```
INCIDENT MANAGEMENT SITUATION REPORT
    FRIDAY, OCTOBER 6, 1995 - 0530 MDT
        NATIONAL PREPAREDNESS LEVEL II
```

Current Situation: Initial attack and large fire activity was concentrated in California. The remainder of the U.S. continued to experience minimal fire activity. Miscellaneous overhead and communications equipment continued to be mobilized to the Southern Area in support of Hurricane Opal.

North Zone California Large Fires:
MT. VISION, Marin County, California State. A State Type I Incident Management Team (Tarp) is assigned. Approximately 47 structures have been confirmed lost at Paradise Estates. National Park Service lands involved are approximately $90 \%$ of the total acreage. Morning winds, low humidities, heavy timber and very heavy fuel loadings are hampering control efforts. The fire continues to threaten numerous structures, Point Reyes National Seashore, old growth timber and watershed along coastal creeks. An onshore flow was expected last night which should aid control efforts today.

GUNTLEY, Mendocino Ranger Unit, California State. A State Type I Incident Management Team (Holmes) is assigned. This arson caused fire is burning in steep, rugged terrain approximately 4 miles north of Ukiah. Low humidities and gusty northeast winds contributed to rapid spread, threatening subdivisions at the base of Cow Mountain. Additional air support has been ordered.
DRY, Lake Napa Ranger Unit, California State. Steep terrain and poor access are causing control problems. Suppression efficiency should improve with more favorable weather conditions predicted.

Hurricane Opal Support:
A Type I Incident Management Team (O'Bannon) has been mobilized to Montgomery, Alabama to support FEMA in establishing and operating a receiving and distribution center.

A Type II Incident Management Team (Kearney) has been mobilized to Crestview, Florida to support FEMA in establishing and operating a receiving and distribution center.

Hurricane Marilyn Support:
A NPS All Risk Management Team (Panko) is assisting in the repair of Park facilities and housing.

Southcentral Alaska Flood Response:
A Type I Incident Management Team (Liebersbach) in Anchorage, a Type II Incident Management Team (Wilcock) in Soldotna and a Type II Incident Management Team (Dube) in Seward are assigned to the State of Alaska to assist in damage assessment and relief activities. The Type I Team will begin
transitioning duties to the State Emergency Coordination Center. Disaster Assistance Centers are processing applications for assistance at several of the affected sites.

OUTLOOK: High pressure will move across the Rockies while a cool upper trough pushes through the Pacific Northwest. Washington and northern Oregon will have scattered showers while the remainder of the West stays mostly dry. High temperatures will be in the 50's across the Northern Rockies, the 60's to mid 70's along the Pacific coast and Great Basin, and the upper 80's to near 100 from central California valleys to the desert Southwest. Moderate fire activity is expected to continue in California.
