## INCIDENT MANAGEMENT SITUATION REPORT MONDAY, JULY 22, 1996 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

\*\*\* SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME \*\*\*

CURRENT SITUATION: Large fire activity continued in the Rocky Mountain Area. The Eastern Great Basin experienced increased large fire activity, necessitating the mobilization of a Type II Incident Management Team. Two Type I crews, a caterer, a shower and a radio system were mobilized through NICC to the Eastern Great Basin.

Rocky Mountain Large Fires:

BIG BEND, Craig District, BLM. This fire is burning in heavy Pinyon/Juniper and cheat grass 60 miles northwest of Craig, CO. The fire was determined to be a holdover fire from lightning several days ago. Threats are to fragile soil and scattered archeological sites. Fire behavior was very active during the peak burning period with rapid rates of spread observed.

DISAPPOINTMENT, San Juan NF. This fire is burning in scrub oak and sage brush approximately 20 miles northwest of Durango, CO. Erratic fire behavior was observed on the west and southwest sides of the fire due to winds and low humidities.

SQUAW CANYON, Montrose District, BLM. The fire is located about 15 miles west of Cortez, CO. The fire is being suppressed under a Unified Command with Montezuma County, BLM and Colorado State. Extreme dust whirls contributed to several flare-ups. The fire has numerous fingers which are impeding line construction on the south side.

Eastern Great Basin Large Fires:

WILDCAT, Zion NP. A Type II Incident Management Team (Martin) was ordered last night. The fire is burning approximately 35 miles northeast of St. George, UT. Strong winds coupled with hot and dry weather conditions pushed this prescribed fire over the northeast flank.

Alaska Large Fires: Twenty-eight fires are in a non-suppression status totalling 330,163 acres.

### OUTLOOK:

A hot upper level ridge is strengthening from the desert Southwest to the Pacific Northwest. This will bring hot and dry conditions to most of the Western U.S. The Northern Rockies will have high temperatures in the 80's while the remainder of the West experiences temperatures in the 90's and 100's. Southeast Arizona, New Mexico, and southern and eastern Colorado will have widely scattered thunderstorms. Southern Utah and the central mountains of Nevada will have isolated thunderstorms. The potential for fire activity to increase exists as temperatures in the West continue to rise.
