INCIDENT MANAGEMENT SITUATION REPORT THURSDAY, JULY 31, 1997 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION: Initial attack activity moderated in the Northwest and Northern California. Good progress continued on the large fires in Alaska, although observed fire intensity has increased. Recent monsoon moisture in the Southwest, Great Basin and Rocky Mountain Areas has reduced the very high and extreme fire indices.

ALASKA LARGE FIRES:

SIMELS, Galena District, BLM. This fire is on the east side of the Innoko Flats, between Galena and McGrath. Active fire behavior was reported on the south flank. Two crews and a helicopter are working on a spot fire along the southern perimeter. This 2,000 acre spot fire is 30% contained.

CHINIKLIK MOUNTAIN, Galena District, BLM. A Type II Incident Management Team (Wehking) is assigned. Warm weather and low relative humidity has caused more heat along the southern perimeter. Significant fire activity was observed on the east flank. A spike camp was established, and a crew has started to secure the northern perimeter. Several bears, including a sow and cubs, continue to maintain residence in the immediate vicinity of the fire.

PAIMIUT, Galena District, BLM. This fire is being managed by the Type II Incident Management Team assigned to the Chiniklik fire. Warm weather and lower relative humidity has increased fire activity along the perimeter. There was no increase in fire size, although a flare-up occurred which required bucket drops and considerable effort to contain.

INOWAK, Southwest Area Forestry, Alaska State. A Type II Incident Management Team (Dube) is assigned. Significant fire behavior was observed on the west flank, north of the east fork of the George River. A camp was established across the Kuskokwim River from Georgetown to provide structure and native allotment protection.

Alaska has 46 other large fires burning for a total of 1,445,441 acres.

EASTERN AREA LARGE FIRES:

ROCKWOOD #2, New Jersey State. This fire, formerly known as West Mills, is northeast of Hammonton, NJ. Burnout operations were successful and containment was expected last night.

OUTLOOK:

The Alaska interior will be mostly sunny with isolated afternoon showers and thunderstorms along the mountain ranges. Temperatures will be in the 70's. The south coast will be mostly cloudy with scattered showers. Temperatures will be in the high 60's and 70's.

New Jersey will be mostly sunny, with temperatures in the 80's.

Oregon and Washington will have areas of morning fog and low clouds along the coast. Partly cloudy conditions with scattered afternoon thunderstorms and evening wet thunderstorms are forecast east of the Cascades, mainly in northeast Oregon and the southeast Washington mountains. Temperatures will be in the high 70's to mid 80's from the Cascades westward and in the 80's to lower 90's east of the Cascades.

California will have morning low clouds along the coast, becoming mostly sunny in the afternoon. Isolated afternoon and evening wet thunderstorms are predicted in the mountains and coastal areas. Temperatures will be in the high 70's and 80's in the mountains, the 80's and 90's in the valleys, and near 105 in the southern deserts.

Northern Nevada and Western Utah will be partly cloudy with isolated afternoon evening wet thunderstorms. Eastern Utah will have scattered thunderstorms. Overall temperatures will be in the high 80's and 90's, reaching 105 in the southern deserts.

Colorado and New Mexico will be partly cloudy with scattered showers and thunderstorms. Temperatures will be in the high 70's to 80's, with mountain highs in the 60's to 70's.

Arizona will be mostly cloudy in the east and partly cloudy in the west. Scattered afternoon and evening showers and wet thunderstorms are possible in the central mountains and east, with isolated showers and thunderstorms west and south. Temperatures will range from the 70's in the mountains to 108 in the hottest deserts.
