    INCIDENT MANAGEMENT SITUATION REPORT
    WEDNESDAY, AUGUST 14, 1996 - 0530 MDT
    NATIONAL PREPAREDNESS LEVEL IV
    *** THE TEN STANDARD FIRE ORDERS ARE FIRM ***
*** WE DON'T BREAK THEM; WE DON'T BEND THEM ***
```

CURRENT SITUATION: Fire activity continued throughout much of the West, with most areas below draw down levels for initial attack resources. Northern California and the Northwest Area reported a significant number of new fires yesterday. National resources are in high demand and critically low. Type II Incident Management Teams were committed in the Northwest, Northern Rockies and Great Basin Areas. Resource mobilization through NICC remained high.

Northwest Large Fires:
SIMNASHO, Warms Springs Agency, BIA. A Type I Incident Management Team (Porter) has been assigned. This fire is burning in grass, brush and timber 10 miles north of Warm Springs, OR. US Highway 26 has been closed at the Bear Springs junction (216) south to the city of Madras. A major burnout was planned for last night along the highway. The resort at Kah-nee-tah has been given the first evacuation alert. Structure protection is in place. Suppression efforts are hampered by terrain.

WHEELER, Oregon State. A State Type II Incident Management Team (Hunt) is assigned. The fire is burning near Spray, OR. The fire made no major runs yesterday. A major threat to the community of Spray continues. No structures have been destroyed within the town. Eighteen structures scattered outside of Spray were destroyed, 14 of which were residences. Crew transport to the fire has been a problem.

COW HOLLOW, Vale BLM. A Type II Incident Management Team has been ordered. The fire is burning in brush and grass 8 miles south of Vale, OR. The fire made runs to the south and southeast threatening structures. The Malheur County Sheriffs Department are making contacts with evacuation information. There are numerous new fires in the area which will be managed as part of the Cow Hollow Complex.

WILDCAT, Malheur NF. A Type I Incident Management Team (Dubois) is assigned. The fire is 10 miles southeast of John Day, OR. Crews worked to reinforce existing firelines and mop up spots on the east side of Strawberry Creek. Suppression efforts progressed on the northeast perimeter. Permanent and summer residences, the Blue Mountain Hot Springs Resort and recreational areas remain threatened.

SALT COMPLEX, Wallowa-Whitman NF. A Type I Incident Management Team (Bailey) and a Type II Incident Management Team (Lukens) are assigned. The fires are burning on the Oregon/Idaho border of the Hells Canyon Recreation Area. The complex consists of the SALT CREEK and HEAVEN'S GATE fires. Steep, rocky terrain makes access to the Heaven's Gate fire difficult. One outbuilding has been lost. The National Recreation Area on the Oregon side remains threatened.

SLOAN'S RIDGE, Wallowa-Whitman NF. A Type I Incident Management Team
(Payne) is assigned. The fire is burning in subalpine fir and lodgepole 12 miles northwest of Sumpter, OR. The fire was quiet yesterday as relative humidity increased. Crews worked to limit the spread into the Powder River watershed. Threatened and endangered species of fish may be affected by this blaze. Mine shafts and explosives in the area have created safety concerns. A historic cabin and mining claims remain threatened. Four structures have been destroyed, including 2 outbuildings and 2 uninhabited cabins.

DONNEYBROOK, Ore gon State. This fire is
burning around the community of Ashwood, OR., 20 miles northeast of Madras, OR. A successful burnout operation was conducted yesterday. Retardant was used to minimize fire spread into steep, timber areas. Residences in Ashwood continue to be threatened.

RIGDON COMPLEX, Willamette NF. A Type II Incident Management Team (Gardner) is assigned. The fires in this complex are burning 11 miles southeast of Oakridge, OR. Fire \#256 is the largest of 40+ fires in the complex. It is burning in heavy logging slash and old growth douglas fir.

SPRING, Umpqua NF. A Type II Incident Management Team (Murphy) is assigned. The fire is burning in the Boulder Creek Wilderness of the Diamond Peak Ranger District. The area is very rugged and access is limited.

ALDER, Fremont NF. A Type II Incident Management Team (Duke) is assigned. The fire is burning 15 miles south of Silver Lake, OR. Extreme fire behavior is hampering suppression efforts.

CEDAR MOUNTAIN, Vale District BLM. This fire will be included in the Cow Hollow Complex.

BOWIE ROAD (Previously reported as AIRWAY HEIGHTS), Washington State. This fire is burning near Fairchild Air Force Base and the Spokane, WA. International Airport. Crews made good progress and containment was expected last night.

One fire is in a confinement suppression strategy totalling 740 acres.

## Northern California Large Fires:

FORKS, Mendocino NF. A Type I Incident Management Team (Kohut) is assigned. The fire is burning north of the town of Upper Lake, CA. All control lines were lost on the fire yesterday afternoon. Two homes were confirmed destroyed on the southwest flank, approximately 40 remain evacuated, and an additional 40 homes are threatened. The fire now has the potential to burn 13,000 to 19,000 acres.

Southern California Large Fires:
WOLFSKILL, Riverside Ranger Unit, California State. A State Type I Incident Management Team (Wright) is assigned. This fire is burning in steep terrain near Banning, CA. The fire escaped control lines early yesterday afternoon, burning towards San Jacinto. Extreme fire behavior continues to hinder suppression efforts. Structure protection remains a concern.

BEAR, Tuolumne-Calaveras Ranger Unit, California State. A State Type I Incident Management Team (Delap) is assigned. Efforts are concentrated on strengthening existing lines. The fire continues to pose a threat to structures.

TUOLUMNE COMPLEX, Tuolumne-Calaveras ranger Unit, California State. A State Type I Incident Management Team (Ditullio) is assigned. This complex is located in the Red Hills area, south of Highway 108 in Tuolumne County. The complex consists 6 fires, the largest is the KEYSTONE at 7,000 acres and the BASELINE at 1,500 acres. These two fires are separated by Highway 108.

ESPERANZA COMPLEX, Tuolumne-Calaveras Ranger Unit, California State. The complex consists of the SUMMIT LEVEL, SHEEP RANCH and MANUAL fires which are burning in Calaveras County north of Highway 4. The Manuel fire is the top priority. Structure protection is a concern around the town of Arnold, CA.

Northern Rockies Large Fires:
COYOTE, Lewis and Clark NF. A Type I Incident Management Team (Frye) is assigned. The fire is burning within a logging operation 15 miles south of Monarch, MT. Minimal winds, higher humidities and lower temperatures prevented major expansion of the fire. Low fuel moistures, steep rocky terrain, heavy fuels, blow down and spotting are hampering control efforts. Showdown Ski Area, Montana power transmission lines, Watershed, West slope cutthroat trout habitat, private residences and the town of Niehart are current and anticipated threats.

WILLOW CREEK, Bitterroot NF. A Type II Incident Management Team (Spradlin) is assigned. The fire is burning in steep, rugged terrain southwest of Missoula, MT. Progress was made on Lower Willow with no growth today. Upper Willow doubled in size with runs on the north and south flanks. This area has heavy fuel loadings, steep slopes and snags. Concerns include watershed and Willow Mountain Lookout.

MOOSE BUTTE COMPLEX, Nez Perce NF. A Type II Incident Management Team (Cowin) is assigned to this incident south of Elk City, ID. The MOOSE BUTTE and LITTLE GREEN MOUNTAIN fires are included in this complex. The Moose Butte fire was $100 \%$ contained $8 / 13$ at 1900 . The Little Green

Mountain fire is $50 \%$ contained. Firefighters continued to improve control lines on the Moose Butte fire. Islands of unburned fuel, spotting, and inaccessibility have hampered suppression efforts on the Green Mountain fire. The threat to the Green Mountain Lookout has been reduced. SWET/WARRIOR COMPLEX, Nez Perce NF \& Bitterroot NF. A Type II Incident Management Team has been ordered. This complex consists of the WARRIOR'S FACE Prescribed Natural Fire (PNF) at 2000 acres, the GOAT MOUNTAIN (PNF) at 1,000 acres, and the SWET CREEK (PNF) at 15,000; all have been declared wildfires.

One fire is in confinement suppression strategy totalling 220 acres.

Western Great Basin Large Fires:
TROUT CANYON, Toiyabe NF. The fire is burning through very dry dense fuels approximately 40 miles west of Las Vegas, NV. A small community of 50 year-round residences is threatened, although not directly in the fire's path at this time. Strong winds, extreme fire behavior, rough terrain, rolling materials, and thick vegetation are hampering control efforts.

LEE, Elko District, BLM. The fire is burning 30 miles southest of Elko, NV. Currently no threats to structures exist; however, a tribal subdivision is located 1 mile to the west, the Spring Creek development is 5 miles to the north, and numerous ranch houses are a half mile away.

HUMBOLDT, Winnemucca District, BLM. A Type II Incident Management Team (Burdick) is assigned. This fire burned rapidly through grass and heavy sage 45 miles northeast of Winnemucca, NV. A Wilderness Study Area, ranch structures on the east and south flanks, a miners camp, wild horse habitat and critical deer winter range are currently threatened. Control problems include high winds, poor access and a large perimeter.

MT. JACKSON, Toiyabe NF. A Type II Incident Management Team (Carlson) is assigned. Strong, gusty winds from thunderstorms created extreme fire behavior on this fire 5 miles north of Bridgeport, CA. Current threats are to a Wilderness Study Area, watershed, fishery and recreation resources.

SHOEMAKE, Elko District, BLM. The fire is located 35 miles southeast of Caliente, NV. With pinyon-juniper and some Ponderosa Pine as fuel, extreme fire behavior was displayed. Limited access is hindering control efforts.

LITTLE VALLEY, Carson City District, BLM. The fire is located 20 miles north of Fernley, NF. Control problems include rocky terrain and strong winds.

## Eastern Great Basin Large Fires:

DANIELS, Uinta NF. A Type II Incident Management Team (Furlong) is assigned. This fire is 9 miles southeast of Heber, UT and has necessitated the closure of U.S. Highway 40. A major travel route for recreation and commercial use may be affected. Three hundred residences $1 / 2$ mile from the fire are threatened.

HENS PEAK, Fishlake NF. This fire is located 11 miles northeast of Loa, UT. High winds caused a flare-up on the fire yesterday. Dry, heavy timber and spotting are causing control problems. Timber sales and spruce plantations remain threatened.

ADELAIDE COMPLEX, Fishlake NF. A Type II Incident Management Team (Shive) is assigned. The fires are 5 miles southeast of Kanosh, UT. The complex consists of the ADALAIDE and DOG MOUNTAIN fires. Suppression efforts were concentrated on the areas that caused control difficulty Monday. Control lines were re-established with the aid of water drops, hose lays and retardant drops. The fire continues to burn out areas within the perimeter.

Three fires are in a confinement suppression strategy totalling 6,104 acres.

Rocky Mountain Large Fires:
MONCRIEF RIDGE, Big Horn NF. This fire is burning 7 miles from Story, WY. A Type II Incident Management Team (Hawkins) is assigned. Airtankers played a critical role in containing several slopovers and spot fires. Good progress was made yesterday on line construction. Control problems include steep terrain, falling trees, and poor road access.

SPRING CREEK, Wyoming State. This fire is burning at Guernsey State Park, 25 miles west of Torrington, WY, and is under the jurisdiction of State, Private, and BLM. No other information was received.

Alaska Large Fires: Seventeen fires are in a non-suppression status totalling 434,199 acres.

## OUTLOOK:

*** A FIRE WEATHER WATCH IS POSTED FOR DRY LIGHTNING IN *** *** NORTHEAST CALIFORNIA, WESTERN NEVADA, AND CENTRAL AND EASTERN WYOMING ***

The western U.S. will remain under the influence of strong high pressure aloft, which is centered over the desert Southwest. Sub-tropical moisture rotating around the high will continue to produce thunderstorms across much of the West. Scattered thunderstorms are forecast from central Arizona up the Sierra Nevada Mountains into eastern Oregon. More isolated to widely scattered thunderstorms are expected across the Great Basin into the Rockies. Some of these thunderstorms in the Great Basin and Rockies will be dry. High temperatures will range from the 70's to mid 80's in western Washington to near 117 in the desert Southwest, most areas will be in the 90's to just over 100.
