

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY, AUGUST 5, 1995 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT ***

Current Situation: Dry lightning storms over the Eastern Great Basin Area significantly increased initial attack activity. Resource mobilization through NICC remained low. Some demobilization is occurring. Numerous units in the Southwest, Great Basin, Rocky Mountain and California are reporting very high and extreme fire indices. A few units in the Northwest are reporting very high indices.

Southwest Area Large Fires:

MATTHES, Grand Canyon NP. A Type II Incident Management Team (Anderson) is committed. The fire is posing a threat to active Goshawk nesting sites.

North Zone California Large Fires:

PONY, Klamath NF. A Type II Incident Management Team (Gilpin) is committed. Indirect line construction began in preparation for burnout operations over the weekend. The fire is expected to double in size with the indirect suppression efforts planned.

OUTLOOK: Hot weather conditions will prevail due to an upper level ridge centered over Arizona. Isolated to widely scattered afternoon thunderstorms are forecast for the southern Oregon Cascade and California Sierra Nevada ranges. Thunderstorms are also expected in the Great Basin and along the Continental Divide. Cooler marine air will move inland to the Washington Cascades, north Oregon coast and lower Willamette valley. Highs will be in the 80's and 90's over much of the West, with the desert Southwest continuing to experience highs ranging from 105 to 120 degrees. The potential remains for increased initial attack activity with forecasted thunderstorms.
