INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JULY 10, 1995 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL II

```
*** SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME ***
```

Current Situation: Thunderstorm activity continued over much of the West, increasing initial attack and large fire activity. Two Type II helicopters, 1 airtanker, 1 infrared aircraft, 2 showers, 1 caterer, 1 radio system and miscellaneous overhead were mobilized to the Southwest Area. One airtanker and a load of smokejumpers were mobilized to the Western Great Basin. Large fire activity continued in Canada with 23,951 additional acres burned.

Southwest Area Large Fires:
RIO, Arizona State. A Type II Incident Management Team (Whitney) is assigned. Burnout operations proved to be very effective. Retardant was effective in containing approximately 2 miles of the perimeter.

BASIN/HORSESHOE COMPLEX, Tonto NF. The Basin and Horseshoe fires burned together yesterday afternoon. The fire burned between 2,000 and 3,000 acres in one hour. Burnout operations were successful. Current threats are to an historic cabin and livestock.

BAGDAD, Arizona State. The fire started yesterday approximately 40 miles west of Prescott near the town of Bagdad. The fire destroyed two homes and and two other structures sustained major damage. Thirty additional homes are currently threatened.

BURDETTE, San Carlos Agency, BIA. A Type II Incident Management Team (Moore) has been ordered. The fire is burning in grass and scrub oak.

LOST TANK, Truxton Canyon Agency BIA. A Type II Incident Management Team (Anderson) is assigned. Native American Cultural Sites and a class I air-shed remain threatened. Thunderstorms in the area started two new fires to the south and east of the incident. Limited fire activity yesterday allowed good progress towards containment. Small flare-ups along the south and north flanks were successfully suppressed by helicopter bucket drops.

SENATOR II COMPLEX, Phoenix District, BLM. A Type II Incident Management Team (Bedlion) is assigned. The Complex consists of the Senator (3, 400 acres), Temple (500 acres) and Nutt (700 acres) fires. Burnout operations were completed within the existing black line. Good progress toward containment was made. The Senator fire is controlled. The Temple fire continues to threaten structures and the Lake Mead National Recreation Area. The Nutt fire is burning in the Mount Nutt Wilderness.

MTN. SHEEP, Arizona Strip District, BLM. The fire started yesterday afternoon and was initial attacked by a helicopter, a single engine airtanker and two engines. A wind shift last night caused the fire to burn through the retardant lines resulting in the loss of all the line constructed. Current threats are to Desert Bighorn Sheep habitat, wilderness and scenic values.

Eastern Great Basin Large Fires:
MILFORD PASS, Cedar City District, BLM. Light flashy fuels and strong winds are causing control problems.

PINNACLE PEAK, Cedar City District, BLM. Aggressive initial attack utilizing airtankers held the fire to a fairly small size.

Western Great Basin Large Fires:
CROWLEY, Winnemucca District, BLM. The fire was driven in cheat grass and sage by erratic winds. Cooler temperatures and higher humidities have assisted crews with suppression efforts. Current threats are to a grazing allotment and the endangered Lahontan Cutthroat Trout.

South Zone California Large Fires:
INCIDENT |UNIT|ST| SIZE| \% | EST |TOTAL|CRW|ENG|HELI|STRUC|EST |EST

Outlook: Strong high pressure aloft will be centered over the southern Rockies and southern Plains while an upper trough edges onto the Pacific Northwest Coast. By late afternoon a cold front will extend from eastern Montana across southeast Idaho and into Nevada. Scattered showers and thundershowers will extend from Washington and Oregon into Idaho and Montana. South of the front, widely scattered thunderstorms are forecast for Nevada, Utah, Colorado, Arizona and New Mexico. Isolated showers and thundershowers are possible in northwest California. Most of the interior West will have highs in the 80's and 90's. The exceptions are Washington and Oregon which will have temperatures up to 70 degrees. The Southwest deserts will be up to 110 degrees. Initial attack activity is expected to continue throughout the western U.S. Large fire activity is expected to continue in the Southwest Area, Nevada, Utah, and southern California.

## NEW FIRE WEATHER DEFINITIONS

To avoid the overuse of RED FLAG terminology, the National Weather Service has replaced Red Flag watch with FIRE WEATHER WATCH.

FIRE WEATHER WATCH: A POSSIBLE critical fire weather pattern.
RED FLAG WARNING: An ONGOING or IMMINENT critical fire weather pattern.
