```
INCIDENT MANAGEMENT SITUATION REPORT
    THURSDAY, MAY 28, 1998 - 0530 MDT
        NATIONAL PREPAREDNESS LEVEL II
```

## CURRENT SITUATION:

Minimal initial attack fire activity was reported yesterday. Ten crews were demobilized from Canada yesterday. Very high and extreme fire indices were reported in Texas, New Mexico, Arizona, Utah, Minnesota, Michigan and New Hampshire.

## SOUTHERN AREA LARGE FIRES:

HOLIDAY, Apalachicola NF. A Type II Incident Management Team (Kearney) is assigned. This fire is 18 miles southwest of Tallahassee. Increased acreage is due to major runs and burn-out operations. Control problems continue to be low relative humidities, winds and vigorous fire behavior. Commercial timber and bee apiaries remain threatened.

OUTLOOK:
A FIRE WEATHER WATCH IS POSTED THIS AFTERNOON IN THE NORTHWEST HALF OF NEW MEXICO FOR WINDS AND LOW HUMIDITY. New Mexico and west Texas will be hot, dry and breezy. Winds will be from the southwest at 15-30 MPH. High temperatures will be in the upper 80's to near 105 with $70^{\prime}$ s to mid 80's in the mountains.

A FIRE WEATHER WATCH IS POSTED IN NORTHERN LOWER MICHIGAN FOR WINDS. The Great Lakes States will be affected by a cold front moving into southeast Wisconsin and Michigan, bringing near red flag conditions due to breezy southwest winds. Following the cold front, winds will shift to westerly flow. A chance of showers and thunderstorms will be associated with this cold front. The remainder of the area will be dry. High temperatures will be in the $80^{\prime}$ s, except in Northern Minnesota where temperatures will be in the 70's.

Florida will experience numerous showers and thunderstorms. High temperatures will be upper $80^{\prime} \mathrm{s}$ and mid $90^{\prime} \mathrm{s}$.

Alaska will experience showers and thunderstorms along the Brooks Range and a chance of rain in the southeast. The remainder of the state will be dry. Winds will be from the southeast at 15-25 MPH in the passes. High temperatures will be in the $40^{\prime}$ s and 50's in the Southeast and along the coast with 60's and mid 70's in the interior.
