INCIDENT MANAGEMENT SITUATION REPORT<br>SATURDAY, AUGUST 10, 1996 - 0900 MDT<br>NATIONAL PREPAREDNESS LEVEL III

*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT ***

CURRENT SITUATION: The Northern Rockies, Northern California and Great Basin Areas experienced increased large fire activity. Type I Incident Management Teams are being mobilized in the Northwest and Northern California Areas. Moderate initial attack continued throughout the western United States. Mobilization of resources through NICC was steady.

Eastern Great Basin Large Fires:
A National Area Command Team (Caplinger) is assigned to the Richfield District, BLM and Fishlake NF. A Type I Incident Management Team (Bailey) is staged in Beaver, UT.

TANK, Utah State. A Type II Incident Management Team (Furlong) is assigned. The fire is burning one-half mile southeast of Orem, UT. Line construction was completed on all flanks of the fire except the north. Burnout of unburned islands of fuel within containment lines occurred yesterday.

LEAMINGTON COMPLEX, Richfield District, BLM. A Type I Incident Management Team (Richer) and a Type II Incident Management Team (Sisk) are assigned. The complex consists of the LEAMINGTON, EAST SAGE, NO-NAME, WASH, CHAPLIN, TURKEY, FOOL, CENTER SAGE and LITTLE WILDHORSE fires. The fires are burning on BLM, State and USFS land north of Leamington, UT. Light winds and low relative humidities aided firefighters during burnout operations. Good progress toward containment objectives continues.

ADELAIDE COMPLEX, Fishlake NF. A Type II Incident Management Team (Shive) is assigned. The fires are 5 miles southeast of Kanosh, UT. The complex consists of the ADALAIDE and DOG MOUNTAIN fires. Crews made excellent progress on line construction. Fire activity was limited to interior islands of unburned fuels.

HONEY BOY, Cedar City District, BLM. A Type II Incident Management Team (Martin) is assigned. This fire is located 5 miles southeast of Milford, UT. Extreme fire behavior was observed on the southeast portion of the fire during the past 24 hours. The fire is now burning in more manageable terrain with less rock outcrops.

SHRIVES \#2, Idaho Falls District, BLM. This fire is burning 6 miles northwest of Downey, ID. Four outbuildings were destroyed by this fire. Extreme fire behavior has hampered containment objectives.

Two fires are in a confinement suppression strategy totalling 2,994 acres.

Rocky Mountain Large Fires:
MURPHY RIDGE/BEAR CREEK COMPLEX, Medicine Bow NF. A Type I Incident Management Team (Wands) is assigned. The complex is located 10 miles northeast of Garrett, WY. Ground fire activity and isolated torching continued. Two-thirds of the fire received precipitation from passing thunderstorms yesterday. Burnout operations on the Murphy Ridge fire were halted due to high winds associated with these thunder cells.

PERSISTANT, Dinosaur NM. A Type II Incident Management Team (Gauger) is assigned. This fire is burning on NPS and BLM land 60 miles southeast of Rock Springs, WY. High winds tested control lines and grounded helicopter operations yesterday. Steep terrain and inaccessibility continue to hamper containment objectives.

Northwest Large Fires:
SLOAN'S RIDGE, Wallowa-Whitman NF. A Type II Incident Management Team (Carstens) is assigned. A Type I Incident Management Team (Payne) was ordered last night and will assume suppression responsibilities this morning. The fire is burning in subalpine fir, lodgepole and heavy downfall from mountain pine beetle infestation in the North Fork of the John Day Wilderness, 12 miles northwest of Sumpter, OR. Extreme fire behavior, low humidities and spotting are hindering suppression efforts. Numerous mine shafts and mining explosives in the area are also contributing to control problems. Mining claims and a historic cabin are threatened.

SALT CREEK, Wallowa-Whitman NF. A Type II Incident Management Team (Lukens) has been assigned. The fire is burning in mostly light fuels with scattered timber in deep ravines of the Hells Canyon National Recreation Area. Crews and helicopters concentrated on blacklining the west side in order to contain the fire within the Hells Canyon Wilderness. The terrain is very steep with the elevation varying from 2,000 to 6,000 feet. Access is extremely limited and $4 X 4$ engines and crew carriers are a critical need. The fire is estimated between 15,000 and 18,000 acres, however, smoke is limiting visibility.

HORSE RIDGE, Prineville District, BLM. A Type II Incident Management Team (Lohrey) has been ordered. The fire is burning in grass, brush and juniper 12 miles east of Bend, OR. Threats are to the Horse Ridge Natural Area, which contains one of the largest juniper stands in the Great Basin.

One fire is in a confinement suppression strategy totalling 740 acres.

Alaska Large Fires: Seventeen fires are in a non-suppression status totalling 434,199 acres.

OUTLOOK:
*** A FIRE WEATHER WATCH IS POSTED FOR ***
*** DRY LIGHTNING IN SOUTH-CENTRAL OREGON TONIGHT ***

An upper level ridge of high pressure will remain firmly entrenched over the western United States. This will result in another hot and dry day for much of the West. A southeasterly flow will spread monsoon moisture from the desert Southwest up the Sierra Nevada Mountains into southern Oregon. A fire weather watch has been posted in south-central Oregon for dry lightning tonight. Dry lightning is also possible in Nevada, southern Utah and western Colorado. Scattered wet thunderstorms are forecast for southern Colorado, New Mexico and Arizona. High temperatures will range from the 90's to 105, even in western Washington and western Oregon.
