INCIDENT MANAGEMENT SITUATION REPORT<br>SUNDAY, JULY 7, 1996 - 0900 MDT<br>NATIONAL PREPAREDNESS LEVEL III

## *** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT ***

CURRENT SITUATION: Initial attack and large fire activity continued in the Eastern Great Basin, necessitating the mobilization of a Type II Incident Management Team. Orders for caterers, showers, radios, crews, helicopters and miscellaneous overhead were processed through NICC for the Eastern Great Basin. Moderate initial attack was reported in most other Areas. An Ely District BLM engine was burned yesterday on a fire near Pioche, NV. The engine stalled and would not start. The crewmembers went into a black area. No fire shelters were deployed and no injuries were reported.

## Eastern Great Basin Area Large Fires:

SORENSON COMPLEX, Utah State. A Type I Incident Management Team (Monahan) is assigned. The fires are located 20 miles west of Richfield, UT. The Complex consists of 7 large fires burning on State, USFS and BLM lands. Current threats are to the city of Kanosh and the Kern River gas line. Extreme burning conditions are hindering suppression efforts.

EIGHT MILE, Fishlake NF. A Type II Incident Management Team (Butler) is assigned. This fire is threatening powerlines and communications sites approximately 7 miles southwest of Scipio, UT. The fire poses concerns for motorists along Interstate 15 which is near the fire.

POLE CANYON, Salt Lake District, BLM. The fire is burning in a Wilderness Study Area 7 miles northwest of Callao, UT. The fire burned through retardant lines on the northwest corner, through the Pole Canyon drainage. Wilderness values and Bristol Cone Pine stands are currently threatened.

JACK CREEK, Salmon-Challis NF. The fire is burning in the Frank Church River of No Return Wilderness 59 miles southwest of Salmon, ID. Decrease in acreage is due to more accurate mapping.

RICHFIELDS, South-Central Idaho District, BLM. This fire is located 41 miles northwest of Burley, ID. Fire growth yesterday was attributed to a run on the northwest portion and burnout operations used to cut it off.

FALCONBERRY, Salmon-Challis NF. This 175 acre fire is 55 miles southwest of Salmon, ID in the Frank Church River of No Return Wilderness. The fire will be suppressed using a confinement suppression strategy.

Rocky Mountain Large Fires:
SAND DRAW, Worland District, BLM. A Type II Incident Management Team (Hart) is assigned. This fire is burning in grass, sage, juniper and scattered Ponderosa Pine 4 miles east of Ten Sleep, WY. Rocky terrain and limited access continue to hamper suppression forces. A subdivision remains threatened.

## Southwest Area Large Fires:

CHINO WELL FLOOD, Mescalero Agency, BIA. An NPS All Risk Incident Management Team is assigned. Efforts are concentrated on completing abatement plans, conducting a comprehensive damage assessment and organizing recovery projects. A brief thundershower over the flood area caused some flash flooding. All flood abatement features held well. No injuries and minimal damage occurred.

Two fires are in a confinement suppression strategy totalling 19,736 acres.

Alaska Large Fires:
Alaska has 31 fires in a limited suppression strategy totalling 376,616
acres.

OUTLOOK:
An upper ridge of high pressure, centered near the Four Corners Area, will extend northward through the Pacific Northwest and western Canada. Most areas throughout the West will be warmer with very low relative humidities, sub-teens and single digits in the Great Basin. Monsoon moisture will produce widely scattered thunderstorms from Arizona and New Mexico into southeast Utah, Colorado and southern Wyoming. Isolated thunderstorms are possible in Nevada. High temperatures throughout the west will be in the $80^{\prime}$ 's and 90 's, with 100 to 105 in the central valley of California and up to 120 in the lower Southwest deserts. High pressure will bring warmer weather over the Alaska interior, with low pressure off of the southern coast. The interior will be partly cloudy with a chance of afternoon showers or thunderstorms. The southern coast will be mostly cloudy with occasional light rain. High temperatures will range from the 60's along the coast to the 70's to near 80 in the interior. Northern Minnesota will be partly sunny with a chance of afternoon showers and thunderstorms. High temperatures will be in the 70's with 10-20 MPH west winds. The potential for increased fire activity exists in most areas of the West, especially the Great Basin, due to higher temperatures and lower humidities.
