```
*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT ***
```

Current Situation: The western U.S. continued to experience initial attack activity. Large fire activity has moderated and several fires have met containment targets. Increased fire activity has occurred in Florida. Resource mobilization through NICC remained low. Large fire activity continued in Canada with 420,850 additional acres burned.

## Southwest Area Large Fires:

UNION, Phoneix District, BLM. A BLM RAWS station and two utility trailers are threatened. Thunderstorms in the Prescott area grounded the five air tankers responding to this incident. The fire was still active at 1900.

REED, Arizona State. The fire received some rain which aided with the mop up. The fire has been declared contained.

BURDETTE, San Carlos Agency, BIA. A Type II Incident Management Team (Moore) is assigned. Significant increase in acreage primarily due to late afternoon/evening fire activity and remapping.

BASIN/HORSESHOE COMPLEX, Tonto NF. A Type II Incident Management Team (Whitney) is committed. The southern perimeter was very active yesterday. Some progress was made with continuous support from air tankers.

Outlook: A FIRE WEATHER WATCH remains in effect for southern Nevada due to strong winds. A strong upper level low pressure system will rapidly move across Idaho and into north central Montana. This will push cooler and more stable air into the Pacific Northwest and California. Montana and Wyoming will continue to see an unstable atmosphere along with a threat of strong thunderstorms. The rest of the West will see isolated thunderstorms, except portions of Idaho and western Montana where a few showers can be expected. As the storm system moves across Idaho it will pull a cold front across Nevada causing gusty winds to develop. Temperatures will range from the upper 50's and 60's across the mountains of the Pacific Northwest to the 70's and 80's across the northern portion of the west. Mountains in the southern portion of the West will see highs in the 70's. The southern valleys and deserts will see highs in the $90^{\prime}$ s to 100. Large fire activity is expected to continue in the southern portion of the West, with initial attack activity continuing throughout the West. Hot and dry conditions in Florida and the New England states could bring increased activity.
