CURRENT SITUATION: Alaska continues to experience large fire activity. Additional fires have been staffed for structure protection.

## ALASKA LARGE FIRES:

SIMELS, Galena District, BLM. This fire is on the east side of the Innoko Flats, between Galena and McGrath. The fire is active on the southern perimeter, which is burning into a continuous stand of black spruce. The fire has increased in size, but was not mapped due to thick smoke. The slopover on the eastern perimeter is $35 \%$ contained, while protection of the historic cabin continues.

CHINIKLIK MOUNTAIN, Galena District, BLM. A Type II Incident Management Team (Wehking) is assigned. A line has been secured on all divisions. Ash pits near the southern perimeter still need to be worked. If the weather holds, the crews will get around the fire by $8 / 3$.

PAIMIUT, Galena District, BLM. This fire is being managed by the Type II Incident Management Team assigned to the Chiniklik fire. The fire is contained. Major areas of heat have been mopped-up. All crews and overhead will mop-up where the fire burned beyond meadows. No flare-ups occurred today. Demobilization is planned for this weekend, depending on the results of infrared scanning.

INOWAK, Southwest Area Forestry, Alaska State. A Type II Incident Management Team (Dube) is assigned. Hot dry conditions continue to cause active burning on the perimeter. The perimeter was $30 \%$ active, with up to 50 foot flame lengths, spreading at 40 chains per hour. The fire size has increased, but remains unmapped due to thick smoke.

BUTTE CREEK, Fairbanks Area Forestry, Alaska State. This fire is located 25 miles east of Eilson Air Force Base, near cabins on the Salcha River. The south west perimeter continues to be active. A fifteen acre slopover crossed a winter trail, torching spruce with 30-40 foot flame lengths. Hose lays are in place for cabin protection. Additional crew and resources are being mobilized to the fire. Retardant was effective on the slopover, but visibility dropped due to smoke.

GARFIELD CREEK, Galena District, BLM. This fire is located on the Seward Peninsula, 65 miles north of Nome. Southeast winds have substantially increased fire activity, adding 22,000 acres on its west and north perimeters during the last few days. Eight smokejumpers were deployed for protection of a structure on the confluence of Boulder Creek and the mouth of the Noxapaga River. The north west perimeter could not be mapped due to heavy smoke.

MAGITCHLIE CREEK, Galena District, BLM. This fire is located in the Innoko Flats, 35 miles south of Kaltag. This is a limited suppression fire which is staffed for structure protection. A meadow burn-out south west of the cabin is complete. Light rain during the night may hinder the
plan to burn-out the area around a fuel site. The fire is active, but is still a safe distance from the cabin.

DEVILS PEAK, Southwest Area Forestry, Alaska State. This fire is located west of the Kuskokwim River, 60 miles south of McGrath. The fire increased in size by 250 acres, even though it received precipitation throughout the day. Mop-up is $80 \%$ complete on the west side and $20 \%$ on the east side.

Alaska has 48 other large fires burning for a total of 1,502,851 acres.

## EASTERN GREAT BASIN LARGE FIRES:

WINTER CAMP, Boise District BLM. This fire is located 35 miles south east of Mountain Home, ID. The fire spread quickly due to winds from passing thunderstorms. Retardant was effective slowing forward spread. Containment was expected last night.

OUTLOOK:
California will have morning low clouds along the coast, becoming mostly sunny in the afternoon. Isolated afternoon and evening wet thunderstorms are predicted west of the Sierra Nevada Crest. Temperatures will be in the high 70's and 80's in the mountains and 80's and 90's in the valleys.

Alaska will be mostly cloudy with scattered showers along the southern coast, with partly cloudy scattered afternoon thunderstorms in the interior. Temperatures will be in the high 60's and 70's.

New Jersey will be sunny. High temperatures in the 90's inland, and in the low to mid 80 's in the coastal areas.

Temperatures will be in the $80^{\prime}$ 's and $90^{\prime}$ s in Nevada and Utah. Eastern and

Southern Nevada will be partly cloudy with isolated afternoon and evening wet thunderstorms. Scattered wet thunderstorms are expected throughout Utah.

Oregon and Washington will be mostly sunny west of the Cascades after the morning low clouds and fog along the coast lift. Temperatures will be in the high 60's to $70^{\prime}$ 's along the coast and in western washington, and in the 80's in the valleys of Oregon. East of the Cascades will be partly cloudy with scattered thunderstorms, and a slight chance of thunderstorms along the Idaho border. Temperatures will be in the high 80's to low 90's.
