```
    INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, OCTOBER 16, 1996 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL II
```

*** ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT ***
CURRENT SITUATION: Increased fire activity was reported in the Northern Rockies, Western Great Basin and Eastern Areas. Resource mobilization through NICC consisted of a caterer and radio system to the Northern Rockies and an Infrared mission for the Rocky Mountain Area.

## Southern California Large Fires:

WILD, Los Padres NF. A Type I Incident Management Team (Dague) is assigned. A Type II Incident Management Team (Benik) will take over the fire today. Increase in fire size is due to burnout operations. Firefighters continue to make good progress toward containment. There is no longer any threat to structures. Containment was expected last night and demobilization is in progress.

Northern Rockies Large Fires:

ROLLOVER, Crow Agency, BIA. A Type II Incident Management Team (Wetzsteon) is assigned. Expected high winds did not develop allowing suppression resources to make good progress on line construction and burnout operations. Cooler temperatures and scattered showers were reported on the fire last evening.

Thirty-two fires are in a confine and contain suppression strategy totaling 54,841 acres.

Eastern Area Large Fires:

DEVIL'S HOLE, Minnesota State. A State Type II Incident Management Team (Long) is assigned. High winds caused the fire to threaten 6 homes and wildlife habitat.

CABLE STREET, Minnesota State. Heavy fuels and peat are causing control problems. Threats are to timber resources.

Northwest Large Fires:
One fire is in a confine or contain suppression strategy totaling 16,005 acres.

OUTLOOK:
A large upper level trough will remain over the Pacific Northwest and Northern Rockies. A cold front will extend from Montana southward into Colorado. Surface high pressure will be building in northern California. Rain and mountain snow showers are expected from Washington and Oregon eastward into Idaho, Montana, Wyoming and northern Colorado. Dry, northerly winds and low relative humidities are forecast for northern California. The desert Southwest will be dry and breezy. High temperatures will range from the $30^{\prime} \mathrm{s}$ to the 50 's in the Pacific Northwest and Northern Rockies. Southern California and the desert Southwest will be in the $80^{\prime} \mathrm{s}$ and $90^{\prime} \mathrm{s}$.
