

INCIDENT MANAGEMENT SITUATION REPORT  
 MONDAY, JULY 17, 1995 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL II

\*\*\* THE TEN STANDARD FIRE ORDERS ARE FIRM \*\*\*  
 \*\*\* WE DON'T BREAK THEM; WE DON'T BEND THEM \*\*\*

Current Situation: Moderate fire activity continued throughout the western U.S. over the weekend. California State and the Eastern Great Basin experienced increased large fire activity.

California Large Fires:

SYCAMORE, San Diego Ranger Unit, California State. The fire is threatening structures on the northern side. The fire is burning through retardant lines.

PEORIA, Tuolumne-Calaveras Ranger Unit, California State. Rural structures are threatened.

Outlook: High pressure aloft will build over the Great Basin and Pacific Northwest. This will result in very warm and drier weather from Washington and Oregon into Idaho and Montana. An upper low near the southern California coast will spread monsoon moisture from the southwest deserts northward into the Sierras. Isolated to widely scattered dry thunderstorms are forecast from the central and northern Sierras into the southern Cascades and northern Utah. Scattered wet thunderstorms are forecast across much of the southern California mountains, Arizona, New Mexico, southern Utah and Colorado. Most of the interior West will have highs in the 80s and 90s. Temperatures of over 100 degrees are expected from the western valleys of Oregon to the desert Southwest. The potential for increased initial attack activity exists in areas where dry lightning is forecast.
