# INCIDENT MANAGEMENT SITUATION REPORT <br> FRIDAY, AUGUST 8, 1997 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II 

#### Abstract

CURRENT SITUATION: Initial attack and large fire activity continued in Southern California. The Northwest Area experienced increased initial attack activity and one new large fire. NICC continued to process resource orders for aircraft, equipment, crews, and overhead in support of the large fires in California. Fire indices remain very high to extreme in California, Arizona and Nevada. Washington and Louisiana each reported one unit with very high fire danger.

SOUTHERN CALIFORNIA LARGE FIRES:
An Area Command Team (Edrington) is assigned to the Los Padres National Forest.

LOGAN, Los Padres NF. A Type I Incident Management Team (Kohut) is assigned. This fire is 20 miles east of Santa Maria, CA. Active fire behavior was observed yesterday. Firefighters continue to battle spot fires along Highway 166. Structure protection remains in place for 50 homes and structures near the fire. Extreme weather conditions, poor access, and dense fuels continue to hamper containment efforts.

HOPPER, Los Padres NF. A Type I Incident Management Team (Greenhoe) is assigned. This fire is located 5 miles north of Fillmore, CA. Suppression efforts were challenged by dry weather, limited fire access, and steep terrain. Recreational sites at Lake Piru were evacuated yesterday. Current threats are to the commun ity of Piru and critical condor habitat.

CHOKE, Sequoia NF. A Type II Incident Management Team (Battreal) is assigned. This fire is located in the Monarch Wilderness, approximately 50 miles east of Fresno, CA. Heavy fuels and extremely limited access are creating control problems. Additional crews will arrive at the fire today.

ALASKA LARGE FIRES:
SIMELS, Galena District, BLM. The southeast slopover is contained. Demobiliza tion has begun. This will be the last report unless
significant activity occurs.
PAIMIUT, Galena District, BLM. A Type II Incident Management Team (Wehking) is assigned. Peat mounds along the perimeter have created containment problems. A Type III Incident Management Team will assume responsibility of the fire today.

Full containment was expected last night. INOWAK, Southwest Area Forestry, Alaska State. A Type II Incident Management T eam (Dube) is assigned. Strong southeast winds created active fire behavior. The areas surrounding the villages and native allotments were not threatened. Transition to a Type III Incident Management Team has begun.

## OUTLOOK:

California will be hot and dry. Isolated thunderstorms are forecast for the southern and central Sierras. Temperatures will be in the 80's and 90's in the mountains and coastal valleys, with highs of 102 to 111 in the deserts.

Washington and Oregon will be mostly sunny and locally breezy. Eastern temperatures will be in the $80^{\prime} \mathrm{s}$ to mid $90^{\prime} \mathrm{s}$. Highs will be in the $70^{\prime} \mathrm{s}$ to lower 80's west of the Washington Cascades.

Nevada will be partly cloudy and hot with a few afternoon thunderstorms. Temperatures will be 90 to 101 in the north, and 105-116 in the south.

Utah will be sunny with a few afternoon showers and thunderstorms over the mountains. Temperatures will be 85 to 95 in the north, and 90 to 105 in the south.

Alaska will be mostly cloudy with a chance of showers. Central Alaska will continue to have dry conditions. High temperatures will be in the 60's and 70's throughout the state.

Michigan will be mostly sunny with high temperatures in the 80's.
Minnesota will be partly cloudy, windy and warm, with a chance of thunderstorms in the northwest. High temperatures will range from the 80's to near 90.
