INCIDENT MANAGEMENT SITUATION REPORT FRIDAY, AUGUST 25, 1995 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

*** THE TEN STANDARD FIRE ORDERS ARE FIRM ***

*** WE DON'T BREAK THEM; WE DON'T BEND THEM ***

Current Situation: Moderate fire activity continued throughout the West. Fire activity increased in the Eastern Area necessitating the mobilization of a Type I Incident Management Team. Large fire activity continued in Canada, with 171,383 acres burned yesterday. Five additional Type I Crews are being mobilized to Canada today.

Eastern Area Large Fires:

ROCKY POINT COMPLEX, New York State. A Type I Incident Management Team (Dubois) is on order. The complex is burning on Long Island in heavy grass, brush and pine in an urban interface area. The most active fire at this time is the Riverhead fire at 5,000 acres, which is threatening rural subdivisions with 150 residences and 2 nursing homes evacuated. A fire engine was burned over on the Rocky Point fire Wednesday, one serious injury and three minor injuries were reported.

OUTLOOK: A ridge of high pressure aloft will extend from the Gulf of California northeastward to the central plains. A trough of low pressure aloft just west of Washington state is causing a dry westerly flow over the northern half of the West. Much drier air has moved into the Great Basin pushing the monsoon moisture to the east and south. Monsoon moisture with high relative humidity and wet thundershowers will continue over the central and southern Rocky Mountains. High temperatures will be in the 70's along the Pacific coast and in the 90's to 115 degrees in the desert Southwest and the central valley of California. The remainder of the West will be in the 80's and 90's. Northern Minnesota will be mostly cloudy with a chance of showers and thundershowers. High temperatures will be in the 70's, with southeast winds at 10-20 MPH. The northeastern U.S. will be sunny with highs in the 70's and low 80's. Winds will be northwest at 10-20 MPH. Fire activity is expected to remain moderate in the West with the potential for increasing activity in the Eastern Area.
