OUTLOOK: \*\*\* A FIRE WEATHER WATCH IS POSTED FOR SOUTH CENTRAL OREGON FOR SOUTH WINDS 10-20 MPH WITH GUSTS TO 35 MPH AND LOW HUMIDITY. \*\*\* An upper level low pressure system continues to spin off of the northern California/Oregon coast. Very warm and dry air remains east of the Cascades into western Idaho and Montana. Scattered mostly wet thunderstorms are expected over the southeast Great Basin, with isolated dry lightning forecast in southeast Idaho and southwest Wyoming. Southern California, Arizona, Colorado and Wyoming will have widely scattered mainly wet thunderstorms. High temperatures will range from the upper 60's along the Pacific Northwest coast, 90 to 112 degrees in the Southwest deserts and 80's and 90's for the remainder of the West. High pressure will bring dry and cooler weather to the Northeastern U.S. High temperatures will range from 75-80 degrees with north winds at 10 MPH. The potential for increased activity exists nationwide due to the human caused risk associated with the beginning of the holiday weekend.
