INCIDENT MANAGEMENT SITUATION REPORT<br>FRIDAY, JUNE 21, 1996 - 0530 MDT NATIONAL PREPAREDNESS LEVEL III<br>*** SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME ***

CURRENT SITUATION: Increased fire activity was reported in the Southern, Northwest, Southwest and Great Basin Areas, with moderate activity reported in most other Areas. Mobilization of National Resources increased through NICC with 2 caterers, 1 radio system and 2 Type I crews mobilized to the Southwest, 1 Type I crew to the Western Great Basin and an airtanker to the Eastern Area. Very high and extreme fire indices continue to be reported on numerous units throughout the southwestern United States. High fire activity persists in the Canadian Provinces of Ontario and Quebec. Ontario continues to assess each fire and deploy resources as they become available. Quebec reported intense fires in the Chibougamau Region which required firefighters to retreat from the lines.

Southwest Area Large Fires:
LL COMPLEX, Gila NF. A Type I Incident Management Team (Lente) is assigned. The complex is burning in the Gila Wilderness approximately 40 miles northwest of Silver City, NM. The complex is comprised of the Langstroth (5,790 acres) and Lookout (9,560 acres) fires. The Lookout fire continued to spread yesterday, but not as extreme as the day before. Airtankers dropped retardant on the Mogollon Baldy Lookout and cabin. The historical "Apache Cabin" four miles northwest of the lookout is now threatened. Crews have done fuel reduction around the cabin. Successful confinement of the Langstroth fire continues with some spread to the south into the old Sprite fire.

The Gila NF has 1 fire under confinement strategy for 650 acres.

Eastern Area Large Fires:
SOUTH TEMPERANCE, Superior NF. A Type II Incident Management Team (Bonde) is assigned. This fire is burning in the Boundary Waters Canoe Area Wilderness 25 miles north of the town of Tofte, MN. Aggressive action was taken on 2 spot fires on the south end of the fire. Burnout operations encompassed approximately 560 acres of unburned pocket fuels within the perimeter of the confinement line. An airtanker has been ordered through NICC due to increased activity last evening.

OUTLOOK:
>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>><<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<l
A FIRE WEATHER WATCH IS POSTED FOR NORTHERN AND CENTRAL ARIZONA
AND NEVADA FOR STRONG, GUSTY WINDS AND POSSIBLE DRY LIGHTNING
>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>><<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<<l
An upper level trough along the west coast and an upper ridge over the southern plains will produce a southwesterly flow over the western states. Showers and thunderstorms with the upper level trough are forecast from Washington, Oregon and northern California across Idaho and Montana. A flow of subtropical air will produce scattered thunderstorms from Arizona and New Mexico into eastern Utah, Colorado and Wyoming. Isolated dry thunderstorms are possible in Nevada. Strong southwest winds are forecast from southern Nevada and central Arizona into Utah, Colorado and southwest Wyoming. High temperatures will range from the 70's in the northern tier of the western states to the 80's and 90's elsewhere. Southwest desert temperatures will be 100 to 110. Northern Minnesota will have a good chance of morning showers then become partly cloudy by afternoon. High temperatures will be in the mid 70's to mid 80's. Low pressure over the Alaskan Peninsula will continue to spin moisture into the interior. Skies will be mostly cloudy with scattered showers and thunderstorms in the
interior sections. High temperatures will be in the 50's and 60's along the coasts and in the 70 's in the interior. The potential for increased initial and extended attack fire activity exists in the Southwest, Great Basin and Rocky Mountain Areas.
