INCIDENT MANAGEMENT SITUATION REPORT FRIDAY, FEBRUARY 7, 1997 - 1000 MST NATIONAL PREPAREDNESS LEVEL I

CURRENT SITUATION: Minor initial attack fire activity continued in the Southern Area, mainly in Florida. NICC continued to process overhead requests for the flood recovery efforts in Yosemite NP. Good weather has allowed resources to make good progress; however, an approaching storm may slow efforts. Over 550 personnel are currently committed to the recovery efforts

OUTLOOK: A series of weather disturbances will affect Georgia and South Carolina throughout next week. This will bring mostly cloudy conditions and a good chance of rain through Wednesday. A slight drying trend will begin on Thursday. Temperatures will range from the 30's and 40's at the higher elevations to the 50's to low 70's along the coast. Florida will have partly cloudy conditions with a good chance of showers through the next week. Temperatures will be mostly in the 60's and 70's in the north and the 70's to low 80's in the south. Cooler temperatures are expected by the middle of next week.
