

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, AUGUST 16, 1996 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL V

*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT **

CURRENT SITUATION: Fire activity remained steady throughout the western United States. A Type I Incident Management Team was mobilized within the Southern California Area. Good progress toward containment was made on many large fires in the Eastern Great Basin Area. Mobilization of resources through NICC remain high.

Southern California Large Fires:

KAWEAH, Tulare Ranger Unit, California State and Sequoia Kings NP. A State Type I Incident Management Team (Benson) is transitioning with a National Type I Incident Management Team (Monahan). Approximately 2,560 acres of Sequoia Kings NP land has burned. Park Service residences at Ash Mountain have been evacuated. A pump house was destroyed, and a portion of the Southern California Edison Company flume was burned. High temperatures and steep terrain have hindered containment objectives.

FIFTY-EIGHT, San Luis Obispo Ranger Unit, California State. A State Type I Incident Management Team has been ordered. This fire is 5 miles east of Santa Margarita, CA along Highway 58. Numerous homes within the fire perimeter are threatened, no confirmed losses have been reported. Extreme fire behavior and rugged terrain have created control problems. Current threats include ranches, scattered residences and watershed.

ROGGE, Stanislaus NF. A Type I Incident Management Team (Greenhoe) has been ordered. The fire is burning in the Tuolumne River drainage near the community of Pine Mountain Lake. The fire made strong runs along the Tuolumne River. Structure protection for the Rogge Ranch is in place. Control problems include extreme temperatures and rugged terrain.

CABAZON, Riverside Ranger Unit, California State. The fire is near Cabazon, CA. The community of Twin Pines is under voluntary evacuation. Structures along Twin Pines Ranch Road are threatened. Two travel trailers were destroyed. Highways 79 and 243 are closed in both directions.

WOLFSKILL, Riverside Ranger Unit, California State. A State Type I Incident Management Team (Wright) is assigned. This fire is burning in steep terrain near Banning, CA. Suppression efforts were aided by favorable west winds. Islands of unburned fuel within containment lines continue to burn actively.

AKERSON COMPLEX, Yosemite NP. A Type II Incident Management Team (Byrd) is assigned. The complex consists of thirteen fires burning along the Yosemite NP and Stanislaus NF border.

Northwest Large Fires:

SIMNASHO, Warm Springs Agency, BIA. A Type I Incident Management Team (Porter) is assigned. This fire is burning in grass, brush and timber 10 miles north of Warm Springs, OR. A large burnout operation was underway west of the Deschutes River to Kan-nee-ta. All burnout lines were holding last evening. The fire is estimated at 95,000 acres with the total acreage expected to be 125,000 acres.

SOUTH ZONE COMPLEX (formerly reported as RIGDON COMPLEX), Willamette NF. A Type II Incident Management Team (Gardner) is assigned. The fires in this complex are burning 11 miles southeast of Oakridge, OR. Crews are being transported to inaccessible fires by Southern Pacific Railroad. Threats are to a Bonneville Power Authority switching site, 7,000 acres of private forest and the Warner Mountain Lookout. Spotting and torching was hampering suppression efforts yesterday afternoon.

BULL, Umatilla NF. A Type II Incident Management Team (Kearney) is assigned. The fire is burning near the lookout at Desolation Butte on the edge of the North Fork of the John Day Wilderness, 20 miles southeast of Ukiah, OR. A lookout and repeater are threatened. Airtankers were released after having little effect.

ALDER RIDGE, Fremont NF. A Type II Incident Management Team (Duke) is assigned. The fire is burning 15 miles south of Silver Lake, OR. The fire made a major run to the east yesterday. Thompson Reservoir campground and a Bonneville Power Authority relay station are currently threatened.

WILDCAT, Malheur NF. A Type I Incident Management Team (Dubois) is assigned. The fire is 10 miles southeast of John Day, OR. The fire is being suppressed under Unified Command with Oregon State. Windy conditions have increased fire activity, slowing line production. Permanent and summer residences are threatened and a contingency plan for evacuations is in place, however, this is not anticipated at this time.

COW HOLLOW COMPLEX, Vale District, BLM. A Type II Incident Management Team (McDonald) is assigned. The fire is burning in brush and grass 8 miles south of Vale, OR. The fire continues to make runs, threatening some structures.

SLOAN'S RIDGE, Wallowa-Whitman NF. A Type I Incident Management Team (Payne) is assigned. The fire is being suppressed under Unified Command with Oregon State. The fire is burning in subalpine fir and lodgepole 12 miles northwest of Sumpter, OR. Mop-up is in progress with some demobilization planned. Blasters from Oregon Department of Forestry continue to build line with fire line explosives.

SALT COMPLEX, Wallowa-Whitman NF. A Type I Incident Management Team (Bailey) is assigned. The complex is comprised of the SALT CREEK, SHEEP CREEK, and HEAVEN'S GATE fires. The fires are burning on the Oregon/Idaho border of the Hells Canyon Recreation Area. The complex consists of the SALT CREEK and HEAVEN'S GATE fires. Crews continued to work hot spots. Steep terrain, rolling rocks, snags and poor visibility are causing

control problems.

TOWER, Umatilla NF. A Type II Incident Management Team (Lukens) is assigned. This fire is burning in heavy fuels, both standing and dead, 17 miles south of Ukiah, OR. The fire burned actively yesterday, making rapid runs and spotting. WHEELER, Oregon State. A State Incident Management Team (Hunt) is assigned. The fire is being suppressed under Unified Command with the Forest Service. The fire is burning near Spray, OR., 15 miles southwest of Heppener, OR. The threat of the fire escaping remains due to hot and dry conditions. Heavy timber and snags by control lines are hampering suppression efforts.

DONNEYBROOK, Oregon State. This fire is burning around the community of Ashwood, OR., 20 miles northeast of Madras, OR. Rural and volunteer units are working the fire.

BARTLETT MTN., Burns District, BLM. The fire is burning south of Drewesy, OR.

SPRING, Umpqua NF. A Type II Incident Management Team (Murphy) is assigned. The fire is burning in the Boulder Creek Wilderness of the Diamond Peak Ranger District. The fire is burning in heavy fuels in very rugged terrain where access is limited.

One fire is in a confinement suppression strategy totalling 740 acres.

Northern California Large Fires:

FORK, Mendocino NF. Type I Incident Management Teams (Kohut & Loving) are assigned. The fire is burning north of the town of Upper Lake, CA. Extreme fire behavior was experienced on the fire again yesterday. Approximately 40 homes remain evacuated with an additional 40 homes threatened.

ROCK, Shasta-Trinity NF. A Type II incident Management Team is assigned. The fire is located approximately 40 miles southwest of Redding, CA. The

fire is burning within the confines of the 1988 Hermit fire. Excessive fuel loading and snags are safety concerns and control problems. Northern spotted owl habitat, steelhead fisheries and key watershed are current threats.

Northern Rockies Large Fires:

COYOTE, Lewis and Clark NF. A Type I Incident Management Team (Frye) is assigned. The fire is burning 15 miles south of Monarch, MT. Good progress continued on line construction. High winds and thunders cells over the fire increased fire activity yesterday, however, no significant growth occurred. Structural protection is in place and functional for the town of Niehart and residences in O'Brien and Johnson Creek. Major concerns are heavy fuels, strong winds, snags, torching and spotting.

WILLOW CREEK COMPLEX, Bitterroot NF. A Type II Incident Management Team (Spradlin) is assigned. Good progress continued to be made on the complex. Heavy fuels, steep slopes and snags will slow crews as they move into unstaffed divisions. No threat to Willow Mountain Lookout or residences is anticipated.

MOOSE BUTTE COMPLEX, Nez Perce NF. A Type II Incident Management Team (Cowin) is assigned to this incident south of Elk City, ID. The MOOSE BUTTE and LITTLE GREEN MOUNTAIN fires are included in this complex. The Moose Butte fire is controlled and the Little Green Mountain fire is 85% contained. No other information was reported.

SWET/WARRIOR, Nez Perce NF & Bitterroot NF. A Modified Type II Incident Management Team is assigned. No other information was reported.

One fire is in confinement suppression strategy totalling 220 acres.

Western Great Basin Large Fires:

GOLD QUARRY COMPLEX, Elko District, BLM. A Type II Incident Management Team (Vorce) is assigned. The complex consists of the GOLD QUARRY, TUNNEL and SUSIE CREEK fires. Extreme fire behavior was observed on the Tunnel and Susie Creek fires. Inaccessibility and steep terrain are hindering containment objectives. Current threats include private property, airway beacons, Susie Creek riparian area, and wildlife winter range. Visibility along Interstate 80 has also created problems.

JERSEY, Battle Mountain District, BLM. The fire is located 50 miles southwest of Battle Mountain, NV. Air support helped keep the fire within the control lines, as it made significant runs through grass and sage. Current threats include a ranch house, outbuildings, a microwave communications site, wildlife habitat, and a wilderness study area.

HUMBOLDT, Winnemucca District, BLM. A Type II Incident Management Team (Burdick) is assigned. This fire is located 45 miles northeast of Winnemucca, NV. Low humidities and shifting winds caused flare-ups in pockets of fuel. Big Horn sheep and endangered cutthroat trout habitat are threatened. Current concerns include a mining exploration camp, ranches, and wildlife winter range. The potential threat to the town of Midas, NV has decreased. SHOEMAKE, Ely District, BLM. The fire is located 35 miles southeast of Caliente, NV. Extreme fire behavior caused a significant gain in acreage. Good progress was made toward containment objectives yesterday. Difficult terrain and poor access are causing control problems. Wildlife habitat and uninhabited recreational and commercial structures are threatened.

Eastern Great Basin Large Fires:

HENS PEAK, Fishlake NF. This fire is located 11 miles northeast of Loa, UT. The fire was fairly quiet today with no new major runs. Mop up continued inside the line with crews burning out interior unburned islands that posed a threat. Timber sales and spruce plantations are still threatened.

ADELAIDE COMPLEX, Fishlake NF. A Type II Incident Management Team (Shive) is assigned. The fires are 5 miles southeast of Kanosh, UT. The complex consists of the ADALAIIDE and DOG MOUNTAIN fires. Crews were using local water sources to mop up critical areas along the fire perimeter at Big Cottonwood Canyon, the west fork of Corn Creek, and in Hell Hole Canyon.

Three fires are in a confinement suppression strategy totalling 6,104 acres.

DAVID BARROW	FLS	FL	10,000	0	---	2	0	0	1	0	NR	NR

Alaska Large Fires: Seventeen fires are in a non-suppression status totalling 434,199 acres.

OUTLOOK:

Strong high pressure aloft will weaken and shift east today as a weather disturbance moves into southwest Canada. This system will push a dry cold front across the Cascades of Washington and Oregon with windy conditions developing in eastern Washington and eastern Oregon. Cooler and more humid air will move into areas west of the Cascades. Monsoon moisture will be pushed south and east resulting in widely scattered thunderstorms for the southern Rockies and desert Southwest. High temperatures will range from the 60's and 70's in western Washington to 115 in the desert Southwest, most areas will be in the mid 80's to near 100.
