OUTLOOK: A cold front will move into northern Florida bringing partly cloudy skies with scattered showers and thundershower in the north. High temperatures will be in the $80^{\prime} \mathrm{s}$. An upper trough of low pressure will be over southern California, bringing mostly sunny skies with a chance of afternoon thundershowers. A stationary surface front will be over New Mexico and northern Arizona. New Mexico will be partly cloudy and cooler with numerous showers and thunderstorms. Scattered afternoon and evening thundershowers are forecasted for Arizona. High temperatures for the southwestern states will range from the 60's and 70's in the mountains to the 90 's and near 100 in the southern deserts. A low pressure system will move out of the Great Lake States into New England. This will cause scattered showers, windy conditions and cooler temperatures. Highs for the Great Lakes states will reach into the upper $40^{\prime}$ 's and 50's and near 60 in Minnesota.
