INCIDENT MANAGEMENT SITUATION REPORT<br>THURSDAY, SEPTEMBER 3, 1998 - 0530 MDT NATIONAL PREPAREDNESS LEVEL III

## CURRENT SITUATION:

Initial attack and large fire activity increased significantly in the Northern Rockies necessitating the commitment of three Type I and six Type II Incident Management Teams. Initial attack and large fire activity continued in the Northwest, Eastern Great Basin, and Northern California Areas with Type II Incident Management Team assignments in those Areas. Good progress is being made toward containment objectives on fires in Southern California. The National Interagency Coordination Center processed orders for helicopters, equipment, crews, overhead, caterers, showers and radio systems. Very high to extreme indices were reported in Texas, Arizona, Utah, Nevada, California, Oregon, Washington, Idaho, Wyoming, Montana and South Dakota.

## NORTHERN ROCKIES LARGE FIRES:

BEAR GULCH, Beaverhead/Deerlodge NF. This fire is located nine miles northeast of Twin Bridges. The Bear Gulch fire is under a Unified Command Team with Madison County, the Montana Department of Natural Resources and Conservation and the U.S. Forest Service. Winds, steep and rocky terrain, and poor access continue to pose control problems.

BLACKFEET COMPLEX, Blackfeet Agency, BIA. A Type II Incident Management Team (Swope) is assigned. Strong winds with gusts of 40+ MPH caused the Red Eagle Lake fire to escape holding lines. Containment objectives slowed due to fire behavior, numerous spot fires, heavy fuels, snags, and steep, inaccessible terrain. An emergency evacuation plan was prepared in coordination with local agencies. Stage I of the plan was implemented which resulted in the ordering of structural engines. Crews have been gridding unburned areas to detect any holdover fires smoldering under heavy tree canopies.

BRADSHAW, Montana State. A Type II Incident Management Team (Milburn) has been ordered. This fire is located 40 miles east of Miles City. The fire is burning in rough and steep terrain with heavy fuel loads.

HERMAN RIDGE, Miles City District, BLM. A Type II Incident management Team (Williams) has been ordered. This fire, located 30 miles northwest of Jordan, is burning in grass, ponderosa pine and juniper. The fire has burned to the Charles M. Russell Wildlife Refuge. Control problems include high winds, low humidities, and high temperatures.

CHALLENGE, Flathead NF. A Type I Incident Management Team (Frye) has been ordered. The fire is located about 10 miles east of Summit. This wind driven fire was about 60 acres in size and was spotting up to a half mile in heavy timber when detected. No initial attack action was taken due to extreme fire behavior. Three trail users were evacuated.

DOME, Kootenai NF. A Type I Incident Management Team (Foster) has been ordered. This wind driven fire is burning in steep, inaccessible terrain about 6 miles west of Libby. Weather predictions include high winds and low humidities. Spotting is expected and the town of Libby is threatened.

BOULDER LAKE, Lolo NF. A Type II Incident Management Team (Cowin) has been ordered. No other information was available.
BOYER, Montana State. A Type II Incident Management Team (Specht) has been ordered. No other information was available.

GILBERT CREEK, Lolo NF. A Type II Incident Management Team (Gauger) has been ordered. No other information was available.

WAPITO, Clearwater NF. A Type II Incident Management Team (Colla) has been ordered. No other information was available.

BITTERROOT COMPLEX, Bitterroot NF. A Type I Incident Management Team (Kohut) has been ordered. No other information was available.

WEST FORK WILDERNESS FIRES, Bitterroot NF. An Interagency Fire Use Management Team (Wallace) is assigned.

MOOSE COMPLEX, Nez Perce NF. An Interagency Fire Use Management Team (Johnson) is assigned. These fires are located in the Selway-Bitterroot Wilderness.

SOUTHERN CALIFORNIA LARGE FIRES:
JUNIPER, Riverside Ranger Unit, California Department of Forestry. A State Type I Incident Management Team (Heil) is assigned. This fire is located 15 miles east of Perris. Good progress was made on containment yesterday with demobilization in progress. Ground survey and damage assessment continues. Seventy-four structures were destroyed, 39 homes and 35 outbuildings.

WILDCAT, San Diego Ranger Unit, California Department of Forestry. A State Type I Incident Management Team (O'Leary) is assigned. This fire is located southwest of Ramona. Firefighters made good progress toward containment objectives resulting in the start of demobilization.

SANTIAGO CANYON, Orange County, California State. A State Type II Incident

Management Team (Henderson) is assigned. Afternoon thunderstorms produced strong shifting winds causing the fire to cross an eight-lane highway and burn into a military installation. The current threat is to several communities.

DELUZ, Camp Pendleton Marine Corps Base. A Type II Incident Management Team (Bacon) is assigned. This fire is located on the Camp Pendleton Base near Fallbrook. Good progress was made yesterday and full containment was expected last evening.

## EASTERN GREAT BASIN LARGE FIRES:

BUCKSKIN, Fort Hall Agency, BIA. The fire is located 20 miles northeast of Pocatello. The fire burned rapidly to the north and east threatening numerous residences. A major power line crossing the fire area was turned off so crews could operate safely. Numerous retardant drops supported ground operations.

LAID LOW, Salmon-Challis NF. A Type I Incident Management Team (Richer) is assigned. This fire is burning in an area of heavy bug kill, 12 miles northwest of Stanley. Helitorch operations were suspended yesterday to allow completion of hand firing. Consideration is being given to allow fire spread to natural boundaries in the wilderness area. Direct control continues on the west flank, where 100,000 feet of hose is deployed. Transition to a replacement Type I Team (Monahan) is scheduled for today.

NORTH FORK COMPLEX, Salmon-Challis NF. A Type II Incident Management Team (Hefner) is assigned. This complex is located approximately 20 miles northwest of Salmon. Increased activity occurred on the Sheepeater and Horse Butte fires.

MAIN SALMON COMPLEX, Salmon-Challis NF. An Interagency Fire Use Management Team (Zimmerman) is assigned. This complex is 40 miles west northwest of Salmon. The complex consists of 15 fires in the Frank Church River of No Return Wilderness on the Salmon-Challis, Payette, Nez Perce and Bitterroot National Forests. Emphasis was concentrated on mitigating threats to boundaries and structures on the Longknife Fire and to developed areas near the Arctic Fire.

NORTHWEST LARGE FIRES:
JORDAN CREEK, Washington State. A State Incident Management Team (Mesenbrink) is assigned. This fire is burning in slash, reproduction and standing timber on a steep slope south of Marblemount. A fireline explosives team is assisting crews establishing control lines in steep and difficult terrain. The fire continued to be active yesterday. Rolling materials continue to pose a threat to firefighters.

ELK LAKE, Deschutes NF. A Type II Incident Management Team (Andrade) is assigned. This fire is located one mile west of Elk Lake. Spotting across Highway 46 has resulted in the closure of a portion of the highway. All nearby recreational areas, as well as summer homes in the area have been evacuated.

McKAY BUTTE, Deschutes NF. A Type II Incident Management Team (Solarz) is assigned. This fire is approximately 20 miles east of La Pine. No other information is available at this time.

## NORTHERN CALIFORNIA LARGE FIRES:

HAUL, Mendocino NF. A Type II Incident Management Team (Madden) is assigned. (Madden has assumed command of both the Haul and Garcia Fires.) This fire is located 60 miles west of Willows. Spotting outside of containment lines has caused the fire to spread into heavy timber and a steep drainage west of Lake Pillsbury. Access is extremely difficult and winds are causing control problems.

GARCIA, Mendocino NF. A Type II Incident Management Team (Madden) is assigned. The fire is located 65 miles west of Willows. The Garcia consists of five fires burning in heavy logging slash and timber. Steep terrain and hot dry weather continues to hamper containment.

MIDDLE, Lake Napa Ranger Unit, California Department of Forestry. A State Incident Management Team (Holmes) is assigned. Heavy demobilization is in progress and some resources are being diverted to the fires on the Mendocino

NF .

## OUTLOOK:

A FIRE WEATHER WATCH IS IN EFFECT FOR SOUTH-CENTRAL OREGON TO CENTRAL CALIFORNIA FOR VERY DRY CONDITIONS ALONG WITH DRY THUNDERSTORMS.

Weather for the western U.S. will be very dry with near record high temperatures in the Northwest, upper Great Basin and Northern Rockies. There may be a chance of dry thunderstorms from south-central Oregon to central California. Scattered wet thunderstorms are forecast for Arizona, New Mexico, southern Nevada, southern Utah and southern Colorado. High temperatures will be in the 90's to 109 , except for mid 70's and 80's in the mountains.
