# INCIDENT MANAGEMENT SITUATION REPORT FRIDAY, APRIL 12, 1996 - 1000 MST NATIONAL PREPAREDNESS LEVEL I 

CURRENT SITUATION: Fire activity increased the last couple of days in the Southern and Southwest Areas. Resource mobilization through NICC has been minimal.

Southern Area Large Fires:
KUDZU, Mississippi National Forests. A Type II Incident Management Team (Kearney) is assigned. Control problems are windy conditions and poor relative humidity recovery. The fire has $11 / 2$ miles of open line on the west side.

OUTLOOK: A surface cold front over north Texas will move slowly eastward into Georgia on Monday. Very breezy south to southwest winds will be ahead of the front with scattered showers and some severe thunderstorms. A gusty windshift to the northwest will bring drier weather through Thursday as high pressure moves across the area. High temperatures will reach the 70 s and 80 s ahead of the front and will cool to the 60s and 70 s behind it. * A Fire Weather Watch is posted in New Mexico today for west winds 15-30 mph* A broad upper level trough will move across Arizona and New Mexico through Saturday bringing very breezy conditions to New Mexico today and to both states on Saturday. An upper level ridge will
strengthen over the area Sunday through Tuesday providing very warm and dry weather with lighter winds. A strong upper level trough will approach from the west Tuesday through Thursday. This will produce windy conditions and an increasing chance of showers and thunderstorms through
that period. High temperatures will range from the 50 s in the mountains and the 80 s in the southern deserts. Expect warming to to the lower and mid 90s Sunday and Monday in the southern deserts. Fire activity is expected to continue in the Southwest and Southern Areas.
