# INCIDENT MANAGEMENT SITUATION REPORT 

SATURDAY, JUNE 27, 1998-0900 MDT
NATIONAL PREPAREDNESS LEVEL II

## CURRENT SITUATION:

Increased initial attack fire activity occurred in the Southwest Area. Significant initial attack and large fire activity continued in the Southern Area. Minor to moderate initial attack fire activity was reported elsewhere. The National Interagency Coordination Center processed orders for engines, tractor plows, water tenders, radios, air attack aircraft and miscellaneous overhead to the Southern Area. The Southwest Area ordered a type I helicopter, shower and caterer unit. A type I crew order was processed for the Rocky Mountain Area. Very high and extreme fire indices were reported in Florida, Georgia, Kansas, Texas, New Mexico, Arizona, Colorado, Utah, and Nevada.

## SOUTHERN AREA LARGE FIRES:

BUNNELL COMPLEX, Florida State, Flagler, Volusia, and St. Johns Counties. A North Carolina Incident Management Team (Hendricks) is assigned. The fire that threatening Lafayette Landing subdivision is controlled. The complex received some precipitation yesterday. Unfortunately, wind gusts and numerous lightning strikes igniting new fires came with the rain. Forty-seven new lightning fires were reported in Flagler County yesterday. The majority of new starts were extinguished.

OAK HEAD COMPLEX, Osceola National Forest. A Type I Incident Management Team (Greenhoe) is assigned. This fire is located 20 miles north of Lake City. Currently the complex is managing five large fires. The fire received one to two inches of rain yesterday. Winds associated with the precipitation caused numerous spot fires over the line. Modified fire behavior is expected for a couple of days.

SUWANNEE COMPLEX, Florida State, Columbia, Union, Bradford and Baker Counties. A Type I Incident Management Team (Wands) is assigned. A Unified Command is in effect. The complex currently consists of fourteen fires. Several hotspots and interior islands continue to burnout, but are not threatening control lines at this time. Thunderstorms in the area temporarily mitigated the extreme burning conditions. Mop-up on the Swift Creek \#1 fire is continuing.

## ALASKA LARGE FIRES:

CARLA LAKE, Fort Greely Army Base. This fire is 15 miles southwest of Delta Junction. A Type II Incident Management Team (Ribar) is assigned. Mop-up and rehabilitation of fireline is continuing. Crews along the eastern side of the fire encountered young grizzlies, which slowed their progress. Bear visits to the fireline and base camp have increased. Cloudy weather with traces of precipitation continues to keep fire behavior to a minimum. The Type II Team is scheduled for demobilization tomorrow.

## OUTLOOK:

Georgia and Florida will be hot with scattered afternoon thunderstorms. Thunderstorm activity will be significant throughout southern Florida. High temperatures will be in the 90's.

Arizona, Nevada, Southern Utah, New Mexico and Texas will be hot, dry and breezy. Showers and thunderstorms are expected in southeast Texas. Much of the region will experience southwest winds at 15-25 MPH. Winds will be 10-20 MPH in Texas. High temperatures will range from 75 to 90 in the mountains and 95 to 110 in the valleys and deserts.

Alaska will be mostly cloudy with a chance of showers. High temperatures will be in the 50's along the coast with 60's to low 70's in the interior.
NR = NOT REPORTED UNK - UNKNOWN
