## INCIDENT MANAGEMENT SITUATION REPORT SUNDAY, AUGUST 6, 1995 - 0900 MDT NATIONAL PREPAREDNESS LEVEL III

\*\*\* SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME \*\*\*

Current Situation: Initial attack activity remained at a moderate pace, with a few large fires reported. Mobilization of resources through NICC remained minimal. Numerous units in the Southwest, Great Basin, Rocky Mountain and California continue to report very high and extreme fire

indices. Several units in the Northwest are reporting very high indices.

Southwest Area Large Fires:

MATTHES, Grand Canyon NP. A Type II Incident Management Team (Anderson) is committed. The fire is posing a threat to active Goshawk nesting sites.

North Zone California Large Fires:

PONY, Klamath NF. A Type II Incident Management Team (Gilpin) is committed. Fire growth was to the south and southwest. There are some hot spots with scattered heat throughout the rest of the fire. The fire is burning in lands designated as Late - Successional Reserve. This area provides important habitat for threatened and endangered wildlife and fish species.

## South Zone California Large Fires:

ROUSE, San Bernadino NF. The fire is burning in heavy brush on the north side of Lake Arrowhead, next to the 1994 Devil fire. Structures at the Squints Ranch were threatened for a time.

VERBENIA, Riverside Ranger Unit, California State. A State Incident Management Team (Benson) is committed. There was minimal fire spread at the head of the fire. Evacuated residents were allowed to return to their homes. The majority of work left is now limited to handcrews.

OUTLOOK: A RED FLAG WARNING WAS POSTED LAST NIGHT FOR THE EAST CASCADES IN WASHINGTON FOR GUSTY WINDS TO 35 MPH. The main feature of interest will be the development of an upper level low pressure trough off the Pacific Northwest coast today. Temperatures will begin to cool and humidities will rise, with a cold front pushing across Washington, Oregon and northern Idaho. A stronger system is poised to push into the Northwest Monday. Isolated mountain thundershowers are also possible ahead of and along with this front. Elsewhere, hot and mostly dry conditions will persist. Isolated afternoon and evening mountain thundershowers are expected again across the Great Basin, Rocky Mountain states and the Southwest. Initial attack activity is expected to remain moderate.
