INCIDENT MANAGEMENT SITUATION REPORT THURSDAY, AUGUST 29, 1996 - 0530 MDT NATIONAL PREPAREDNESS LEVEL V<br>*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE FIRE ASSIGNMENT ***

CURRENT SITUATION: Initial attack and large fire activity continued throughout the West, although only a few new large fires were reported. Type II Incident Management Teams was mobilized in the Eastern Basin and Rocky Mountain Areas. There was a shelter deployment on the Ambrose fire involving 6 overhead personnel. They were not burned over and no injuries occurred. Resource mobilization through NICC remained steady.

Northwest Large Fires:
An Area Command Team (Edrington) is committed to the Umatilla National Forest.

SUMMIT, Umatilla NF. A Type I Incident Management Team (Porter) is assigned. This incident, formerly part of the Bull Complex, will now be a separate incident. Suppression forces made good progress on much of the fire. However, west winds pushed the fire beyond planned containment lines on the northeast flank. Homes in the vicinity of Galena, Susanville, Austin Junction, and bull trout habitat continue to be threatened.

TOWER, Umatilla NF. A Type I Incident Management Team (Richer) is assigned. A planned aerial firing operation did not take place due to an increase in fuel moisture. A large spot fire south of the John Day River is a concern due to large amounts of red slash surrounding it. Private property is threatened on the southwest flank. Other concerns are for salmon streams, historic structures, timber resources, Forest developments, an electronic site, Lehman Hot Springs Resort, and the community of Dale, OR.

TIMBERLINE COMPLEX, Colville Agency, BIA. A Type II Incident Management Team (Furlong) is assigned. The fire is located 8 miles east of Omak, WA. The TIMBERLINE and the WANNACUT fires make up this complex. Suppression forces made excellent progress on line construction due to cooler temperatures and higher humidities.

SPRING, Umpqua NF. A Type I Incident Management Team (Wands) is assigned. This incident is being managed under a Unified Command with the Douglas County Fire Protection Association. Fire activity increased in response to warmer and dryer conditions. Control problems developed on some divisions due to rolling material, snags, and isolated torching. Presently, the fire is in very rough terrain.

SOUTH ZONE COMPLEX, Willamette NF. A Type II Incident Management Team (Gardner) is assigned. The complex is 11 miles southeast of Oakridge, OR. Suppression forces continued initial attack of new starts from lightning holdovers. Five Oregon National Guard crews were on the fireline yesterday. The fire was smoldering and creeping, with some torching in the afternoon. Private lands are threatened as warm weather continues.

BULL COMPLEX, Umatilla NF. A Type II Incident Management Team (Kearney) is assigned. The BULL, ROCKY, and \#104 fires comprise this complex. Crews made progress on burnout operations on the south perimeter yesterday. A cold front overnight brought cooler temperatures, higher humidities and only light winds. There was one spot fire in the North Fork John Day Wilderness which was contained. MOOLACK COMPLEX, Willamette NF. A Type II Incident Management Team (Bright) is assigned. The complex consists of the MOOLACK and CHARLETON fires. The south and east flanks of the Moolack fire have been lined. The Moolack fire line continued to hold. Fireline blasting is planned from a very steep section of line. A threat still exists to a municipal and campground water sources, campgrounds, and a gauging station.

SALT COMPLEX, Wallowa-Whitman NF. A Type II Incident Management Team (McDonald) is assigned. The complex includes the SALT CREEK, DAM, SHEEP CREEK, and HEAVEN'S GATE fires. The fires are burning on the Oregon/Idaho border of the Hells Canyon Recreation Area. Rain followed by higher humidities reduced fire behavior yesterday. Historic structures, electronic sites, and big game winter range continue to be threatened.

NORTH UMPQUA COMPLEX, Umpqua NF. A Type II Incident Management Team (Weltch) is assigned. The complex includes the BLACK GORGE, WARRIOR and BEAR BONES fires. Cooler weather and higher humidities over the fire allowed crews to make good progress in fire line construction on the Black Gorge and Bear Bones fires. The Warrior continued to be difficult to control due to steep topography.

PARK MEADOWS, Deschutes NF. A Type I Incident Management Team (Payne) is assigned. Task Force Vanguard, 3rd Brigade, 4th Infantry Division (Lt. Col. Bayles, Commander) is assigned. Forces worked to suppress spot fires outside the line yesterday.

HAT BUTTE, Vale District, BLM. The fire is located 29 miles south of Juntura, OR. No current information was received. No new information was received. This will be the last report unless new information is received.

WILDCAT COMPLEX, Malheur NF. A Type II Incident Management Team (Bullis) transitioned into place yesterday. The fire is 10 miles southeast of John Day, OR. It is being suppressed under Unified Command with Oregon State. The complex includes the WILDCAT, CANYON CREEK and GRAHAM fires. Reburn potential on the fires are rated high as winds increase. Suppression continued on the Canyon Creek fire using helicopters and direct attack tactics.

Four fires are in a confinement suppression strategy totalling 125,879 acres.

EIGHTH STREET, Boise District, BLM. A Type I Incident Management Team (Monahan) is assigned. The fire is burning northeast of Boise, ID. The fire continued to make runs at the line and was spotting and making uphill runs in heavy timber. Structures in Robie Creek and Shafer Butte are threatened. Helicopter drops and airtankers were utilized to contain the north side of the fire.

ELBA, Sawtooth NF. A Type II Incident Management Team (Sisk) is assigned. The fire is located 20 miles southwest of Burley, ID. The fire remained active with direct structure protection necessary and still the first priority. Control problems are wind and slope induced runs. Percent contained and line built decreased due to yesterdays run that resulted in line being lost. The current threat is to ranch houses, 10 summer homes and a ski area.

FALL GOOSE COMPLEX. Payette NF. A Type II Incident Management Team (Martin) is assigned. The fires in the complex are located 8 miles northwest of McCall, ID. The complex is comprised of the FALL CREEK, GOOSE LAKE, HARTLEY, BRUNDAGE RESERVOIR, FROG, CORRAL LAKE, HARTLEY KNOB and numerous spot fires. The fires range from 4 to 100 acres. Heavy downfall is causing control problems.

COX'S WELL, Idaho Falls District, BLM. This fire is threatening ranch homes near Atomic City, ID. with evacuations possible. Burnout operations were being conducted at the time of the report last night. Current threats are to critical sagehen and deer winter range.

SWEET, Boise District, BLM. This fire is located 10 miles northeast of Emmett, ID. Grazing lands and wildlife habitat are the current threats. Unstable weather is causing control problems. The fire escaped control lines yesterday. Although containment is expected today, winds and lower humidities may present problems.

WHEAT GRASS, Salt Lake District, BLM. Hot and dry conditions, extreme fire behavior including shifting winds and rapid runs are hindering suppression efforts. A ranch, livestock and a natural gas pipeline are currently threatened.

BRUNO COMPLEX, Boise District, BLM. Due to the rapid containment of the fires that were to make up this complex, the fires remained as seperated incidents. The fires are listed separately in the table below. The Type I Incident Management Team (O'Bannon) that was ordered is being staged in Boise, ID.

MAYBE, Idaho Falls District, BLM. No new information was received. This will be the last report unless new information is received.

IRON BOG, Salmon-Challis NF. No new information was received. This will be the last report unless new information is received.

STARLIGHT WEST, Idaho Falls District, BLM. No new information was received. This will be the last report unless new information is received.

BALLY MOUNTAIN COMPLEX, Payette NF. No new information was received. This will be the last report unless new information is received.

Three fires are in confinement suppression strategy totalling 5,512 acres.

Southern California Large Fires:
MARPLE, Los Angeles County, California State. A Type I Incident Management Team (Frye) is assigned. The fire is located near Lake Castatic. The fire made significant runs yesterday and continued to actively burn on several fronts. Crews were attempting to hold the fire east of Interstate 5. Low humidity levels and extreme temperatures continued to hamper control efforts.

ACKERSON COMPLEX, Yosemite NP. Type I Incident Management Team (Dague) and Type II Incident Management Team (Byrd) are assigned. All large fires in the complex have burned into the Ackerson Fire. An inversion layer over most of the fire moderated fire activity yesterday. Crews were working to tie the east end of the fire to the Hetch Hetchy Reservoir. Structures remain threatened with evacuation advisories in effect.

Western Great Basin Large Fires:
WINNEMUCCA COMPLEX, Winnemucca District, BLM. A Type II Incident Management Team (Shive) is assigned. The complex is burning on the western edge of Winnemucca, NV. The complex consists of the PRARIE DOG, WINEMUCCA and BLOODY RUN fires. Completed dozer lines and burnout operations held the fire outside of the subdivisions yesterday. Good progress was made on all three fires. Residents of the Paradise Valley subdivision were allowed to return to their homes and Highway 95 was reopened. Threats remain to rural subdivisions. A burnout was planned for last night to reduce the threat to communication sites on Winnemucca Mountain. BOB'S FLAT, Northern Nevada State. Very erratic fire behavior was reported as the fire burned over and within the median of $\mathrm{I}-80$ at Emmigrant Pass, closing the Interstate in both directions for awhile. The current threat is the I-80 corridor, microwave stations, a cellular site, Emmigrant maintenance station and wildlife habitat. Difficult access, strong winds and steep rocky terrain are impeding control efforts.

UPPER HUMBOLDT COMPLEX, Battle Mountain District, BLM. A Type II Incident Management Team (Burdick) is assigned. The complex consists of the SLAVEN 2 fire and three Winnemucca District fires, GETCHELL, NORTH CHIMNEY and DUTCH FLAT. Crews did an outstanding job of limiting major runs on all of the fires, while airtanker support minimized acreage increases. The fires continue to pose a potential threat to the community of Cresebt Valley, an FAA control facility, 3 mines and 3 ranches.

OREGON, Elko District, BLM. Control efforts are being hindered by heavy, dry fuels, poor access and extreme fire behavior. The fire is currently threatening the town of Midas (4 miles away), Lahontan Cutthroat Trout habitat and livestock.

KING'S RIVER COMPLEX, Winnemucca District, BLM. The fire is burning near the Nevada/Oregon border. The fire made a major run to the west yesterday. Airtanker support assisted crews in holding the line and catching a slopover, while smokejumpers made good progress holding the line to the east. Historic mining sites and a watershed are the current threats. Difficult terrain and limited access are causing control problems.

UPPER BOULDER, Northern Nevada State. Fire activity was low yesterday. Threats are to grazing lands.

QUINN/ODELL, Winnemucca District, BLM. The fires are threatening seasonal cabins and principle residents at Fort McDermitt and Lahontan Cutthroat Trout habitat. Growth potential is very high. Resources were being reassigned to the fire last night.

PETAN, previously called DRY CREEK, Elko District, BLM. Cooler temperatures and more favorable winds allowed crews to make good progress on the fire yesterday. Current threats are to outlying structures near Owyhee, private agricultural lands and wildlife habitat.

BUCKHORN 2, Elko District, BLM. This fire is burning in heavy sage and grass 45 miles south-southeast of Battle Mountain, NV. Good progress was reported on the fire yesterday.

DEER CREEK, Humboldt NF. Current threats are to wildlife habitat.
RUBY COMPLEX, Humboldt NF. A Type I Incident Management Team (Birch) is assigned. The complex consists of the SMILEY and ROAD CANYON fires. The Smiley fire was active on the east side, spreading uphill at a slow rate. Lighter winds are expected to aid control efforts today.

COYOTE, Winnemucca District, BLM. No new information was received. This will be the last report unless new information is received.

SHOEMAKE, Ely District, BLM. This fire is located 35 miles southeast of Caliente, Nevada. No new information was received. This will be the last report unless new information is received.

Northern California Large Fires:
AMBROSE COMPLEX, Modoc NF. A Type I Incident Management Team (Giachino) is assigned. The complex of fires are located 40 miles northwest of Alturas, CA. The complex consists of the TIMBER/RANCH, LAKE, LONG, DAMONS/CANNON, MOWITZ and YOUNG fires. Spot fires yesterday afternoon resulted in the loss of portions of line on the Long fire. Significant fire activity and acreage increase occurred. Last evening the Long and Damon fires burned together. Threats continue to powerlines, gas pipelines, cultural resources and high value private and federal timber.

Rocky Mountain Large Fires:
BATES CREEK, Worland District, BLM. A Type II Incident Management Team (Hart) has been ordered. The fire is located 25 miles south of Tensleep, WY. Threats are to ranch structures, livestock and elk winter range. The
fire has burned into steep broken slopes. High winds and extreme fire behavior, including fire whirls continue to hamper suppression efforts. One shed and a pickup have been destroyed.

NORTH BROKENBACK, Worland District, BLM and Wyoming State. The fire is burning in grass, juniper and Ponderosa Pine 9 miles north of Tensleep, WY. The fire involves Wyoming Game and Fish habitat area, state, private and BLM lands. The fire was not affected by thunderstorms yesterday, allowing suppression forces to make significant progress towards containment.

STOCKWELL, Big Horn NF. A Type II Incident Management Team (Gauger) is assigned. The fire is burning in heavy fuels 10 miles west of Saddlestring, WY. An anchor point was established and direct line construction began. Threats to a communications tower, work center and recreational cabins are low to moderate.

BAERTHEL CANYON, Casper District, BLM. No new information was received. This will be the last report unless new information is received.

Northern Rockies Large Fires:
TELEPHONE BUTTE \#2, Southwestern Montana State. A Type II Incident Management Team (Spradlin) is assigned. The fire is located 21 miles west of Missoula, MT. Winds from thunderstorms caused flare-ups on the northwest corner of the fire before rain was received. The fire received approximately a half inch of rain. Crews had advance warning of the storm and pulled back into safety zones to avoid falling snags. Good progress was made on line construction. Lower temperatures and higher humidities are keeping fire behavior low. Steep slopes, snags, a nearby cutting unit with slash and possible strong winds associated with passing thunderstorms remain concerns.

SUNDAY POET, Nez Perce NF. A Type II Incident Management Team (Specht) is assigned. This fire is located 39 miles southeast of Grangeville, ID. Control efforts were aided by cooler temperatures, higher humidities and rain showers. Line construction has slowed due to steep rocky terrain combined with thick brush. Slippery footing due to the rain is also a hazard. Additional spot fires outside of the main fire are being lined and mopped up. The Team has taken over responsibility for the Gran Ridge fire that is approximately 30 acres.

SWET/WARRIOR, Bitterroot NF \& Nez Perce NF. A Type II Incident Management Team (Hodge) is assigned. Fire activity decreased due to showers received on the fire. The acreage increase is due to remapping.

PELICAN, Yellowstone NP. This prescribed natural fire is 150 acres and is bounded by Pelican Creek, the 1988 burn and roads. The fire burned
actively yesterday afternoon due to winds associated with thunderstorms. The fire continues to burn within the prescription. This will be the last report unless significant activity occurs.

## Southwest Large Fires:

Five fires are in confinement suppression strategy totalling 2,449 acres.

## Alaska Large Fires:

Twelve fires are in a non-suppression status totalling 345,013 acres.

## OUTLOOK:

High pressure aloft will be building over most of the western United States today while a Gulf of Alaska disturbance approaches the Pacific Northwest. This will result in increasing clouds along the northwest coast. There will be a chance of showers or thundershowers for the northern Rockies, Arizona and New Mexico. The remainder of the West will be mostly sunny, warmer and drier. High temperatures will range from the 60's and 70's in the Northern Rocky Mountains and from the 80's to around 100 in the lower valleys of the southwest. Fire activity is expected to increase with the upcoming holiday weekend coupled with the extreme burning conditions that exist throughout most of the West.
