## INCIDENT MANAGEMENT SITUATION REPORT SUNDAY, JUNE 2, 1996 - 0900 MDT NATIONAL PREPAREDNESS LEVEL II

## \*\*\* ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT \*\*\*

CURRENT SITUATION: Fire activity increased in the Southern California Area yesterday. Initial attack activity continued in the Southwest Area, with numerous units reporting very high to extreme fire danger. Units in Michigan also reported extreme fire indices. Mobilization through NICC included six airtankers to southern California and an Infrared aircraft to Canada.

Southern California Area Large Fires:

PARAMOUNT, Riverside Ranger Unit, California State. The fire is burning in grass and brush. No structures are threatened.

SHORT, Riverside Ranger Unit, California State. A State Type I Incident Management Team (Wright) is committed. Six homes, 13 vehiclies, and miscellaneous outbuildings have been destroyed. Erratic winds and limited road access are hindering control efforts.

DEEP CREEK, San Bernardino Ranger Unit, California State. The fire is burning in rugged terrain. Numerous structures are threatened. Structure protection engines have been ordered to protect a ranch house. The fire has burned 700 acres of state land and 200 acres within the San Bernardino National Forest.

DEEP CREEK	BDU CA	900  90	6/1	168	5	15	5	NR	NR	500K
							NR	= Not	Repo	orted

OUTLOOK: A high pressure ridge will remain over Southern California and most of Arizona. Southern California and Arizona temperatures will range from 75 to 85 degrees along the coast and in the mountains to 110 in the deserts. Relative humidities will decrease by 3 to 5%. Temperatures throughout New Mexico will be in the 70's and 80's with humidities increasing by 10 to 15%. A chance of afternoon and evening thunderstorms exists for eastern New Mexico. Thunderstorms are expected to move into western New Mexico and eastern Arizona tomorrow. Florida temperatures will be in the 80's with a slight chance of thundershowers. The potential for initial attack and large fire activity continues as hot and dry weather returns to the southwestern United States.
