

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, SEPTEMBER 2, 1996 - 0900 MDT
NATIONAL PREPAREDNESS LEVEL V

*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT. ***

CURRENT SITUATION: A Type I Incident Management Team was mobilized in the Eastern Great Basin. A Type II Incident Management Team was mobilized in the Great Basin and Southern California Areas. Good progress continued on many large fires. Mobilization of resources through NICC remained steady. Demobilization and reassignments have increased as containment objectives are achieved and resources complete 21 day assignments.

Northwest Large Fires:

An Area Command Team (Edrington) is committed to the Umatilla National Forest.

SUMMIT, Umatilla NF. A Type I Incident Management Team (Porter) is assigned. Task Force Vanguard, 3rd Brigade, 4th Infantry Division (Lt. Col. Bayles, Commander) are assigned. Moderate fire behavior allowed crews to continue to hold the fireline.

TOWER, Umatilla NF. A Type I Incident Management Team (Richer) is assigned. The 5th Marine Regiment, 1st Marine Division, 1st Marine Expeditionary Force (Lt. Col. Seal, Commander) are assigned. Several runs within the fire perimeter occurred, with active fire on the north side of the John Day River and southeast corner of the John Day Wilderness. Spotting occurred outside of control lines which were held with the help of helicopter retardant and bucket drops. Private property in the area, historic structures, natural resources and Lehman Hot Springs Resort continue to be threatened.

BULL, Umatilla NF. A Type II Incident Management Team (Kearney) is assigned. A slopover into Lake Creek drainage was contained yesterday as burnout and line construction continued. The remaining burnouts are expected to be complete Tuesday. Demobilization of crews and miscellaneous overhead is in progress.

SPRING, Umpqua NF. A Type I Incident Management Team (Wands) is assigned. This incident is being managed under a Unified Command with the Douglas Forest Protective Association. Gusty southwest winds increased fire activity in many locations of the fire, particularly on the west side. In the Boulder Creek Wilderness, a large burnout began to establish indirect line. This is expected to take about four days. A high threat remains to powerline structures and residences in Dry Creek. The threat to Toketee Ranger Station and power facilities at Slide Creek has alleviated.

MOOLACK COMPLEX, Willamette NF. A Type II Incident Management Team (Bright) is assigned. The complex consists of the MOOLACK and CHARLETON fires. Mop-up is continuing slowly due to deep duff and heavy fuels.

SALT COMPLEX, Wallowa-Whitman NF. A Type II Incident Management Team (Macdonald) is assigned. The complex includes the SALT CREEK, DAM, SHEEP CREEK, and HEAVEN'S GATE fires. The fires are burning on the Oregon/Idaho

border of the Hells Canyon Recreation Area. Suppression forces continue to be productive aided by cooler temperatures and higher humidities on the Sheep and Dam fires. A large burnout is planned for the east flank of the Sheep fire to mitigate heavy fuels in Lightning Creek drainage.

NORTH UMPQUA COMPLEX, Umpqua NF. A Type II Incident Management Team (Weltch) is assigned. The complex includes the BLACK GORGE, WARRIOR and BEAR BONES fires. The Warrior and Black Gorge fires were declared contained yesterday. Work continues on the Bear Bones#1 fire.

One fire is in a confinement suppression strategy totalling 3,200 acres.

Eastern Great Basin Large Fires:

BRIDGE, Salmon/Challis NF. A Type I Incident Management Team (Birch) has been ordered. The fire is burning to the northeast away from the Triple Creek ranch. The fire made a major run out of Rock Creek drainage crossing Sleeping Deer road, entering the South Fork of Camas Creek. Hidden Valley Ranch is currently threatened.

FALL GOOSE COMPLEX, Payette NF. A Type II Incident Management Team (Martin) is assigned. The fires in the complex are located 5-10 miles north of McCall, ID. The complex is comprised of the FALL, FROG, HARTLEY, BRUNDAGE, KNOB, GOOSE NORTH, GOOSE SOUTH and miscellaneous spot fires. Fire activity on the Frog fire included torching and spotting. All other fires were inactive.

ASPEN HOLLOW, Bridger-Teton NF. A Type II Incident Management Team (Sisk) has been ordered. The fire is located 10 miles southeast of Alpine, WY. High winds and spotting are hampering suppression efforts. All personnel were pulled off the fire yesterday afternoon due to extreme fire behavior.

Northern Rockies Large Fires:

LAKEVIEW, Idaho Panhandle NF. A Type II Incident Management Team (Cowin)

is assigned. The fire is located 1 mile outside Lakeview, ID. Active spread was observed on the northeast and southwest flanks along Lake Pend O'Reille. Control problems include inaccessibility, dry fuels, spotting and rolling material. Lakeview and major powerlines are potentially threatened.

SHEPARD, Custer NF. A Type II Incident Management Team (Stires) is assigned. The fire is located west of Red Lodge, MT. Substantial fire activity was observed yesterday afternoon. Helicopter bucket drops assisted firefighters in suppression efforts. Evacuation plans for homes near East Rosebud Lake are being developed. Steep terrain is causing control problems.

SUNDAY POET/GREEN, Nez Perce NF. A Type II Incident Management Team (Specht) is assigned. This fire is located 39 miles southeast of Grangeville, ID. Firefighters, on the Green fire, made good progress on line construction. Helicopter bucket drops cooled active spots within the perimeter. Mop-up continues on the Sunday Poet fire.

SWET/WARRIOR, Bitterroot NF & Nez Perce NF. A Type II Incident Management Team (Hodge) is assigned. Higher relative humidities significantly reduced fire activity. Structure protection measures remain in place for the Gatlin Ranch and McGruder Work Center.

Southern California Large Fires:

ACKERSON COMPLEX, Yosemite NP. A Type I Incident Management Team (Dague) is assigned. Interior runs have caused several spot fires outside control lines. All spots have been contained except for one 5 acre spot in the Tuolumne River Canyon adjacent to Camp Mather. Additional resources have been ordered to assist w-th this spot.

MARPLE, Los Angeles County, California State and Angeles NF. A Type I Incident Management Team (Frye) is assigned. The fire is located near Lake Castaic. Reinforcement and construction of fireline continues. Emphasis is on direct line construction on the north end of the fire, where 10 miles of open terrain remains. Fireline rehabilitation continues in secure areas. Demobilization is in progress.

BIEDEBACH, Angeles NF. A Type II Incident Management Team (Conrad) is assigned. This fire is burning in dense brush and timber southwest of the community of Wrihwood, CA. The fire is currently burning toward the community, where structure protection engines are in place. Three campgrounds have been evacuated.

Western Great Basin Large Fires:

UPPER HUMBOLDT COMPLEX, Battle Mountain District, BLM. A Type II Incident Management Team (Burdick) is assigned. The complex consists of the SLAVEN 2 fire and three Winnemucca District fires, GETCHELL, NORTH CHIMNEY and DUTCH FLAT. Burnout operations were conducted on the eastern flank of the Dutch Flat fire. Crews continued line construction on the northeastern flank. Several ranches, two mines and wildlife habitat are threatened.

OREGON, Elko District, BLM. The fire is burning 4 miles from the town of Midas, NV. Minimal fire activity was observed. Wildlife habitat remains threatened.

QUINN/ODELL, Winnemucca District, BLM. A Type II Incident Management Team (Shive) is assigned. The fire is located east of McDermitt, NV. Moderate weather conditions allowed crews to make good progress toward containment objectives. Threats to wildlife habitat and reservation lands are reduced.

RUBY COMPLEX, Humboldt NF. The complex consists of the SMILEY and ROAD CANYON fires. Interior islands of fuel burned actively, but all control lines were held. Crews conducted burnout operations yesterday.

Rocky Mountain Large Fires:

STOCKWELL, Big Horn NF. A Type II Incident Management Team (Gauger) is assigned. Crews continued to line spot fires and mop-up along the fires edge. Threats to a communications tower, work center and recreational cabins remain low to moderate. Limited access and heavy fuels continue to present a difficult mop-up situation.

STOCKWELL	BHF	WY	1,000	80	UNK	274	6	2	3	0	NR	725K

Southwest Large Fires:

One fire is in confinement suppression strategy totalling 870 acres.

Alaska Large Fires:

Eleven fires are in a non-suppression status totalling 342,783 acres.

OUTLOOK

A weak high pressure ridge will build over the Rockies today while a disturbance aloft intensifies in the Gulf of Alaska. The Northern Rockies will be partly cloudy, extending westward to Washington. The Great Basin, California and Arizona will be sunny, while monsoon thunderstorms continue in New Mexico and Colorado. A hot and unstable airmass will continue over the Great Basin. High temperatures will range from the 70's along the Canadian border to the 80's and lower 90's in the Great Basin. Interior California and the desert Southwest will have highs from the 90's to near 100 degrees.
