, Rocky Mountain and California.

Adverse weather conditions continue to cause control problems on several fires. New large fire activity occurred in the Southwest, Rocky Mountain, Great Basin, California, Northern Rockies and the Northwest Areas. NICC mobilized crews, caterers, shower units, airtankers, smokejumper aircraft, helicopters, communications equipment and miscellaneous overhead.

Northern Rockies Large Fires: (3)

ROBERTSON, Lolo NF, 1,000 acres. A Type II Incident Management Team (Suenram) is committed. Current threats are structures, a microwave site, wild and scenic rivers and the Confederated Salish and Kootenai Tribal lands. Burnout operations, which will be critical for gaining containment or control are planned along Robinson Creek.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

MCD = Miles City BLM

Rocky Mountain Area Large Fires: 3 (10)

HOUR GLASS, Roosevelt NF. 900 acres. Type I Incident Management Team (Richer) is committed. Colorado State University, Pingree Park Campus was overrun, several structures and improvements were destroyed. Five shelter deployments occurred, but all escaped with no physical injuries.

SHEEP MOUNTAIN, Bighorn NF, 300 acres. A Type II Incident Management Team (Adams) is committed. The fire is burning in spruce-fir, lodgepole pine and old slash. Sheep Mountain lookout is threatened. The fire is human caused and is under investigation.

SQUAW MOUNTAIN, Casper District, BLM, 200 acres. A Type II Incident Management Team (Green) is committed. The fire is burning in bug killed timber 15 miles southwest of Wheatland, WY. Cooler weather assisted in suppression efforts. Indirect attack and retardant have been effective.

Southwest Area Large Fires:

RATTLESNAKE, Coronado NF, 2,100 acres. A Type I Incident Management Team (Denton) is committed. Efforts to save a historic Forest Service site, Methodist church camp and recreation area were successful. The Boy Scout camp and lookout are still in jeopardy. Ground forces were able to hold all constructed fire line with air support.

ARMER, Tonto NF, 5,760 acres. A Type II Incident Management Team (Whitney) is committed. Progress was made in limiting the rate of spread.

BIG ROCKS COMPLEX, Lincoln NF, 1,200 acres. Strategy is on structure protection and personnel safety. The fires are reporting erratic fire behavior, long range spotting and flame lengths to 100 feet.

CATCLAW COMPLEX, Prescott NF, 8,742 acres. A Type II Incident Management Team (Butler) is committed. MAFFS units aided suppression efforts. Precipitation assisted firefighters.

DARK COMPLEX, Lincoln NF, 870 acres. This complex is comprised of 4 fires. A housing development may be threatened,

TOWER COMPLEX, Truxton Canyon BIA, 5,000 acres. A Type II Incident Management Team (Blackwell) is committed. Several homes have been evacuated as well as the outbuildings at the Grand Canyon West Airstrip. Airtankers assisted firefighters in the structure protection effort. The complex is comprised of 7 fires.

Eastern Great Basin Large Fires:

TERRA, Salt Lake District, BLM, 1,000 acres. A Type II Incident Management Team (Barber) has been ordered. The small community of Terra has been evacuated. Roads accessing the incident have been closed for public safety. No other information available.

KINZIE BUTTE, Shoshone District, BLM, 2,000 acres. Burnout was expected to be completed last night and to have the fire completely lined early today. Airtanker support kept the fire from jumping the canal and out of the Wilderness Study Area.

California

South Zone Large Fires:

PALM, San Bernardino NF, 1,000 acres. A Type I Incident Management Team (Dougherty) has been assigned. The fire is located near the south end of Palm Canyon in Hidden Falls Canyon. The area is inaccessible; crews must hike 1 1/2 miles to the line. There is no current threat to private property, as crews are holding the fire to the west of Palm Canyon. Residents nearby are concerned due to the smoke in the community.

LAKE HEMET COMPLEX, San Bernardino NF, 622 acres. There are no current threats to property, but there are numerous summer camps, campgrounds and ranch structures in front of the fire.

Outlook: A RED FLAG WATCH has been posted for all of Colorado for dry lightning and gusty winds. RED FLAG WARNINGS have been posted for southern Utah, the Sacramento Valley and surrounding foothills of northern California, for gusty winds. The western states will experience a slight cooling trend today while dry and windy conditions remain. Thunderstorms will continue across Arizona, New Mexico, southern Utah and Colorado.

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JULY 4, 1994 0900 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity decreased in the Southwest and South Zone. Rocky Mountain experienced an increase in new ignitions. Resources continue to be reassigned between, and mobilized for the western States. Very high to extreme fire indices exist on numerous units in the Southwest, Great Basin, Rocky Mountain and California.

Adverse weather conditions caused control problems on several fires. New large fire activity occurred in the Southwest, California, and the Northwest Areas. NICC continues to mobilize crews, caterers, shower units, airtankers, smokejumper aircraft, helicopters, communications equipment and overhead.

Northern Rockies Large Fires:

ROBERTSON, Lolo NF. A Type II Incident Management Team (Suenram) is committed. The fire perimeter is being held by indirect line and support from helicopter water drops. A burnout of the unburned islands is planned for today. Initial demobilization is planned for 7/6.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST

MCD = Miles City BLM

Rocky Mountain Area Large Fires:

HOOR GLASS, Roosevelt NF. A Type I Incident Management Team (Richer) is committed. Colorado Governor Roy Romer reviewed the camp and line operations. The incident has been declared a state emergency fire. Structures continue to be threatened.

SHEEP MOUNTAIN, Bighorn NF. A Type II Incident Management Team (Adams) is committed. The fire has burned 80% around Sheep Mountain Lookout. Current threat is to old growth and high value timber.

SQUAW MOUNTAIN, Casper District, BLM. A Type II Incident Management Team (Green) is committed. Substantial precipitation from thunderstorms was experienced on the fire. Threats to structures are now minimal.

Outlook: A RED FLAG WARNING has been posted for the mountainins of Colorado for dry conditions, lightning and gusty winds. A RED FLAG WATCH has been posted for northern and central Arizona for strong winds and low humidity. Hot and dry conditions continue over the southwestern U.S. Isolated thunderstorms are forecast from the southwest deserts, north across Utah and Colorado. Initial attack with the possibility of escaped fire activity is expected to continue in South Zone, the Southwest and Rocky Mountain Areas. Cooler temperatures across the northwestern U.S. will moderate initial attack activity.

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JULY 5, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Good progress was reported by fires in the Eastern Great Basin due to cooler temperatures and more resources. The Rocky Mountain Area continued to experience an increase in new ignitions. Competition for Initial attack resources continues as new fire activity persists. Numerous units in the Southwest, Great Basin, Rocky Mountain and California continue to report very high and extreme indices.

Adverse weather conditions continue to pose control problems on several large fires. Crews, caterers, shower units, airtankers, smokejumper aircraft, helicopters, communications equipment and overhead mobilization continues through NICC.

Northern Rockies Large Fires:

ROBERTSON, Lolo NF. A Type II Incident Management Team (Suenram) is committed. Mop up is being supported by helicopter water drops in steep areas. Burnout operations occurred yesterday.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW PERS	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

MCD = Miles City BLM

Rocky Mountain Area Large Fires:

WAKE, Montrose District, BLM. A Type II Incident Management Team (Hart) is committed. The fire is located near Hotckhiss, Co., approximately 60 miles east of Grand Junction. Three homes have been destroyed and another 5 are threatened. Residences along 3700 Road have been evacuated.

OUR GLASS, Roosevelt NF. A Type I Incident Management Team (Richer) is committed. Containment of the fire is expected tonight.

ELK, Craig District, BLM. The fire is threatening the town of Elk Springs, ranches and powerlines.

SHEEP MOUNTAIN, Bighorn NF. A Type II Incident Management Team (Adams) is committed. The fire is located 25 miles southwest of Buffalo, WY. The fire has burned 80% around Sheep Mountain Lookout.

SQUAW MOUNTAIN, Casper District, BLM. A Type II Incident Management Team (Green) is committed. Threats to structures are minimal.

Southwest Area Large Fires:

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire made a run resulting in the loss of a strategic anchor point for the planned south containment line. Airtanker support aided hotshot crews in line construction.

REDINGTON COMPLEX, Arizona State. Type II Incident Management Team (Bedlion) committed. The complex now includes the RINCON fire in Saguaro National Monument, which was a prescribed natural fire.

BIG ROCKS COMPLEX, Lincoln NF. The BIG ROCKS and PATOS fires have burned together. Aerial and ground firing continues with line construction. Gusty, erratic winds are hampering direct line construction.

TOWER COMPLEX, Truxton Canyon Agency, BIA. A Type II Incident Management Team (Blackwell) is committed. A new fire 10 miles west of the base camp is now being combined with this complex.

Outlook: RED FLAG WATCHES have been posted in the northern half of Arizona for strong winds and low relative humidities, in central Wyoming and all of Nevada for strong winds. The northwestern U.S. will experience slightly cooler temperatures and higher relative humidities with a possibility of showers and thunderstorms. Slightly cooler temperatures are expected over the southwestern U.S. Decreased activity is expected over New Mexico.

INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, JULY 6, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Vigorous initial attack continued in California, Idaho and the Southwest Area. Windy conditions hampered control efforts on fires in Nevada and western Colorado. All other areas continued to make progress.

A Type I Incident Management Team (Birch) is in staging in Nevada. NICC mobilized crews from the Northern Rockies, Eastern and Southern Areas to Colorado and from the Northwest to Nevada.

Geographic Areas and NICC continue to reassign resources to meet current demands.

Rocky Mountain Area Large Fires:

MITCHELL LAKE, San Juan NF. A Type II Incident Management Team (Martin) is committed. The fire is located 13 miles north of Durango, CO. Two homes are immediately threatened and are being protected by a volunteer fire department.

WAKE, Montrose District, BLM. A Type II Incident Management Team (Hart) is committed. The fire is located near Hotchkiss, Co., approximately 60 miles east of Grand Junction. Burning in an urban interface area, this fire is drawing heavy media coverage. The Governor Roy Romer spent the day monitoring and interviewing with media on the fire yesterday.

Pyramid Rock, Grand Junction District, BLM. Residences are threatened. Due to the terrain, engines are of little use.

SHEEP MOUNTAIN, Bighorn NF. A Type II Incident Management Team (Adams) is committed. Spot fires are difficult to access.

SQUAW MOUNTAIN, Casper District, BLM. A Type II Incident Management Team (Green) is committed. Fire is beginning demobilization.

Southwest Area Large Fires:

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. Good progress was made on line construction and burning out on the east and west flanks. Type I Crews that arrived are aiding significantly in line construction.

BIG ROCKS COMPLEX, Lincoln NF. The BIG ROCKS/PATOS fire made a run along the south flank threatening several ranches. Resources were mobilized to protect structures. The Pancho fire also reported significant runs.

REDINGTON COMPLEX, Arizona State. Type II Incident Management Team (Bedlion) committed. Most suppression activity was focused on the RINCON fire yesterday. Helicopter water drops were used to help keep the REDINGTON fire from moving into Saguaro National Monument.

JUNIPER, Prescott NF. Handcrews are working line on the northwest flank while engines work the east flank. The fires head is burning north of Juniper Mesa Wilderness Area. The objective is to keep the fire away from high voltage powerlines to the west.

TOWER COMPLEX, Truxton Canyon Agency, BIA. A Type II Incident Management Team (Blackwell) is committed. Another new spot fire was included in with this complex yesterday.

Eastern Great Basin Large Fires:

SKULL VALLEY COMPLEX, Salt Lake District, BLM. Type II Incident Management Team (Barber) committed. The complex is comprised of the Terra, Choke Cherry and Post Hollow fires. Thunderstorms with 50+ mph winds caused the Terra fire to escape, resulting in more evacuations.

BUCKSKIN, Idaho Falls District, BLM. Burn out operations are being attempted. Current threat is to a structure, livestock and Ceremonial Area.

Outlook: RED FLAG WATCHES have been posted in the northeast half of Arizona for strong winds and low relative humidities and in Colorado and southeast Nevada for strong winds. RED FLAG WARNINGS have been posted in northern California, southern Utah and all of New Mexico for strong winds. Widely scattered showers or thunderstorms will move over Montana, Wyoming and Colorado. Dry and windy conditions will exist in southeast Nevada, Utah, southwest Colorado, Arizona, and New Mexico. A warming trend will begin over California and the northern Great Basin. Maximum temperatures will be in the 70's and 80's over the Pacific Northwest. Fire activity is expected to continue in Colorado, Arizona, New Mexico and Nevada.

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JULY 7, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: A fireshelter deployment occurred July 6 on the South Canyon fire on the Grand Junction District. It is believed that twelve firefighters were fatally injured with two unaccounted for at this time. Other injuries were also reported.

Initial attack activity continued at a moderate pace in most of the western states. High winds in western Colorado and Arizona produced extreme fire behavior on large fires.

NICC reassigned crews, helicopters, caterers and shower units from the Southwest Area to the Great Basin and Rocky Mountain Areas. Airtankers were reassigned from the Eastern Great Basin to Colorado, and from California to Arizona.

Rocky Mountain Area Large Fires:

SOUTH CANYON, Grand Junction District, BLM. A Type I Incident Management Team (Lee) from California is enroute. The fire is located about 5 miles west of Glenwood Springs, CO. near I-70. The fire blew up yesterday afternoon. Gusting and erratic winds caused changes in the direction of the fire. Homes in west Glenwood are being evacuated.

MITCHELL LAKE, San Juan NF. A Type II Incident Management Team (Martin) is committed. The fire is located 13 miles north of Durango, CO. Smoke in the valley and along Highway 550 is causing problems.

WAKE, Montrose District, BLM. A Type II Incident Management Team (Hart) is committed. The fire is located near Hotchkiss, Co., approximately 60 miles east of Grand Junction. The fire has destroyed 3 structures and more are at risk.

Southwest Area Large Fires:

BIG ROCKS COMPLEX, Lincoln NF. The BIG ROCKS/PATOS is contained. The PONCHO fire is still active and only 15% contained.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The drying trend has resulted in increased fire behavior. The fire made a run out of east Turkey Creek Canyon toward Rustler Park, forcing the evacuation of the Rustler spike camp. A burnout operation is currently underway and with the support of airtankers has been successful in saving Rustler Park; however, the fire has overrun the indirect line on the northeast perimeter. Good progress being made on the burnout operations on the west, south and east flanks.

REDINGTON COMPLEX, Arizona State. Type II Incident Management Team (Bedlion) committed. A slopover on the RINCON fire increased the acreage 360 acres, near Happy Valley Lookout when the humidity dropped to 12%.

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JULY 8, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: There have been fourteen confirmed fatalities from the South Canyon fire on Grand Junction District, BLM. Three smokejumpers, two from McCall and one from Missoula, nine crewmembers from the Prineville Hotshots and two helitack from Grand Junction. The entire fire community from all agencies extends their sympathy to family, friends and co-workers of these firefighters. Flags will be flown at half mast in memory of these firefighters today.

Initial attack activity decreased in most of the western states due to less lightning activity, lighter winds and slightly higher humidities.

Demobilization is occurring as fires reach containment, except in Colorado where resources are being reassigned. Crews and incidental overhead are becoming available; however, Type II Helicopters and Airtankers continue to be in high demand. Reassignments are continuing, but not at the pace of the last few days.

Northern Rockies Large Fires:

BUFFALO JUMP	NCA	MT	550	100	7/7	UNK				UNK	UNK	21K

NCA = Northern Cheyenne BIA

Rocky Mountain Area Large Fires:

SOUTH CANYON, Grand Junction District, BLM. A Type I Incident Management Team (Lee) is committed. Major resource mobilization to the fire occurred rapidly yesterday. Current threats are to structures and the community of Glenwood Springs. Line construction between the town and the burning area was planned for last night.

MITCHELL LAKE, San Juan NF. A Type II Incident Management Team (Martin) is committed. The fire is reported close to structures and is a potential threat. Helicopter bucket drops and airtankers supported line crew operations.

RABBIT, Craig District, BLM. Line construction was successful due to decreased winds and higher humidities. No structures are currently threatened.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW PERS	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

MRD = Montrose BLM

Southwest Area Large Fires:

BIG ROCKS COMPLEX, Lincoln NF. A Type II Incident Management Team (Butler) is committed. The PONCHO fire made several runs yesterday. Crews are trying to hold the fire at the ridge line. Plans are in progress for structure protection. Large transfer of crews from the PATOS fire to the PONCHO fire occurred yesterday.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. Burnout and holding on the northeast flank continued at a cautious pace due to 10% RH. Burnout preparation on the west flank has been completed. High priority is on completing the burnout preparation on the south and east perimeters. This is estimated to take two days.

REDINGTON COMPLEX, Arizona State. Type II Incident Management Team (Bedlion) committed. Suppression efforts were focused on the RINCON fire slopover. The fire became active again yesterday afternoon. Bucket drops and retardant were used to protect the Happy Valley Lookout.

Western Great Basin Large Fires:

MILK RANCH, Ely District, BLM. Crews were able to make good progress with the aid of an airtanker and helicopter bucket drops. Cooler temperatures and light winds also helped firefighters to gain the upper hand. Rolling materials crossing the handline continued to cause problems, with spotting occurring down the mountain. A lack of readily available water supply is also hampering suppression progress.

Outlook: A high pressure system creating warmer and drier conditions with less wind will build over the next couple of days and be the dominant weather pattern for the western United States. Isolated thunderstorm activity will be limited to eastern Wyoming, eastern Colorado, eastern New Mexico and the Sierra Nevadas. Initial attack activity is expected to moderate.

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JULY 9, 1994 0900 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued at a moderate pace in most of the western states. Good progress continues toward meeting containment targets on large fires. Demobilization of crews and overhead is occurring in the Southwest, Great Basin and southern California. Some crew demobilization is planned in the Rocky Mountain Area along with replacing the Type I Crews that are being released.

The majority of medium helicopters, airtankers, caterers and shower units remain committed either to initial attack or supporting large fires.

Flags at all offices of the Department of Agriculture and Interior will continue to be flown at half-mast through July 13th in memory of; Don Mackey, Roger Roth, James Thrash, Richard Tyler, Robert Browning, Jon Kelso, Kathi Beck, Scott Blegha, Levi Brinkley, Bonnie Holtby, Rob Johnson, Tammi Bickett, Doug Dunbar and Terri Hagen.

Rocky Mountain Area Large Fires:

SOUTH CANYON, Grand Junction District, BLM. A Type I Incident Management Team (Lee) is committed. The fire continues to threaten structures and the community of West Glenwood.

SJF = San Juan NF CRD = Craig BLM

Southwest Area Large Fires:

BIG ROCKS COMPLEX, Lincoln NF. A Type II Incident Management Team (Butler) is committed. The PATOS fire is controlled and plans are to turn it back to the Forest today. The PONCHO fire reported that favorable weather conditions moderated fire behavior. Archaeological sites are being protected and considered in line location.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. Intense fire behavior was reported due to low humidities. Air support assisted crews with holding fire runs within the proposed containment lines.

REDINGTON COMPLEX, Arizona State. Type II Incident Management Team (Bedlion) committed. Tactical approach on the REDINGTON fires will be to reestablish anchor points, construct line and cold trail where possible. The RINCON fire reported major runs on the west and east sides due to extremely low humidities and erratic winds.

Outlook: The governing weather pattern for the western United States is a high pressure system. Isolated thunderstorms due to afternoon heating are forecast to develop across the Sierra Nevadas, the Great Basin, the desert southwest and into Colorado. Late Saturday minor upper air disturbances over Washington, northern Idaho and Montana will affect the high and winds will increase as the front passes over the northern Rockies and east slopes of eastern Montana. The potential exists for increased activity with forecasted thunderstorms.

INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY, JULY 10, 1994 0900 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity increased in the Northwest, Northern Rockies, East Basin and Rocky Mountain Areas. Containment targets on large fires continue to be met. Mobilization of equipment, caterers and showers for the Northwest occurred. Demobilization of crews & overhead continues from the Southwest, Rocky Mountain Areas, Great Basin, and southern California. Competition for national initial attack resources occurred yesterday.

The majority of medium helicopters, airtankers, caterers and shower units remain committed either to initial attack or supporting large fires.

Rocky Mountain Area Large Fires:

SOUTH CANYON, Grand Junction District, BLM. A Type I Incident Management Team (Lee) is committed. Operations shifting to line reinforcement and mop-up. Steep terrain, heavy fuels, and windy conditions are creating control problems.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST
SOUTH CANYON	GJD	CO	1,856	100	7/9	650	18	12	7	UNK	UNK	1.25M

Southwest Area Large Fires:

TUBE, El Malpais National Monument, NM. Strong gusty winds and extremely dry fuels have hampered control efforts. Visitors in the Big Tubes area of El Malpais National Monument were evacuated. This area has now been closed to visitor use. The fire is burning on NPS, BLM and privately owned lands.

BIG ROCKS COMPLEX, Lincoln NF. A Type II Incident Management Team (Butler) is committed. The **PONCHO** fire reported that favorable weather conditions continue to slow the fire spread. Crews are making excellent headway in structure protection and containment strategies. Hotshot crews will begin direct attack in the wilderness while being supported by containment crews staged outside. Air support was provided by bucket drops.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. All crews were taken off the line on the southern perimeter. The fire made a major run out of Ward Canyon and overran the line at Cima Saddle where crews had been working. Aerial ignition and airtankers (8 MAFFS & 3 conventional) held most of the southern perimeter. The fire started a major run up Chiricahua Peak.

REDINGTON COMPLEX, Arizona State. Type II Incident Management Team (Bedlion) committed. The **RINCON** fire increased in size by 1590 acres. Heavy smoke over the fire hampered suppression operations on the north flank while activity increased on the north, east and south sides as weather conditions continue to drive erratic fire behavior. RH's as low as 8%, winds 10-15 MPH and record temperatures are expected to remain the same for continued control problems.

GOODSIGHT PEAK, Las Cruces District BLM. Lightning caused. No current threats or control problems. Building direct line for fire containment.

Eastern Great Basin Large Fires:

CHANDLER, Uintah & Ouray Agency, BIA. An abundance of unburned fuels remain within the fire line. Hot spots and flare-ups remain a concern on steep inaccessible slopes. Helicopter water drops continue to assist crews.

FORT RANCH, Northwest Utah State. Experiencing control problems due to steep, rocky terrain, gusty winds, high temperatures and low humidity.

Fire restrictions remain in effect for the state of Utah.

Northwest Area Large Fires:

COLE, Winema N.F. A Type II Incident Management Team (Schindler) is committed. Fire is spreading southeast and was lightning caused.

SPENCE, Oregon State. A Type II Incident Management Team (ODF) is committed. 350 acres of state-protected (Weyerhauser) land near Doak Mountain. Fire is burning in brush and timber along a rough ridgeline, in or near bald eagle habitat. Human caused.

MAURY COMPLEX, Prineville District, BLM. A Type II Incident Management Team (Chestley) is committed. The NEWSOME fire and SHEEP ROCK make up this complex.

GRASS VALLEY, Prineville District, BLM. Grass Valley Rural Fire Protection District. Burning in grass, brush & wheat fields.

Outlook: A RED FLAG WARNING has been posted in central and southern Idaho and western Wyoming for low humidities, isolated dry thunderstorms and a cold frontal passage. A weak cold front will pass over the northern tier states plus Idaho and parts of Wyoming, northern Nevada and northern Utah. This front will bring minor cooling and a few thunderstorms. Hot and dry conditions will continue over the southwestern U.S.

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JULY 11, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Minor initial attack activity was reported throughout the western states. Several of the existing large fires in the Southwest Area continued to experience difficulty in reaching containment objectives. Demobilization from the Southwest and Rocky Mountain Areas was minimal, with most crews being staged or reassigned to new fires.

Southwest Area Large Fires:

BIG ROCKS COMPLEX, Lincoln NF. A Type II Incident Management Team (Butler) is committed. The PONCHO fire reported good progress on direct attack of the southern flank of the fire. Eleven Type II Crews and a strike team of engines continue with structure protection.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. A burnout and holding operation is in progress on the southwest perimeter.

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) committed. The RINCON remained active with intense burning in all fuel types. Despite higher humidities, erratic winds pushed the fire perimeter on the northern and eastern sides. The head of the fire is being pushed by southwesterly winds and is burning in ponderosa pine, with 40 tons per acre of fuel.

TUBE, El Malpais National Monument, NPS. Considerable progress was made in spite of strong winds and dry fuels.

Eastern Great Basin Large Fires:

BLUE MOUNTAIN, Challis N.F. The fire is burning a mile northeast of Challis, threatening the community.

CHANDLER, Uintah & Ouray Agency, BIA. Hot spots remain a concern on steep, inaccessible slopes. Helicopter water drops continue to assist crews. Demobilization is expected to begin today.

FORT RANCH, Utah State. Adverse weather and terrain are causing control problems.

Northwest Area Large Fires:

SMITH CANYON, Prineville District, BLM. Formerly known as the Grass Valley fire. The fire is burning in grass on the upper flats and brushy canyonlands. Staffed by BLM and Grass Valley Fire Department.

SPENCE, Oregon State. A Type II Incident Management Team (ODF) is committed. The fire made short runs in heavy brush, slash and timber on Doak Mountain near Bald Eagle habitat.

MAURY COMLEX, Prineville District, BLM. A Type II Incident Management Team (Chestley) is committed. The NEWSOME fire and SHEEP ROCK make up this complex.

CHINA HAT, Oregon State. The fire is on state protected lands, burning towards BLM land north of John Day, Oregon.

Outlook: A dry westerly flow will dominate the Pacific Northwest, Idaho, Montana and Wyoming. High pressure remains over the desert Southwest, Great Basin and California. Isolated thunderstorm activity will be confined to eastern New Mexico, Wyoming and Colorado. Fire activity is expected to increase in the northwestern U.S.

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JULY 12, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Increased activity occurred in the Rocky Mountain, Northwest and Southern California Areas. Existing large fires in Arizona continued to experience control problems. Minor demobilization is continuing from the Great Basin, Southern California and the Southwest. A radio system, caterer and shower unit were dispatched to the Rocky Mountain Area through NICC.

Rocky Mountain Area Large Fires:

NORTH FORK, Grand Mesa/Uncompahgre/Gunnison NF. A Type I Incident Management Team (Richer) is committed. The fire is on the Uncompahgre portion of the forests. Numerous resources are ordered and enroute.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST
				CTN	CTN	PERS				LOST	LOSS	COST
NORTH FORK	GMF	CO	200	UNK	UNK	UNK	1	UNK	UNK	UNK	UNK	UNK

Southwest Area Large Fires:

BIG ROCKS COMPLEX, Lincoln NF. A Type II Incident Management Team (Butler) is committed. Favorable weather conditions allowed good progress to be made on all fronts of the Poncho fire. Demobilization started yesterday and is expected to increase through Thursday.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire has burned deep into the Chiricahua Wilderness. Mixed conifer fuel loadings are 100+ tons per acre on 75-100% slopes. A meeting was held yesterday with the Forest Supervisor, Regional Fire Staff and Fire Personnel to develop new incident objectives. Due to extremely limited resources, objectives are now to contain the fire east of the Chiricahua Crest Ridge and to protect private property and structures east of the fire. Full containment depends upon receiving significant precipitation.

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) committed. The Rincon fire continued to push northeast towards the Redington fire. Extreme burning conditions persists, increasing the fire 1,026 acres yesterday. Flanking is being considering as a strategy to run the Rincon fire into the Redington burn.

Outlook: A large area of extremely low humidities will cover the western United States and maximum temperatures will show only minor day to day changes. Isolated dry thunderstorms are forecast for Montana, Idaho, Wyoming, Colorado, northern Utah and eastern New Mexico. Initial attack activity is expected to continue with increased potential for large fires throughout the western states.

INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, JULY 13, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: The Rocky Mountain Area experienced increased initial attack activity. Arizona continues to report extreme fire behavior. A radio system, caterer, a shower unit, 2 type II helicopters, 1 type III helicopter and 18 crews have been mobilized to the Rocky Mountain Area through NICC.

A helicopter crashed during an initial attack mission on the Gila NF yesterday, 7/12. Two crew persons and the pilot were fatally injured. Two other crew persons received injuries.

FEMA has ordered a short Type II Incident Management Team (Kearney) to manage a staging and distribution center in Thomasville, GA. for flood assistance.

Rocky Mountain Area Large Fires:

NORTH FORK, Grand Mesa/Uncompahgre/Gunnison NF. A Type I Incident Management Team (Richer) is committed. The fire will transition to a Type II Team today.

2-ROAD, Grand Junction District, BLM. A Type II Incident Management Team (Stone) is committed. The fire is burning west of Mack, CO, near I-70 on the Colorado/Utah border. The Interstate was temporarily closed yesterday due to the fire. Multiple structures are threatened. All resources from the Pyramid fire were reassigned to this incident.

LARIMER COMPLEX, Arapaho/Roosevelt NF. A Type II Incident Management Team (Krugman) is committed. This complex is comprised of 8 fires. Thirty-five people were temporarily evacuated.

LARIMER CMPLX	ARF	CO	863	UNK	UNK	UNK	UNK	UNK	UNK	UNK	UNK	UNK

CRD = Craig BLM

Southwest Area Large Fires:

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire made a major run yesterday. Crews, airtankers and helicopters worked all day on the south flank to hold a 1.3 mile piece of line on 78% slope with a south aspect. The south flank must be held to keep the fire east of the Chiricahua Crest. Due to long tours of duty resulting in extreme fatigue, crews will begin a R&R program today. Contingency plans are being developed for structure protection.

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Strong afternoon winds caused the Rincon fire to become troublesome, even on the perimeter where mop-up had been going on for 2-3 days. Ground forces with the support of airtankers and helicopters held all the established line. The fire continued to move steadily downslope in an eastward direction. A dozer line was completed on the east flank, linking the Rincon fire to the Redington fire. Burnout of this segment was planned for last night.

BIG ROCKS COMPLEX, Lincoln NF. A Type II Incident Management Team (Butler) is committed. Temperatures increased with a significant drop in relative humidity. Suppression and mop-up continues to go as well as planned. Demobilization of type II crews and overhead will continue today.

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, JULY 14, 1994 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: The Rocky Mountain Area continues to experience increasing initial attack activity. Extreme fire activity continues to plague fires in the Southwest Area. A caterer, 2 shower units, 3 radio systems, 49 crews, 3 type I helicopters, 2 type II helicopters, 1 type III helicopter and 24 smokejumpers were ordered by the Rocky Mountain Area through NICC.

Flags will be flown at half-mast today in memory of the two helitack crew members from the Gila NF that were killed 7/12 in a helicopter accident.

A Southern Area Type II Incident Management Team (Kearney) has been mobilized to Thomasville, GA to set up a shipping and receiving distribution center for FEMA.

Rocky Mountain Area Large Fires:

NORTH FORK, Grand Mesa/Uncompahgre/Gunnison NF. A Type II Incident Management Team (Spradlin) is committed.

2-ROAD, Grand Junction District, BLM. A Type II Incident Management Team (Stone) is committed. The fire is burning west of Mack, CO, near I-70 on the Colorado/Utah border. The Interstate has one lane open in each direction. Multiple structures are threatened.

BOX D, Craig District, BLM. The fire is 14 miles west of Meeker, CO. Airtankers supported suppression efforts on the fire yesterday. The east and south flanks were contained.

UTE CREEK, White River NF. A Type I Incident Management Team (Richer) will take over the fire today. Crews were pulled off the line yesterday when it blew up.

WRAY, Montrose District, BLM. The fire is west of Bedrock, CO. A Type II Incident Management Team (Hart) has been assigned.

BLUE GRAVEL, Craig District, BLM. The fire is about 15 miles north of Craig and is threatening structures and scattered ranches. Two out-buildings have been destroyed and critical wildlife habitat was damaged.

LARIMER COMPLEX, Arapaho/Roosevelt NF. A Type II Incident Management Team (Krugman) is committed. The complex is comprised of 9 fires. Favorable weather yesterday allowed crews to make excellent progress. Most of the fires were held.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST

LARIMER CMPLX	ARF	CO	365	UNK	UNK	462	21	1	2			1M

Southwest Area Large Fires:

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire has remained extremely active and continues to move south into the Chiricahua Wilderness. High priority areas have been identified for structure protection, which is where resource deployment will be concentrated. Airtankers were used on the east flank to support crews during line construction and burnout operations to protect the Southwest Research Station.

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Hot, dry weather and strong winds created severe fire behavior, resulting in two major runs to the east and north. This burned an additional 2,700 acres yesterday. Winds continue to push the fire to the east through grass and brush in the lower terrain and through brush and timber in the higher elevations. One ranch a mile west of the fire was provided structural protection.

BIG ROCKS COMPLEX, Lincoln NF. A Type II Incident Management Team (Butler) is committed. Bucket work continued on the remaining hot spots on the fire. Final demobilization of overhead and crews is planned for today.

PIGEON, Gila NF. Effective use of handcrews precluded significant acreage increase. The fire is burning into natural barriers.

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JULY 15, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Increased fire activity occurred in several areas of the west. Extreme fire behavior continues to persist on fires in the Southwest Area. Equipment, aircraft, crews and overhead were mobilized through NICC to the Western Great Basin, Northwest and Rocky Mountain Areas. Crew demobilization from the Southwest occurred yesterday.

Rocky Mountain Area Large Fires:

BLACK RIDGE, Southern Ute Agency, BIA. Fire personnel were removed from the area yesterday due to extreme fire behavior. Structures, gas wells and powerlines are threatened and 4-6 homes on La Posta Canyon Road were evacuated.

BLUE GRAVEL, Craig District, BLM. Adverse weather conditions are contributing to control problems.

NORTH FORK, Grand Mesa/Uncompahgre/Gunnison NF. A Type II Incident Management Team (Spradlin) is committed. Good progress was reported on handline construction. Two crews were demobilized yesterday and additional demobilization is planned for tomorrow.

UTE CREEK, White River NF. A Type I Incident Management Team (Richer) is committed. The fire is burning in spruce/fir fuels. Approximately a third of the fire is burning in the Flat Top Wilderness.

WRAY, Montrose District, BLM. A Type II Incident Management Team (Hart) is committed. Suppression resources worked near the the rim of Lasalle Creek.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

WRAY	MRD	CO	1,000	15	7/18	113	3	1	3	0	UNK	UNK

Southwest Area Large Fires:

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. The fire made a significant run to the north burning in mazanita, oak, ponderosa pine and mixed conifer. Protection of the ranches was successful on the southeast perimeter. The Rincon fire has burned into the Redington fire causing the head to split and move in a north and east direction. Flanking was successful and progressed well well on the eastern portion. Suppression priority will now change to flanking the northwest side of the fire with retardant lines and securing Manning Camp Administrative Site by installing sprinkler systems on the exterior of the structures. The fire increased 2,775 acres yesterday.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire has remained active on the south and east sides advancing into the Chiricahua Wilderness. The flame front is approximately 12 miles in length. Suppression forces were concentrated on areas identified for structure protection. Handcrews continued line construction to reinforce protection of the Southwest Research Station.

BIG ROCKS COMPLEX, Lincoln NF. The Type II Incident Management Team (Butler) will close out this morning. Demobilization is almost complete and the fire has been turned back to the forest. Two hotshot crews and a helicopter will remain on the fire for a few more days.

PIGEON, Gila NF. Effective use of handcrews precluded significant acreage increase. The fire is burning into natural barriers. Objective is to secure the line south of Willows Spring.

Western Great Basin Large Fires:

HALLELUJEH, Carson City District, BLM. A Type II Incident Management Team (Dondero) is committed. The fire started yesterday afternoon off Highway 395, burning in grass, sage and pinyon-juniper about 20 miles north of Reno. The current threat is to homes in the Red Rocks/Rancho Haven area and to a Wilderness Study Area. Several housing developments in the area have been evacuated. Fifty homes were threatened and protected by structural crews before the fire moved on. The fire made major runs to the north and south within Red Rock Valley. The incident has the potential to triple in size before being controlled.

Southern Area Incidents:

GEORGIA FLOOD. A Southern Area Type II Incident Management Team (Kearney) is committed in Thomasville, GA to run a shipping and receiving distribution center for FEMA. The team has inventoried and distributed several truck loads of supplies.

Outlook: Scattered afternoon and evening thunderstorms will concentrate over eastern Montana and eastern Wyoming while isolated activity develops over the remainder of the interior west. Temperatures will show little change from the past few days. Anticipate initial attack activity to continue throughout the west with the potential for escaped fires.

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY, JULY 16, 1994 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity moderated in Nevado, Northern Rockies, and the Southwest. Extreme fire behavior continues on large fires in the Southwest and Colorado. A type I Team, additional crews and engines, a shower, and a caterer were mobilized through NICC to Nevada. A shower unit and two ATMU's were mobilized to Colorado.

Rocky Mountain Area Large Fires:

BLACK RIDGE, Southern Ute Agency, BIA. A Type II Incident Management Team (McAtee) is committed. Extreme fire behavior is occurring. Two structures were burned and twenty-five families were evacuated. The evacuation of fire camp was cancelled when the wind shifted. Control problems include extremely low fuels moistures, low relative humidities, gusty winds, steep terrain and limited access.

SIMSBERRY, Craig District, BLM. The fire is located two miles west of Sunbeam, CO. and is burning in pinyon-juniper chaining slash with tremendous spread potential.

PRONGH, Craig District, BLM. The fire is located 12 miles west of Maybell, CO. on County Rd. 8 and is burning in grass and sage.

UTE CREEK, White River NF. A Type I Incident Management Team (Richer) is committed. The fire is burning in an area of 40 year old bug killed spruce snags. Extremely low live and dead fuel moistures indicate a potentially explosive situation. Fire behavior has been active and crown fires are occurring. The fire has been burning in green fuels including the aspen fuel types. Homes and ranches to the north of the fire are concerns.

WRAY, Montrose District, BLM. A Type II Incident Management Team (Hart) is committed. No other information available.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

WRAY	MRD	CO	1,000	15	7/18	113	3	1	3	0	UNK	UNK

Southwest Area Large Fires:

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Significant progress was made on the eastern side of the Rincon fire. A sprinkler system was installed at Manning Camp Administrative Site. Due to active fire behavior, heavy fuels and rough, inaccessible terrain, crews were unable to accomplish tasks on the northern portion. The priority will be line construction and burnout during the night. Increased relative humidity has limited the fire spread. The acreage decrease is due to revised intelligence and mapping.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire made hard upslope runs to the east. Heavy air support was used to slow the fire spread on the west side. Protection emphasis continues at the John Hands Campground, SW Research Station, and critical ornithological habitats.

BIG ROCKS COMPLEX, Lincoln NF. Demobilization is nearing completion. The fire is now managed by the forest. Mop up and hotspotting continues.

PIGEON, Gila NF. There was no acreage increase due to higher humidities.

Western Great Basin Large Fires:

HALLELUJEH, Carson City District, BLM. A Type I Incident Management Team (Carvelho) is committed. Over 200 homes have been saved, however more than 500 remain threatened. All lines held today, but the fire had potential to escape control lines due to erratic winds. Extreme fire behavior is being observed 24 hours a day. Steep, rocky terrain is limiting suppression forces to aerial assault in some locations.

Outlook: ***Red Flag Watch for Central Nevada for dry lightning.*** Thunderstorms will increase and still remain dry over Arizona this weekend, then gradually become wetter the first of next week. Isolated dry thunderstorms are working their way further north into the Great Basin Saturday. Isolated to scattered thunderstorms continue over the Rocky Mountains and New Mexico. Sunny and warm conditions will prevail over the Pacific Northwest and California. Anticipate initial attack activity to escalate with increased thunderstorms.

INCIDENT MANAGEMENT SITUATION REPORT
 SUNDAY, JULY 17, 1994 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity increased in several areas of the west due to lightning. Several fires in Colorado made good progress and containment dates were moved up. Resource mobilization of aircraft, crews, overhead, equipment and supplies increased through NICC, mainly to the Eastern and Western Great Basin.

Rocky Mountain Area Large Fires:

BLACK RIDGE, Southern Ute Agency, BIA. A Type II Incident Management Team (McAtee) is committed. More structures are threatened in La Posta Canyon, and there have now been thirty-five families evacuated. Burnout operations accomplished on the 15th helped to hold the fire on the northeast side. Extreme fire behavior was reported again on the fire yesterday. Multiple retardant drops were made by the MAFFS units out of Arizona.

UTE CREEK, White River NF. A Type I Incident Management Team (Richer) is committed. Intense fire behavior was reported on the fire yesterday. Suppression operations include aggressive control and confinement strategies. Good progress was made on the north side; although dry, heavy fuels and difficult access are creating problems. Homes and ranches north of the fire remain threatened. The fire did receive a rain shower yesterday.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

DIVIDE	CRD	CO	950	100	7/16	27	0	5	0	0	UNK	UNK

Southwest Area Large Fires:

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Higher humidities and cooler temperatures assisted crews in making progress towards containing the Rincon fire. The increasing chance of thunder cell development near the fire could produce strong winds, causing flare-ups.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. High clouds mixed with cumulus covered portions of the fire from early morning to late yesterday afternoon. This contributed to less intense fire behavior. The handline northwest from Horseshoe Pass should provide structure and critical bird habitat protection.

Outlook: A RED FLAG WATCH has been issued for southern Idaho, southeast Oregon, western Wyoming, and southeast Arizona for dry lightning. The air mass over the west will become unstable Sunday and dry thunderstorms will develop. Isolated dry thunderstorms are also expected to move into the Pacific Northwest. Initial attack activity is expected to increase over the west with forecasted dry lightning. New large fires are also probable. Competition for initial attack resources will increase.

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JULY 18, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued in several areas of the west and increased significantly in northern California and Nevada. Good progress was reported on most large fires in the Southwest and Rocky Mountain Areas due to the monsoonal influence. Mobilization through NICC moderated, while crew demobilization increased from the Southwest and Rocky Mountain Areas.

Rocky Mountain Area Large Fires:

BLACK RIDGE, Southern Ute Agency, BIA. A Type II Incident Management Team (McAtee) is committed. This fire is located in southwest Colorado near San Ignacio. Erratic fire behavior continues to be reported. The fire perimeter enlarged on the southeastern and northern portions but without any major runs. Structures, gas lines, well heads, archaeological sites and power lines continue to be threatened. MAFFS units out of Arizona were used on the fire again yesterday.

UTE CREEK, White River NF. A Type I Incident Management Team (Richer) is committed. Cooler temperatures and light precipitation aided suppression efforts. Potential threats to homes and ranches north of the fire are still a concern. Most the acreage of the fire is within the Flattops Wilderness.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL CTN	CRW PERS	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

SIMSBERRY	CRD	CO	550	100	7/17	12	0	4	0	0	UNK	UNK

CRD = Craig BLM

Southwest Area Large Fires:

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Arrival of a moist, cool airmass has significantly slowed further advance of the Rincon fire. The fire received a small amount of rain throughout the day. The favorable weather allowed direct attack with handcrews on the fire front, handline was almost completed with the remainder expected to be finished today.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire received approximately 1/2 inch of rain, and the forecast calls for an additional 1-3 inches over the next few days. Rehabilitation on the lines and some demobilization began yesterday. Additional demobilization is planned for today and the transition of the fire back to the forest is planned for Tuesday.

IFD = Idaho Falls BLM

BOD = Boise BLM

Western Great Basin Large Fires:

LONE MOUNTAIN, Elko District, BLM. A Type II Incident Management Team (Fitzgerald) is committed. The fire experienced major runs yesterday afternoon on the north and northeast flanks. Ranches continue to be threatened. The projected size of the fire is 20,000 acres.

BULL RUN, Elko District, BLM. A burnout operation on the east flank was successful and alleviated the threat to four ranches.

Mahogany, Elko District, BLM. This fire is located about 12 miles northeast of Midas, NV. Crews are trying to hold the fire at existing roads in the area. Projected control size is 20,000 acres.

FRENCH BOY, Winnemucca District, BLM. The fire is burning in heavy sage and pinyon-juniper. The fire was quiet through the night, except for one front which had 30-40 foot flame lengths.

COTTONWOOD COMPLEX, Winnemucca District, BLM. This complex is comprised of 4 fires ranging from 10 to 1,400 acres, two of the fires have burned together. Two dozers are being used for structure protection around a ranch.

SIMPSON, Battle Mountain District, BLM. Airtankers made good progress in stopping runs on several flanks yesterday. Historic structures and mines are currently threatened.

Southern Area Incidents:

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a shipping and receiving distribution center for FEMA in Thomasville, GA. The team continues to clean and prepare the warehouse. A shipment of supplies and equipment from Miami is expected in the next few days.

Outlook: A RED FLAG WATCH has been posted over the higher terrain of southeast Idaho and western Wyoming for dry thunderstorms, and in southeast Oregon for low humidities and gusty winds. A cold front will move over the northwestern U.S. bringing slightly cooler temperatures, lightning that develops will be on the dry side. Arizona and New Mexico will have scattered showers and thunderstorms with temperatures dropping 5 to 10 degrees. Fire activity is expected to increase in the northwestern U.S. after the pass of this cold front.

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JULY 19, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued throughout most of the west. Good progress was made on most large fires in the Southwest and Rocky Mountain Areas, the major fires in those areas reported no acreage gains. Crew, overhead, equipment and aircraft mobilization that occurred through NICC was mainly for the Western Great Basin. Demobilization is continuing from the Southwest Area.

Rocky Mountain Area Large Fires:

BLACK RIDGE, Southern Ute Agency, BIA. A Type II Incident Management Team (McAtee) is committed. Operations focused on line construction and mop-up yesterday. Precipitation (0.18 inches) were recorded on the fire yesterday. The evacuation order was lifted and residents were allowed to return to their homes.

UTE CREEK, White River NF. A Type I Incident Management Team (Richer) is committed. Suppression efforts were assisted by a storm cell that resulted in widely scattered showers. Some torching was reported with potential identified for increased spotting and fire activity in the West Marvine Creek drainage. Air operations assisted local agencies in a non-incident related search operation.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST
				CTN	CTN	PERS				LOST	LOSS	COST
BLACK RIDGE	SUA	CO	12,000	75	7/19	798	28	37	5	2	UNK	1.6M
UTE CREEK	WRF	CO	2,735	85	7/20	648	22	8	7	0	UNK	2.2M

Southwest Area Large Fires:

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Crews completed handline and/or cold trailing across the front of the fire which was not very active due to higher humidities. Thunderstorms were in the area, but the fire received very little moisture. The fire front is in very rough country, making mop-up extremely difficult. Some demobilization is in progress.

RATTLESNAKE, Coronado NF. A Type I Incident Management Team (Denton) is committed. The fire has been turned over to the Douglass District. No rain was received on the south portion, this area has uncontained line and active fire activity remains. Demobilization is continuing.

Eastern Great Basin Large Fires:

GARVEY GULCH, Moab District BLM & Manti Lasal NF. A Type II Incident Management Team (Black) is committed. Quick response on this fire in the first burning period with air support kept the fire relatively small. Good progress was made in line construction.

CRAWFISH, Boise District, BLM. The fire is burning close to the Nevada state line. High winds and dry fuels are pushing the fire into heavier fuels.

FIF = Fishlake NF

Western Great Basin Large Fires:

LONE MOUNTAIN, Elko District, BLM. A Type II Incident Management Team (Fitzgerald) is committed. The fire made several runs yesterday. Due to the extreme fire behavior, ground crews were not able to make direct attack.

MAHOGANY, Elko District, BLM. The fire made a major run yesterday afternoon, gaining 6,200 acres. Livestock and watershed that provides water for a threatened and endangered trout species are threatened.

COTTONWOOD COMPLEX, Winnemucca District, BLM. Good progress was made on the fire yesterday with significant gains with the addition of air support. High temperatures are causing problems for the crews.

SIMPSON, Battle Mountain District, BLM. A Type II Incident Management Team (Butler) will take over the fire this morning. The fire made a major run to the south threatening an active mine and two ranch headquarters.

Outlook: A RED FLAG WATCH is posted for dry lightning in southwestern Oregon this evening. The Pacific Northwest will continue to be hot and dry as a high pressure system builds in the area. This will cause a cold, weak front to move through Montana and Wyoming through the evening and into Colorado by Wednesday. A thermal trough is building along the Oregon coast producing strong and gusty winds. Arizona will experience a decrease in moisture as the low pressure over the state weakens. Initial attack activity is expected to continue, and increase in the Northwest due to predicted dry lightning.

INCIDENT MANAGEMENT SITUATION REPORT
 WEDNESDAY, JULY 20, 1994 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity continued throughout most of the west, but only a couple of fires escaped. Good progress was made on most large fires and all of the Type I Incident Management Teams were released or will be today. Resource mobilization through NICC moderated significantly. Demobilization is occurring in the Southwest, Western Great Basin and Rocky Mountain Areas. MAFFS were released yesterday and will be traveling to their home bases today.

Rocky Mountain Area Large Fires:

CABIN GULCH, Craig District, BLM. This lightning caused fire is located 18 miles southeast of Rangely, Co. The fire spread rapidly in dry fuels when retardant lines failed to hold it during initial attack. Additional resources have been requested for today. One structure, located 1.5 miles from the fire perimeter may be threatened.

UTE CREEK, White River NF. Type I Incident Management Team (Richer) will be demobilized today. Very little increase in acreage occurred yesterday, although isolated torching was still taking place. The threat to homes and ranches north of the fire have been largely eliminated.

UTE CREEK	WRF	CO	2,800	95	7/20	648	22	5	7	0	UNK	1.6M

SUA = Southern Ute BIA

Southwest Area Large Fires:

REDINGTON COMPLEX, Arizona State. A Type II Incident Management Team (Bedlion) is committed. Mop-up continues, however, it is extremely slow and difficult due to the steep terrain, heavy brush, and patchy burn. There is also alot of heat still present within the perimeter. Despite the high humidity, the fire still has not received any precipitation. Mop-up and rehabilitation will continue. Four crews will be demobed today.

RATTLESNAKE, Coronado NF. The fire has been turned over to the Douglas District. A small amount of fire activity still exists. Last precipitation received over 48 hours ago and fuels are drying out as the area heats up. Line construction continues, while mop-up and rehabilitation begins.

LNF - Lincoln NF GNF = Gila NF
 ASF = Apache/Sitgreaves NF

Eastern Great Basin Large Fires:

SHINGLE CREEK, Fishlake NF. The fire was quiet yesterday due to lower temperatures and higher relative humidities. Line improvements were completed and the last crew should be released today.

Western Great Basin Large Fires:

MAHOGAN, Elko District, BLM. The fire made a wind driven run gaining 400+ acres in 30 minutes yesterday. Flame lengths were 10-15 feet and spotting occurred up to 50 yards ahead of the fire. The fire is burning in a watershed where the threatened Lahonton cutthroat trout are found.

SIMPSON, Battle Mountain District, BLM. A Type II Incident Management Team (Butler) is committed. Crews made good progress with support from aircraft and engines. A sloopover on the west edge of the fire made a short run, but was effectively lined.

Outlook: A RED FLAG WATCH is posted for low humidity and dry lightning in northwest Oregon. The Southwest will experience a decrease in moisture as the monsoonal system moves westward. This system along with the thermal trough on the west coast will cause California to experience strong, gusty winds. A dry, stable air mass will linger over Idaho, Montana, and Wyoming through tonight. Temperatures will remain in the 90's and 100's throughout the west. Initial attack activity is expected to continue with the potential increasing for escaped fires.

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, JULY 21, 1994 0530 MDT
 NATIONAL PREPAREDNESS LEVEL II

Current Situation: Initial attack activity continued throughout most of the west. Progress was made on most large fires. Resource mobilization through NICC moderated significantly, while demobilization continues throughout the Southwest, Western Great Basin and Rocky Mountain Areas.

Rocky Mountain Area Large Fires:

CABIN GULCH, Craig District, BLM. The cause of the fire is unknown. It escaped containment lines today due to erratic winds and dry fuels. Helicopter and airtanker support for crews constructing handline is planned for today.

UTE CREEK, White River NF. Small runs occurred in the Flat Tops Wilderness. Spot fires continue to be suppressed. Control problems include hazardous, inaccessible terrain and dry fuels. Current threats are to timber, wildlife habitat and recreational values.

Outlook: A RED FLAG WATCH for dry lightning is posted for west-central and northwest Nevada, northern California, northwest and central Oregon, and eastern Washington. A high pressure ridge covers the entire western states with a very warm air mass. Monsoon moisture continues to spread across the desert southwest and into southern California reaching up into portions of Nevada, Oregon, and Washington. This combination of limited high level moisture and a very dry lower atmosphere could set off isolated dry lightning storms across portions of northern California, Oregon, and Washington. Scattered wet thunderstorms will concentrate over Arizona, New Mexico, and Colorado. Anticipate initial attack activity to increase in the Northwest with continued demobilization of resources in the Southwest.

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, JULY 22, 1994 0530 MDT
 NATIONAL PREPAREDNESS LEVEL II

Current Situation: Initial attack escalated in the Northwest and North Zone California. In response, NICC mobilized smokejumpers, crews, caterers and showers, communications equipment, airtankers and helicopters. The Southwest Area also had increased initial attack, but no problems were reported. Airtankers are in high demand as several areas are reporting extreme fire indices and dry lightning is forecasted.

Rocky Mountain Area Large Fires:

UTE CREEK, White River NF. Increased fire activity was reported yesterday in the Flat Top Wilderness. Low impact suppression techniques and a confinement strategy are being employed. Numerous spots continue to be suppressed outside the control lines in the non-wilderness section.

SPAULDING	LAD	OR	400	100		14	0	2	2	0	UNK	UNK

LAD = Lakeview BLM * No info received.

Southern Area Incidents:

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a receiving and distribution center for FEMA in Thomasville, GA.

Outlook: A RED FLAG WATCH for dry lightning is posted for northern California, most of Oregon, eastern Washington, the Washington Cascades, southwestern Idaho, the panhandle of Idaho and the extreme northwestern portion of Montana. The high pressure ridge centered over the Southwest extending up to the Pacific Northwest shows no signs of change through the next 24 hours. A moist southeast flow touches off widely scattered, mostly wet thunderstorms over the desert Southwest, southern Colorado and southern Utah. As this flow moves into the Pacific Northwest, the moisture decreases and isolated dry lightning activity becomes prevalent. The thunderstorm activity over northern California and southern Oregon could contain more shower activity than the previous storms. Anticipate initial attack activity to intensify and mobilization of resources to increase. Competition for airtankers and helicopters is expected.

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JULY 23, 1994 0900 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Lightning activity resulted in numerous fires in several areas of the west. NICC mobilized smokejumpers, miscellaneous overhead, crews, caterers and showers, communications equipment, airtankers and helicopters to northern California and Oregon. Very high and extreme fire indices prevail on the majority of units in the west.

Rocky Mountain Area Large Fires:

UTE CREEK, White River NF. Crown activity was observed on steep slopes above Ute Creek in the wilderness, 150 additional acres burned yesterday. Good progress was made on spot fires outside of the wilderness using bucket drops. A confinement strategy is being employed on the wilderness portion.

				CTN	CTN	PERS				LOST	LOSS	COST
UTE CREEK	WRF	CO	3,000	98	7/23	450	12	5	7	0	UNK	2.3M

Southwest Area Large Fires:

RATTLESNAKE, Coronado NF. Crews are cold trailing, mopping up and rehabing trails and fencelines.

The Big Rocks and Sunset fires are in monitor status and will not be considered contained until significant rain is received. They will no longer be reported unless significant activity occurs.

Western Great Basin Area Large Fires:

IL COMPLEX, Elko District, BLM. The complex is comprised of 3 fires.

FIVE MILE, Winnemucca District, BLM. The fire received precipitation aiding firefighters with suppression efforts.

CHIMNEY, Winnemucca District, BLM. Extreme fire behavior occurred early; however, precipitation aided suppression efforts. The Little Humboldt Ranch is threatened.

BUTTERMILK, Winnemucca District, BLM. Precipitation aided in initial attack of this fire.

North Zone - California

DILLON COMPLEX, Klamath NF. A Type I Incident Management Team (Lee) is committed. Thunderstorms were reported throughout the area yesterday, some precipitation was received at Quartz Hill, north of Etna. The complex consists of 32 fires being managed in 4 branches.

TRINITY COMPLEX, Shasta-Trinity NF. A Type I Incident Management Team (Harbour) is committed. The complex is comprised of more than 40 fires on the McCloud, Mt. Shasta, Hayfork and Big Bar Districts.

Northwest Area Large Fires:

FOUR CORNERS, Deschutes NF. A Type I Incident Management Team (Eddy) is committed. The fire continues to threaten a major campground, resort, Oregon Dept. of Fish & Wildlife building and a major electronic site on Lookout Mountain. With active burning and spotting yesterday another 6 campgrounds in the surrounding area were evacuated as a precautionary measure. Airtankers were not able to work portions of the fire due to poor visibility near drop zones. Crews are losing constructed line due to intense burning conditions. Unpredictable winds and snags continue to be a safety problem.

APPLEGATE COMPLEX, Rogue River NF. A Type II Incident Management Team (Phenix) is committed. The complex is comprised of 6 fires approximately 25 miles southeast of Medford, OR. Fire activity was reported to be low, except in the vicinity of thundercells.

RED POINT, Burns District, BLM. This fire is threatening structures, wilderness study and big game winter range 25 miles northeast of McDermitt, Nevada.

MENDENHALL, Siskiyou NF. This fire is located 5 miles south of Cave Junction, Oregon. No other information reported.

Southern Area Incidents:

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a receiving and distribution center for FEMA in Thomasville, GA.

Outlook: A RED FLAG WATCH for dry lightning has been posted in central and southern Idaho, southeast Oregon and western Wyoming. A RED FLAG WATCH has been posted for dry thunderstorms in the Idaho panhandle, western Montana, central Oregon, the Washington Cascades and eastern Washington. A high pressure ridge is locked over the western states. Wet thunderstorms concentrated over New Mexico, Arizona and Colorado have moved into Utah, Nevada and the east slopes of the Sierras. Thunderstorms over northern California will become wetter over the weekend. Temperatures will continue to be higher than normal with the exception of Montana and eastern Wyoming. Initial attack and large fire activity is expected to increase. Competition for airtankers, helicopters, smokejumpers and hotshot crews is expected to escalate.

INCIDENT MANAGEMENT SITUATION REPORT

SUNDAY, JULY 24, 1994 0900 MDT

NATIONAL PREPAREDNESS LEVEL III

Current Situation: Lightning occurred throughout the west, resulting in increased initial attack in several areas. NICC continued to mobilize resources in support of large fires and initial attack activity. Most units in the west are reporting very high and extreme fire indices.

North Zone - California Large Fires:

DILLON COMPLEX, Klamath NF. A Type I Incident Management Team (Lee) is committed. The complex consists of 18 fires being managed in 6 branches.

BLUE/SALMON COMPLEX, Six Rivers NF. A Type II Incident Management Team (Edgeley) is committed. The complex is comprised of 12 fires that are expected to burn into 2 fires.

TRINITY COMPLEX, Shasta-Trinity NF. A Type I Incident Management Team (Harbour) is committed. The complex is comprised of 26 fires with three of them requiring active suppression.

INCIDENT NAME	UNIT	ST	SIZE	%	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

Northwest Area Large Fires:

FOUR CORNERS, Deschutes NF. A Type II Incident Management Team (Andrade) is committed. The fire held within the lines yesterday. Campground evacuations are still in force.

RED POINT, Burns District, BLM. This fire continues to threaten ranches, a wilderness study area and big game winter range 3 miles north of Denio, Oregon.

MENDENHALL, Siskiyou NF. This fire is located 5 miles south of Cave Junction, Oregon. The main fire wasn't very active, but two adjacent small fires were causing trouble yesterday afternoon.

Southern Area Incidents:

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a receiving and distribution center for FEMA in Thomasville, GA.

Outlook: A RED FLAG WATCH has been posted for dry thunderstorms in the Idaho Panhandle and western Montana. A RED FLAG WARNING has been posted for strong westerly winds and low humidities over the east slopes of the northern Oregon Cascades late today. A RED FLAG WARNING has been posted for dry thunderstorms over the Washington Cascades and eastern Washington. The desert southwest, Utah, Nevada and Colorado will have mostly wet thunderstorms. Thunderstorms over eastern Oregon, Idaho and Wyoming will be a mix of wet and dry. California and western Oregon will have decreasing thunderstorm activity. Temperatures will continue to be hot over the interior west. Fire activity is expected to increase with continued thunderstorms forecast. The potential for a drawdown on initial attack resources is highly probable. Competition for airtankers, medium helicopters, hotshot crews and smokejumpers will continue.

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, JULY 25, 1994 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Nevada, Oregon, Washington, Idaho and Montana experienced a considerable amount of lightning resulting in significant initial attack activity. NICC mobilized crews, overhead, aircraft, equipment, and supplies to these areas. Very high to extreme indices are being reported on most units in the west and several areas have fire restrictions in effect. Erratic fire behavior appears to be the norm, according to several fire reports.

Two Type II Incident Management Teams have been assigned to the Colville NF; one to the Wenatchee NF; one to the Yakima Agency, BIA; and one to the Idaho Panhandle NF. Some of these teams are managing several initial attack fires within complexes. Very little information is available at this time.

Northwest Area Large Fires:

MENDENHALL, Siskiyou NF. A Type I Incident Management Team (Eddy) committed. No other information reported.

RED POINT, Burns District, BLM. Structure protection is still a priority on this fire. Steep, inaccessible terrain is hampering control efforts.

INCIDENT NAME	UNIT	ST	SIZE	%	EST	TOTAL	CRW	ENG	HELI	STRUC	EST\$	EST

SHF = Shasta-Trinity NF SRF = Six Rivers NF SUD = Susanville BLM

Western Great Basin Area Large Fires:

GOOSE CREEK, Elko District, BLM. A Type II Incident Management Team has been ordered for this lightning caused fire. Acreage increased from 4,000 to 10,000 as a result of windshifts and erratic fire behavior. The Upper Unit of the Winecup Ranch was threatened, but retardant drops and firefighter efforts have lessened this threat.

RAIN FIRE, Elko District, BLM. This fire located between Carlin and Elko grew from 5,000 to 10,000 acres in one hour 7/24. The erratic fire behavior was caused by high winds from a thunderstorm cell. Firefighters were moved to safe areas and no injuries were reported. A Type I Incident Management Team has been ordered.

BIG TABLE FIRE, Humboldt NF. Fire started by lightning 5 miles south of the Oregon border. A Type II Incident Management Team has been ordered.

Southern Area Incidents:

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a receiving and distribution center for FEMA in Thomasville, GA.

Outlook: A RED FLAG WATCH has been posted for dry lightning in eastern Washington. A strong high pressure system remains over the western states. Widely scattered afternoon and evening thunderstorms are forecast for most of the interior west. Drier air will move into California and Nevada decreasing the chance of thunderstorms. Slightly cooler air will move into western Oregon and western Washington. Hot and dry conditions will continue for the rest of the western U.S. Fire activity is expected to increase. Competition for airtankers, hotshot crews, smokejumpers, and medium helicopters will escalate.

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JULY 26, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Washington, Idaho and Montana experienced lightning resulting in an increase in initial attack activity. Several fires in the Northwest and northern Idaho have escaped initial attack. Three Type I Incident Management Teams have been mobilized, as well as crews, overhead, aircraft, and equipment. Very high to extreme indices are being reported on most units and several areas have fire restrictions in effect.

Four MAFFS units have been mobilized to Boise from California and Colorado.

Northwest Area Large Fires:

TYEE COMPLEX, Wenatche NF. A Type I Incident Management Team (Wands) has been committed. Fire is still growing and is estimated to go to 800 acres before containment.

MENDENHALL, Siskiyou NF. A Type I Incident Management Team (Eddy) is committed. Fire was held on the east side to reduce structure threat.

POORMAN, Okanogan NF. A Type I Incident Management Team (Monahan) has been committed. No other information is available.

HATCHERY COMPLEX, Wenatchee NF. A Type I Incident Management Team (Porter) committed. No other information is available.

REPUBLIC COMPLEX, Colville NF. A Type II Incident Management Team (Furlong) committed. The complex is located eight miles east of Republic, Washington and consists of eight fires.

Western Great Basin Area Large Fires:

RAIN FIRE, Elko District, BLM. A Type I Incident Management Team (Birch) is committed. The fire threatens private ranches, Rain Gold Mine, powerlines, Interstate 80 and Carlin, Nevada. Flame lengths vary from 4'-10'. Erratic winds caused significant runs. A backfiring operation was executed on all other perimeters. High temperatures, low fuel moistures and high winds are causing control problems.

GOOSE CREEK, Elko District, BLM. A Type II Incident Management Team (Black) is committed. Erratic winds hampering control efforts.

BIG TABLE, Humboldt NF. A Type II Team (Martin) is committed. No other information is available.

GNF = Gila NF

Northern Rockies Area Fires

MOOSE LAKE COMPLEX, Idaho Panhandle NF. A Type II Team (Kechter) is committed. This complex consists of 6 fires lightning caused fires totaling 68 acres. Control problems include spotting, inaccessibility and steep terrain. The current threat is to bull trout habitat.

*No report

Southern Area Incidents

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a receiving and distribution center for FEMA in Thomasville, GA.

Outlook: High pressure remains over the western U.S. Widely scattered afternoon and evening thunderstorms are forecast for the interior west. Slightly cooler marine air will move into western Washington and western Oregon, but should clear off by late morning. Hot and dry conditions remain over most of the west and fire activity should increase. Competition for resources continues with the increase in initial attack and extended attack activity in the Northwest and Northern Rockies areas.

INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, JULY 27, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

Current Situation: Several fires in the Northern Rockies and Eastern Great Basin escaped initial attack, and have gained large fire status. NICC received a considerable amount of orders for overhead, crews, aircraft, caterers and showers for large fires in the Northwest and the Northern Rockies. Shortages of helicopters, airtankers, smokejumpers, and various other specialized overhead have been realized. Fire behavior is extreme as a result of the persistent hot weather pattern.

Four additional MAFFS units have been mobilized to Spokane for use in the Northwest.

Northwest Area Large Fires:

TYEE COMPLEX, Wenatche NF. A Type I Incident Management Team (Wands) is committed. The fire made a spectacular run in the late evening, dropping debris over 3 miles downwind. There is potential for it to reach 30,000 acres.

MENDENHALL, Siskiyou NF. A Type I Incident Management Team (Eddy) is committed. The fire is located 5 miles southwest of Cave Junction, Or. in steep, rugged terrain. This complex consists of 11 fires including 2 in the Kalmiopsis Wilderness.

POORMAN, Okanogan NF. A Type I Incident Management Team (Monahan) is committed. Good progress was made 7/26.

HATCHERY COMPLEX, Wenatchee NF. A Type I Incident Management Team (Porter) is committed. Threat exists to several cabins in the area. Fire is in very rugged, inaccessible terrain.

REPUBLIC COMPLEX, Colville NF. A Type II Incident Management Team (Furlong) is committed. Approximately 60% of the area within lines unburned. Fire is in steep, inaccessible terrain.

LE CLAIR, Warm Springs Agency BIA. Fire is burning rapidly with spotting ahead of the main fire during the day. Structures have been destroyed. There are 12 dozers in operation.

LAKEBED, Yakima Agency BIA. Low evening humidity caused flareups that breached the line. Outlook is for continued growth. 8 dozers are being utilized.

LITTLE FERRY, Prineville District BLM. Fire is making runs northwest into Curry Canyon. Erratic winds have warranted indirect attack.

RIDDLE RANCH, Burns District BLM. Riddle Brothers Ranch is threatened. No additional information available.

OLSON COMPLEX, Colville NF. A tree plantation and wildlife refuge are currently threatened.

Southern Area Incidents

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) is committed. The team is operating a receiving and distribution center for FEMA in Thomasville, GA.

Outlook: A RED FLAG WARNING has been posted for dry lightning and low humidity in western Montana. RED FLAG WATCH for strong westerly winds and low humidity over the eastern slopes of central Oregon. RED FLAG WATCH for dry lightning in the extreme northeast part of Oregon. The strong high pressure ridge remains stationary over the intermountain west. Widely scattered afternoon and evening thunderstorms are forecast for most of the interior west. Hot and dry conditions will remain. Fire activity is expected to increase in the north.

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JULY 28, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL IV

Current Situation: Fire activity in the Northern Rockies, Northwest and Eastern Great Basin continued to escalate as hot, dry weather conditions prevail. A considerable amount of orders for overhead, crews, aircraft, caterers and showers for large fires were processed through NICC. Helicopter, airtanker, hotshot crews, smokejumpers, and various overhead shortages continue. The persistent hot weather has created erratic fire behavior; the 10 fire orders and 18 watchout situations should be reaffirmed with all fire personnel.

At Preparedness Level IV, additional management actions need to be taken, please refer to chapter 27.3.4 of the National Interagency Mobilization Guide.

Northwest Area Large Fires:

TYEE COMPLEX, Wenatche NF. A Type I Incident Management Team (Wands) is committed. The fire near Entiat has destroyed 7 homes and several more are threatened. Structure protection is in place as structures in Navarre Coulee are threatened.

POORMAN, Okanogan NF. A Type I Incident Management Team (Monahan) is committed. New lightning fires have been incorporated and discussions of adding NPS fires are in progress.

LE CLAIR, Warm Springs Agency, BIA. A Type II Incident Management Team (Groshong) is committed. The fire made a major run resulting in the evacuations of Sunnyside and Dry Creek Sub Divisions. One home has been destroyed.

HATCHERY COMPLEX, Wenatchee NF. A Type I Incident Management Team (Porter) is committed. The fire has crossed the Wenatchee River and Highway 2. The sherriff department requested a voluntary evacuation of a campground and a 12 unit condo. Ground suppression was suspended, resulting in air tactics only. The fire has the potential to burn into the Alpine Lakes Wilderness.

LAKEBEDS, Yakima Agency, BIA. A Type II Incident Management Team (Lukens) is committed. Control lines on the south end of the fire were lost to this fire burning in heavy timber, mostly conifers. Crews were pulled off the fire several times due to explosive fire behavior.

MURRAY COMPLEX, The RIGGS fire in this complex is threatening a University of Washington Observatory and other structures. There are 6 fires included in this complex.

BUTLER COMPLEX, WASHINGTON STATE. The BUTLER fire crossed control lines in several places and is threatening several homes, 2 businesses, state park and powerline.

HIGHLANDS COMPLEX, WASHINGTON STATE. This complex is comprised of three fires caused by children playing with matches.

MENDENHALL COMPLEX, Siskiyou NF. A Type I Incident Management Team (Eddy) is committed. Single and multiple pockets of fuel within the perimeter continue to burn; extremely low fuel moistures and grass understory have shown a high rate of spread. The complex consists of 9 original fires and 2 in the Kalmiopsis Wilderness.

RIDDLE RANCH, Burns District, BLM. The fire is no longer a threat to the Riddle Brothers Ranch. One structure has been destroyed by the fire.

REPUBLIC COMPLEX, Colville NF. A Type II Incident Management Team (Furlong) is committed. This complex is comprised of 9 fires. Six small ones are lined and the 3 larger ones continue to spread slowly.

OLSON COMPLEX, Colville NF. This complex is located 25 miles east of Colville and is comprised of 20 fires. The fire jumped tractor lines and continues to be difficult to control. The fire continues to threaten a plantation, wildlife refuge and wilderness.

LITTLE FERRY CANYON, Prineville District BLM. The fire made runs to the northwest in Curry Canyon and slopping over into Little Ferry Canyon. Crews backed off from direct attack and focused on indirect attack.

MADSTONE, Siskiyou NF. This fire is a confinement fire deep inside the Kalmiopsis Wilderness. Rock predominates the area with interspersed vegetation, 60% of the perimeter is cold with no available fuels to burn. Monitoring continues daily.

Northern Rockies Area Large Fires:

NIRADA, Flathead Agency, BIA. A Type II Incident Management Team (Spradlin) is committed. Dry fuels and limited resources are making containment difficult. Threats are to high value timber and cultural sites.

HENRY PEAK, Montana State, Northwestern Land Office. A Type II Incident Management Team (Suenram) is committed. The fire is burning in heavy timber, slash and grass. Structure protection taking place in the McLaughlin Creek drainage where 2 homes are immediately threatened, all residents of the drainage have evacuated. The fire has burned off Forest Service land on to private commercial timber land, \$175,000 of log decks and harvested timber have been destroyed.

Southern Area Incidents

GEORGIA FLOOD. A Type II Incident Management Team (Kearney) has been released.

Outlook: A RED FLAG WARNING has been posted for dry lightning and low humidity in western Montana. A RED FLAG WARNING has been posted for strong westerly winds and low humidity for the east slopes of eastern Oregon. The hot and dry weather pattern will remain over the western U.S. as strong, high pressure remains stationary over the Intermountain West. Widely scattered afternoon and evening thunderstorms are forecast for most of the interior west. Temperatures will once again range in the 80's to 100 interior west and near 110 Southwest deserts. Fire activity is expected to accelerate as weather conditions prevail. Resource availability will remain poor and no relief is in sight.

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JULY 29, 1994 0530 MDT
NATIONAL PREPAREDNESS LEVEL V

Current Situation: Explosive fire behavior was again reported on most large fires. Fires are escaping initial attack and rapidly increasing due to the critical weather conditions that persist. NICC continues to process a significant amount of resources orders for all resource types. Shortages for helicopters, airtankers, hotshot crews, smokejumpers, and various overhead positions continue.

The 6th Army has been tasked for two batalions of Marines from Camp Pendleton. Training should begin today and they will be deployed to fires on the Wenatchee NF by early next week.

Northwest Area Large Fires:

TYEE COMPLEX, Wenatchee NF. A Type I Incident Management Team (Wands) is committed. The fire has burned approximately 10 miles from Chelan, WA. Evacuations include the Entiat Valley area, Navarre Coulee, 1st Creek, 25 Mile Creek, Lake Chelan State Park, Bear Mountain, South Shore and Chelan Butte areas. South Shore road is closed at Pat and Mike's store, Highway 97 is closed from the Wenatchee Industrial area to Chelan and the Entiat Valley road is still closed at the highway junction. Two homes have been damaged, 13 homes and over 75 outbuildings have been destroyed so far. Sixty-three engine strike teams have been called in through the State Mobilization Act.

OKANOGAN COMPLEX, Okanogan NF. Previously reported as POORMAN. A Type I Incident Management Team (Monahan) and a Type II Incident Management Team (Burdick) are committed. The POORMAN, THUNDER, WAR CREEK, BURNT SAW and ABC MISC. were combined into this complex. The POORMAN fire increased slightly enabling crews to complete most of the line construction. The WAR CREEK fire includes the Stehekin Valley fires in the North Cascades National Park. The THUNDER MOUNTAIN fire control efforts were ineffective due the fire making runs.

HATCHERY COMPLEX, Wenatchee NF. A Type I Incident Management Team (Porter) is committed. The fires are located 10 miles west of Leavenworth WA. The fire jumped Highway 2 and the Wenatchee River forcing the closure from Leavenworth to Coles Corner. Burnout of handlines will be used today to contain a new 60 acre fire.

LAKEBEDS, Yakima Agency, BIA. A Type II Incident Management Team (Lukens) is committed. The fire is burning in heavy timber 7 miles west of Satus Pass, WA. Erratic fire behavior is making line construction difficult, and the fire is expected to double in size.

KLICKITAT COMPLEX, Yakima BIA. A Type I Incident Management Team (Meuchel) is committed. Three fires, including Yedlick are grouped into this complex. All three blew out of control yesterday, losing all the line that was built.

MENDENHALL COMPLEX, Siskiyou NF. A Type I Incident Management Team (Eddy) is committed. Crews continue to make good progress and are planning a large burnout operation over the next few days. The MADSTONE fire has been included into this complex.

FOSSIL BEDS, Prineville District, BLM. This fire is located adjacent to the John Day Fossil Beds. The fire blew up and Camp Hancock was evacuated. Structure protection is the priority. Of the 2,000 acres, 160 are BLM.

X HIGHLANDS COMPLEX, Washington State. A State Team (Messinbrink) is committed. The fire is located 18 miles from Republic, WA., and was started by children playing with matches.

X MURRAY COMPLEX, Washington State. A State Team (Flanigan) is committed. This complex consists of 6 fires located near Ellensburg, WA.

BALDY COMPLEX, Wallowa-Whitman NF. A Type II Incident Management Team (Phenix) is committed. The fire is burning in the North Fork of the John Day Wilderness about 5 miles southwest of Anthony Lakes Ski Area.

X OLSON COMPLEX, Colville NF. A Type II Incident Management Team (Ridlington) is committed. The complex located 25 miles east of Colville has delayed the containment target due to heavy, dry fuels and winds.

X BRAKEN POINT, Umatilla NF. A Type II Incident Management Team (Andrade) is committed. The fire escaped control lines to the north and east and is endangering critical Salmon habitat. The fire is burning on the Washington State portion of the forest in grass and into timbered canyons.

LITTLE FERRY CANYON, Prineville District, BLM. Line has held and burnout operations are complete. Still having problems with the winds and a threat still exists to some out-buildings and ranch houses.

Eastern Great Basin Area Large Fires:

X IDAHO CITY COMPLEX, Boise NF. A Type II Incident Management Team (Butler) is committed. Complex includes multiple ignitions of various sizes including the 1,000 acre Bannack fire. Fires are located in inaccessible backcountry and are moving away from Idaho City.

ELEVATOR CANYON, Burley District, BLM. A Type II Incident Management Team (Martin) is committed. This fire is located 6 miles south of Malad, ID, in an inaccessible area burning in bug killed Douglas Fir. During the night (7/27), crews were forced to withdraw from the fireline due to very active, extreme fire behavior.

CAVE CANYON, Cedar City District, BLM. Afternoon thunderstorms caused control problems. Current threats are to mining structures.

RUBY, Payette NF. A Type I Incident Management Team (Johnson) is committed. A major burnout operation is planned for today. Control lines are almost complete, although some flare-ups continue inside the burn area from rolling debris. Safety concerns are working in the steep rocky terrain and the extreme temperatures.

HAWLEY, Burley District, BLM. Crews protected private fields and structures during the night. No problems anticipated.

ANTELOPE, Richfield District, BLM. The fire made a significant run of 7,000 acres with flame lengths of up to 15 feet as erratic winds of 40 mph pushed the fire across containment lines. Expect similar fire behavior today.

UTS = Utah State

Northern Rockies Area Large Fires:

NIRADA 1, Flathead Agency, BIA. A Type II Incident Management Team (Spradlin) is committed. During the initial run, 3 outbuildings were destroyed.

HENRY PEAK, Montana State, Northwestern Land Office. A Type II Incident Management Team (Suenram) is committed. One home has been destroyed and several more continue to be threatened. The fire has now burned onto the Salish and Kootenai Tribes land. The fire blew-up yesterday resulting in lost line and having to pull crews from the line. The fire is moving toward the community of Camas Prairie; although the town is still quite a distance, it has been evacuated.

North Zone - California Large Fires:

DILLON COMPLEX, Klamath NF. A Type I Incident Management Team (Lee) is committed. Several of the fires have combined. Potential fire size could increase from the estimated 16,000 acres to a total of 65,000 acres. Cultural resources are threatened and work is being coordinated closely with local native Americans to mitigate the concerns of the suppression efforts.

Outlook: A RED FLAG WATCH has been posted for dry thunderstorms over the west central Idaho mountains and southeast Oregon. A RED FLAG WARNING for southeastern Montana and a RED FLAG WATCH for western Montana has been posted for dry thunderstorms. A RED FLAG WARNING has been posted for strong westerly winds over the east slopes of the Oregon Cascades. A RED FLAG WARNING has been posted for westerly winds gusting 25 to 30 mph over portions of eastern Washington this afternoon and tonight. The high pressure ridge over the desert Southwest continues to control the weather over the Intermountain, central Rockies and desert Southwest. Scattered wet thunderstorms are forecast over Arizona, New Mexico and portions of Nevada. Isolated to widely scattered thunderstorms, both wet and dry are expected over Utah, Idaho, Oregon, Wyoming, Colorado and Montana. A few thunderstorms will also develop over the Sierras. Later today some cooler air is expected to move into Washington and Oregon. Large fire activity will continue and initial attack activity will increase as no relief in the weather is evident. Resources are critically low, and no relief is in sight for the next few days.

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JULY 30, 1994 - 0700 MDT
NATIONAL PREPAREDNESS LEVEL V

Current Situation: The fire situation continues to deteriorate as hot, dry and windy weather conditions prevail. Resource availability for helicopters, airtankers, crews, smokejumpers, and most overhead positions are in very short supply.

Training of one batalion of Marines from Camp Pendleton will begin today.

Airtanker 04, a P2V, crashed yesterday afternoon on the Butler Creek fire outside of Missoula, Montana. No other information is available at this time.

Northwest Area Large Fires:

TYEE COMPLEX, Wenatchee NF. A Type I Incident Management Team (Wands) is committed. The fire made major runs towards the city of Chelan yesterday. The projected incident size is now 110,000 to 120,000 acres. A Type II Incident Management Team (Murphy) has been committed to manage the northeast portion of the fire. The South Shore road to Pat and Mike's store, Highway 97 from the Wenatchee Industrial area to Chelan and the Entiat Valley road at the highway junction are still closed.

HATCHERY COMPLEX, Wenatchee NF. A Type I Incident Management Team (Porter) is committed. Highway 2 is closed as the fire is now burning on both sides of the canyon and has the potential to cross Highway 207 at Coles Corner, the fire is about one mile from the highway. Coles corner has been evacuated. The ROUND MOUNTAIN fire is threatening structures on the south side of Lake Wenatchee. A Type I Incident Management Team (Richer) has been ordered for the ROUND MOUNTAIN fire. Contingency plans have been developed for structure protection for the city of Leavenworth and communities in the general area. Both the Leavenworth and Lake Wentachee Districts have issued closures for all forest visitors.

OKANOGAN COMPLEX, Okanogan NF. A Type I Incident Management Team (Monahan) and a Type II Incident Management Team (Burdick) are committed. The POORMAN and BURNT SAW fires have been contained, but no other containment times have been given on any of the other fires in the complex.

BUTLER COMPLEX, Washington State. A State Team (Shults) is committed. All the fires in the complex are controlled except the CDY Lakebed fire.

KLICKITAT COMPLEX, Yakima Agency, BIA. A Type I Incident Management Team (Meuchel) is committed. Intense burning conditions continued.

LAKEBEDS, Yakima Agency, BIA. A Type II Incident Management Team (Lukens) is committed. The fire perimeters continued to burn very actively against the wind on the south and west plank. The Goldendale Municipal Watershed and private dwellings are now within two miles of the fire.

MENDENHALL COMPLEX, Siskiyou NF. A Type I Incident Management Team (Eddy) is committed. Crews continue to make good progress.

BALDY COMPLEX, Wallowa-Whitman NF. A Type II Incident Management Team (Phenix) is committed. The fire is burning in the North Fork of the John Day Wilderness about 5 miles southwest of Anthony Lakes Ski Area. Approximately 2/3 of the fire is within the wilderness.

GRASSHOPPER, Mt. Hood NF. This fire is located 15 miles northwest of Maupin, OR.

DESERT RIDGE, Crater Lakes NP. The fire is burning in Northern Spotted Owl habitat in a very inaccessible area.

FOSSIL BEDS, Prineville District, BLM. The fire blew up and Camp Hitchcock was evacuated. Priority is structure protection.

POTLATCH, Oregon State. This fire is located 5 miles south of Spray, OR.

OLSON COMPLEX, Colville NF. A Type II Incident Management Team (Ridlington) is committed. Winds and heavy, dry fuels are causing suppression problems, resulting in the containment target being delayed.

LITTLE FERRY CANYON, Prineville District, BLM. This fire is located 20 miles southeast of Wasco, OR on the John Day River. Control lines are holding.

Eastern Great Basin Area Large Fires:

ELEVATOR CANYON, Burley District, BLM. A Type II Incident Management Team (Martin) is committed. The fire is burning downslope in Aspen with bug killed conifers upslope on the other side. Threat of extreme fire behavior exists if it reaches the conifers.

IDAHO CITY COMPLEX, Boise NF. A Type II Incident Management Team (Butler) is committed. A Type I Incident Management Team (Leibersbach) has been ordered. Intense burning and gusty winds are causing control problems. Fire increased 1,500 acres in two hours.

RUBY, Payette NF. A Type I Incident Management Team (Johnson) is committed. The planned burnout did not occur due to expected extreme weather conditions. A sloopover hindered containment efforts. Safety concerns include burning snags, steep slopes and hot temperatures.

ANTELOPE, Richfield District, BLM. The fire made a significant run of 7,000 acres with flame lengths of up to 15 feet as erratic winds of 40 mph pushed the fire across containment lines. Expect similar fire behavior today.

Northern Rockies Area Large Fires:

HENRY PEAK, Northwestern Land Office, Montana State. A Type II Incident Management Team (Suenram) is committed. Two homes were successfully protected with no additional homes lost. Dry lightning and erratic winds hampered suppression efforts. The fire is supporting local initial attack with air resources.

ELK RIVER COMPLEX, Idaho State. A Type II Incident Management Team (Cowan) is committed. This complex consists of 26+ lightning caused fires. Current threat is to high valued commercial, state and private timber units. The largest fire is burning in felled and bucked timber. Control problems are multiple un-staffed fires, limited access, and a shortage of resources.

North Zone - California Large Fires:

DILLON COMPLEX, Klamath NF. A Type I Incident Management Team (Lee) is committed. Contingency firelines are nearly complete. Any large scale backburning is still several days away. Fire runs have decreased due to higher humidity and lower winds. Closures have been issued for all public use of rivers and Forest Service roads in the immediate area. This includes mining operations, recreational and commercial activities.

Outlook: A RED FLAG WARNING has been posted for northern Idaho and western Montana for increasing westerly winds. A RED FLAG WARNING has been posted for southern Montana for hot temperatures, low relative humidity and dry lightning. A strong upper ridge of high pressure will remain over most of the western U.S., with the exception of western Washington and western Oregon where an upper trough will edge closer to the coast. This marine air will cause gusty winds over the east slopes of the Cascades. A mixture of wet and dry thunderstorms will cover eastern Nevada, Utah, Colorado, Wyoming and Idaho. Southern Montana will have generally dry thunderstorms. Expect continued activity on large fires and initial attack activity to increase. Resource shortages continue to be critical and are not expected to improve within the next few days.

INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY, JULY 31, 1994 - 0700 MDT
NATIONAL PREPAREDNESS LEVEL V

Current Situation: Higher humidity and lower temperatures aided suppression efforts on several fires in the Northern Rockies and Eastern Great Basin Areas. The Northwest Area fires continued to burn actively, resulting in more evacuations and homes destroyed. Helicopters, airtankers, crews, smokejumpers, and most overhead positions continue to be in short supply.

Training of one ~~batalion~~ batalion of Marines from Camp Pendleton began yesterday and another one will start training today. The 1st batalion will arrive in Wenatchee late today. The Military has been tasked for two additional batalions; 1 for the Idaho City Complex and 1 for the Squaw Peak fire in the Ninemile Complex. The last 2 batalions will come from Fort Hood, Texas. The Military has also been tasked for a Helicopter Unit for the Idaho City Complex.

Northwest Area Large Fires:

TYEE COMPLEX, Wenatchee NF. A Type I Incident Management Team (Wands) is committed. The fire has reached First Creek and South Shore Road above Lakeside and is about 600 yards from Highway 97. It has spread across Knapp Coulee Road to Chelan Butte and has reached the Columbia River in places. Extensive backburning is taking place along the south side of Chelan Butte. Evacuations of 25 Mile Creek to Lakeside, Navarre Coulee and Knapp Coulee are still in effect, and Chelan Butte is on alert. Another 6 homes were destroyed yesterday. Numerous road closures remain in effect.

HATCHERY COMPLEX, Wenatchee NF. Two Type I Incident Management Teams (Porter & Richer) are committed. A major blow-out occurred on the Rat fire at approximately 2200 last night and burned intensely; torching, crowning and spotting into early this morning. Evacuations are ongoing in the outlying areas between Leavenworth and Cashmere. A major powerline that feeds Seattle is also currently threatened. Both Blewett Pass and Stevens Pass are closed as well as several other roads closures in the area. The fire has damaged the water treatment plant in Leavenworth and residents have been advised to boil their water.

OKANOGAN COMPLEX, Okanogan NF. A Type I Incident Management Team (Monahan) and two Type II Incident Management Teams (Burdick & Johnson) are committed. The west Chewuch road has been closed due to Thunder Mountain fire spotting ahead of the main fire. The northeast portion of the Pasayten Wilderness is also closed to entry. Fires in the War Creek area reported no significant growth yesterday.

KLICKITAT COMPLEX, Yakima Agency, BIA. A Type I Incident Management Team (Meuchel) is committed. This complex is comprised of 3 large fires: McCreedy, Yedlick and Huckleberry and 12 small spot fires which crews continue to mop-up. Access to the Huckleberry was a problem so a foot bridge was constructed over the Klickitat River.

LAKEBEDS, Yakima Agency, BIA. A Type II Incident Management Team (Lukens) is committed. The fire continued to burn actively due to winds. The Goldendale Municipal Watershed and private dwellings are within two miles of the fire. The southern branch of the main fire is being staffed by the Butler Complex with base camp in Goldendale.

MENDENHALL COMPLEX, Siskiyou NF. A Type I Incident Management Team (Eddy) is committed. Burnout operations that were planned were not completed yesterday due to unfavorable winds. All line is built, but not calling the fire contained due to uncertainty of lines holding. Interior islands are burning hot.

OLSON COMPLEX, Colville NF. A Type II Incident Management Team (Ridlington) is committed. Increased winds yesterday coupled with heavy fuels have delayed control targets. Two new starts were included in the complex yesterday. Spots continue to be located beyond the control lines.

Eastern Great Basin Area Large Fires:

ELEVATOR CANYON, Burley District, BLM. A Type II Incident Management Team (Martin) is committed. The fire threatens the communities of Samaria and Portage.

IDAHO CITY COMPLEX, Boise NF. A Type II Incident Management Team (Butler) is committed, they are transitioning to a Type I Incident Management Team (Leibersbach). Favorable weather allowed direct attack and crews and dozers made significant progress on line construction.

DUTCH JOE, Bridger-Teton NF. A Type II Incident Management Team (McAtee) is committed. The fire is threatening Big Sandy Lodge and 17 summer homes. The Big Sandy road has been closed to control access of recreationists to the northwest of the fire.

RUBY, Payette NF. A Type I Incident Management Team (Johnson) is committed. Line construction has been completed, although the potential still exists for rolling material to cross the line. Demobilization will begin today.

CAVE CANYON, Cedar City District, BLM. Afternoon thunderstorms caused control problems on the fire yesterday. Current threat is to mining structures.

SPRING CANYON, Salt Lake District, BLM. Rain and helicopter work allowed firefighters to make good progress on the fire yesterday.

Northern Rockies Area Large Fires:

NINEMILE COMPLEX, Lolo NF. A Type II Incident Management Team (Bennett) is committed. The complex is comprised of the Squaw Peak, Rock Creek, Butler and West Six Mile fires. The Squaw Creek fire was caused by the airtanker that crashed yesterday while enroute to the Butler fire. Cooler temperatures, higher humidities and diminished winds helped to keep fires from spreading yesterday.

HENRY PEAK, Northwestern Land Office, Montana State. A Type II Incident Management Team (Suenram) is committed. Increase in acreage was due to better mapping. Higher humidities and lower temperatures aided crews in suppression efforts, allowing them to make good progress on line construction.

ELK RIVER COMPLEX, Idaho State. A Type II Incident Management Team (Cowan) is committed. This complex consists of 34 lightning caused fires. Current threat is to high valued commercial, state and private timber units. The largest fire is burning in felled and bucked timber. Approximately 70% of the fires within the complex are staffed. Good cloud cover and showers helped with suppression efforts.

BLACK MOUNTAIN, Montana State. A Type II Incident Management Team (Bullis) is committed. Fire is threatening high value timber. There is heavy concentration of decked slash within the fireline.

North Zone - California Large Fires:

DILLON COMPLEX, Klamath NF. A Type I Incident Management Team (Lee) is committed. A modified containment action has been recommended for the eastern edge of the fire where natural barriers will hinder fire spread with containment reinforced by aircraft. This strategy is consistent with and complimentary to the cultural resource concerns of the area. The high humidity and low winds have decreased fire activity.

Outlook: Strong high pressure aloft will remain over the western states. This high will keep low pressure from entering the Pacific Northwest. Winds around the high pressure will circulate moist and unstable air from the desert southwest into the Great Basin and Rockies. There will be a mixture of wet and dry thunderstorms in the Great Basin and Northern Rockies. Less wind is forecast for the east slope of the Cascades in Washington as pressure gradients relax. Marine air in western Washington and western Oregon will burn off early in the day. Fire activity will continue; however, it should not be as active as the last few days as no red flags are forecast. Competition for resources will continue. The deployment of military resources will alleviate some of the crew demands.
