INCIDENT MANAGEMENT SITUATION REPORT TUESDAY, AUGUST 15, 1995 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

*** SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME ***

Current Situation: Moderate initial attack activity continued throughout the West. Due to concerns from the weather pattern and large fire activity, the Eastern Area Type I Incident Management Team will be staged in Grand Rapids, Minnesota.

Eastern Area Large Fires:

SAG CORRIDOR, Superior NF. A Type II Incident Management Team (Tarbell) is committed. The fire is being managed under Unified Command with the Province of Ontario, with suppression forces being shared across the border as needed. High winds caused the fire to escape through an unsecured perimeter on the northwest flank, burning about 300 acres in Minnesota before jumping the Granite River and burning into Canada. Crews were pulled off the north flank of the fire due to safety concerns. Most of the additional acreage burned yesterday was in Ontario. A Canadian Incident Management Team will take over the Canadian side of the fire today.

SAG CORRIDOR	SUF MN	8,088	40	8/15	322	19	2	3		UNK	854K	ĺ

North Zone California Large Fires:

HELESTER, Tahoe NF. A Type II Incident Management Team (Cones) is committed. Crews completed the line on the west flank and established an anchor along the river for the east flank. Cooling and holding of other divisions will continue as increased up-canyon winds are predicted for this evening. Increased acreage is due to remapping.

OUTLOOK: **** A FIRE WEATHER WATCH IS POSTED FOR THE WESTERN HALF OF UTAH DUE TO VERY WARM TEMPERATURES, LOW HUMIDITIES AND SOUTH WINDS 15-30 MPH ****
An upper level low pressure system will move onto the Pacific Northwest coast today, with weak high pressure across the remainder of the West. Monsoon moisture will continue over Arizona and New Mexico, with scattered wet thunderstorms over Arizona, New Mexico and southeast Colorado. Isolated thunderstorms will develop over eastern Oregon, and also in an area through southeast Wyoming to the southeast portion of Utah. High temperatures will range from the upper 70's to mid 90's for the Great Basin and the Rockies. The northern valleys of California to the desert Southwest will have highs from 95

to 112 degrees. Northern Minnesota will be under a high pressure system with partly sunny skies and highs near 80 degrees. Winds will be 12-18 MPH with gusts up to 25 MPH. Moderate fire activity is expected, with the potential for increased activity in western Utah and northern Minnesota.
