## INCIDENT MANAGEMENT SITUATION REPORT SUNDAY, SEPTEMBER 24, 1995 - 0900 MDT NATIONAL PREPAREDNESS LEVEL II <br> *** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT ***

Current Situation: Minor initial attack activity was reported across the western U.S. yesterday. Alaska has mobilized a Type I Incident Management Team (Leibersbach) to Fort Richardson Emergency Operations Center in response to flooding in Anchorage, Seward and the Matanuska Valley. The flooding was caused by heavy rains from Tropical Storm Oscar.

Hurricane Marilyn Support:
A Type I Incident Management Team (O'Bannon) is managing a receiving and distribution center on St. Thomas. Major emphasis has shifted from operating as a direct distribution operation to an intermediate center providing coordinated supply to smaller local area distribution centers.

A Type II Incident Management Team (Kearney) is managing a receiving and distribution center on St. Croix. Most incoming supplies are arriving via military aircraft, inventoried, then trucked to a USDA warehouse for further sorting and delivery to distribution centers. Living conditions continue to improve on the island. Large generators have arrived to provide power to essential services until the regular service is restored.

A State Incident Management Team (Hendriks) is managing a receiving and distribution center at Roosevelt Roads Naval Air Station in Puerto Rico. Their mission is to coordinate the inventory, break-down and reconfiguration of supplies for shipment in smaller aircraft. Large supply items such as lumber, portable latrines, vans and trucks are being delivered by military aircraft or barge. Due to the massive amount of equipment and supplies arriving in Puerto Rico, an airport staging team has been formed to provide ramp logistics services.

A NPS All Risk Management Team (Wissinger) continues to asses damages and prioritize needs for generators and services for Park facilities on St. Croix and St. John.

OUTLOOK:
A cool and dry Canadian air mass will move over the Central Rocky Mountains today. A broad area of low pressure will extend from the Pacific Northwest coast to the desert Southwest. Monsoon moisture will be confined to Arizona and New Mexico, where widely scattered thunderstorms are expected. High temperatures will only reach the 40 's to the low 60's in the Rocky Mountains. The Great Basin will have temperatures in the 70's. The Pacific Northwest will see some morning low clouds and cooler weather with highs in the 60's and 70's. Seasonably hot weather will extend from the Northern California valleys to the desert Southwest where highs will range from the 80 's to near 115 degrees. The Northeast will be mostly sunny and cool with light northeast winds. Highs will be in the 50's and 60's. Fire activity is expected to remain moderate in most areas.
