INCIDENT MANAGEMENT SITUATION REPORT FRIDAY, SEPTEMBER 4, 1998 - 0530 MDT NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack and large fire activity continued in the Northern Rockies, Northwest, Eastern Great Basin, and Northern California Areas. The National Interagency Coordination Center processed orders for helicopters, equipment, crews, overhead, caterers, showers and radio systems. Hot and dry weather continues to keep fire danger ratings high to extreme in many areas of the West. Very high to extreme indices were reported in Texas, Arizona, Utah, Nevada, California, Oregon, Washington, Idaho, Wyoming, Montana, South Dakota and Nebraska.

NORTHERN ROCKIES LARGE FIRES:

DOME, Kootenai NF. A Type I Incident Management Team (Foster) is assigned. This wind driven fire is burning in steep, inaccessible terrain about 6 miles west of Libby. Current threats are to residential homes and the town of Libby.

High winds are expected today.

BOYER, Montana State. A Type II Incident Management Team (Specht) is assigned. The fire made significant runs today, burning up along Henry Creek. Engines, crews and dozers effectively protected 12 to 16 primary residences. The fire is moving into steeper, rockier country where control will be more difficult. Current threats include structures and a timber sale area.

BITTERROOT COMPLEX, Bitterroot NF. A Type I Incident Management Team (Kohut) will arrive today. The fire is located 6 miles south of Darby. The North Rye fire threatened homes and residents were evacuated yesterday. Smokejumpers constructed fireline around the 50 acre Colter fire.

BRADSHAW, Montana State. A Type II Incident Management Team (Milburn) is assigned. This fire is located 40 miles east of Miles City. Crews made good progress on line construction and burnout operations. The fire did not get as large as expected yesterday.

CHALLENGE, Flathead NF. A Type I Incident Management Team (Frye) is assigned. The fire is located about 40 miles east northeast of Kalispell. The fire expanded on both north and south flanks today. Much of the fire is burning in remote, roadless country, with steep, rocky slopes and rugged terrain. Current threats include two cabins and sensitive Blackfeet Tribal Cultural Sites.

HERMAN RIDGE, Miles City District, BLM. A Type II Incident Management Team (Williams) is assigned. This fire, located 30 miles northwest of Jordan, is burning in grass, ponderosa pine and juniper. Shifting winds and steep inaccessible terrain caused unpredictable fire behavior. Three ranch homes are currently threatened.

GILBERT CREEK, Lolo NF. A Type II Incident Management Team (Gauger) is assigned. The fire is located 24 miles southeast of Missoula in the

Sapphire Mountains. This lightning holdover escaped initial attack on 9/2 and burned up into the steep headwaters of Gilbert Creek to the Bitterroot/Rock Creek Divide. Current threats include eighty loads of decked logs and a sensitive watershed drainage for bull trout.

BOULDER LAKE, Lolo NF. A Type II Incident Management Team (Cowin) is assigned.

There is concern about high temperatures and low relative humidities coupled with possible dry lightning predicted this weekend.

WAPITO, Clearwater NF. A Type II Incident Management Team (Colla) is assigned. This fire is located about 50 miles west southwest of Missoula. The fire is burning in a steep and remote area with access limited to helicopters.

KOPSI CREEK, Kootenai NF. A Type II Incident Management Team (Feser) has been ordered. The fire is located about 10 miles east of Eureka. No other information was available.

BLACKFEET COMPLEX, Blackfeet Agency, BIA. A Type II Incident Management Team (Swope) is assigned. Firefighters made good progress toward containment yesterday on the Red Eagle Lake fire in spite of strong winds. Efforts to detect any hold over fires continued. Some resource demobilization is in progress.

WEST FORK WILDERNESS FIRES, Bitterroot NF. An Interagency Fire Use Management Team (Wallace) is assigned. No new information was available.

MOOSE COMPLEX, Nez Perce NF. An Interagency Fire Use Management Team (Johnson) is assigned. These fires are located in the Selway-Bitterroot Wilderness.

SOUTHERN CALIFORNIA LARGE FIRES:

JUNIPER, Riverside Ranger Unit, California Department of Forestry. A State

Type I Incident Management Team (Heil) is assigned. This fire is located 15 miles east of Perris. Good progress was made and full containment was expected last night. Confirmed property losses were 44 residential dwellings, 46 other structures and 98 vehicles.

WILDCAT, San Diego Ranger Unit, California Department of Forestry. A State Type I Incident Management Team (O'Leary) is assigned. This fire is located southwest of Ramona. No new information was received.

SANTIAGO CANYON, Orange County, California State. A State Type II Incident Management Team (Henderson) is assigned. A slopover was contained at 200 acres. Heavy demobilization is expected to begin today.

DELUZ, Camp Pendleton Marine Corps Base. A Type II Incident Management Team (Bacon) is assigned. This fire is located on the Camp Pendleton Base near Fallbrook. No new information was received.

EASTERN GREAT BASIN LARGE FIRES:

BUCKSKIN, Fort Hall Agency, BIA. The fire is located 20 miles northeast of Pocatello. Firefighters continued to construct dozer line and conduct burnout operations. Control problems include hot, dry weather and heavy fuel loading.

NORTH FORK COMPLEX, Salmon-Challis NF. A Type II Incident Management Team (Hefner) is assigned. This complex is located approximately 20 miles northwest of Salmon. The Sheepeater, Little Cayuse, and Lower Ebb fires burned actively. Helicopters were effective in working slopovers. The terrain is too steep to safely deploy ground crews on the Sheepeater Fire.

MAIN SALMON COMPLEX, Salmon-Challis NF. An Interagency Fire Use Management Team (Zimmerman) is assigned. This complex is 40 miles west northwest of Salmon. The complex consists of 15 fires in the Frank Church River of No Return Wilderness on the Salmon-Challis, Payette, Nez Perce and Bitterroot National Forests. Smoke conditions prevented fire mapping yesterday.

LAID LOW, Salmon-Challis NF. A Type I Incident Management Team (Richer) is assigned. This fire is burning in an area of heavy bug kill, 12 miles northwest of Stanley. No new information was received.

NORTHWEST LARGE FIRES:

JORDAN CREEK, Washington State. A State Incident Management Team (Mesenbrink) is assigned. This fire is burning in slash, reproduction and standing timber on a steep slope south of Marblemount. The fire continued to be active yesterday. No further information was received. ELK LAKE, Deschutes NF. A Type II Incident Management Team (Andrade) is assigned. This fire is located one mile west of Elk Lake. The fire did not get much larger yesterday. Control problems include extreme weather conditions and numerous structures needing protection. All nearby recreational areas, as well as thirty summer homes, have been evacuated. Four structures were destroyed.

McKAY BUTTE, Deschutes NF. A Type II Incident Management Team (Solarz) is assigned. This fire is located about 20 miles east of La Pine. The head of the fire is burning to the south, away from the Monument. Concern remains for some sub-divisions near LaPine due to dry fine fuels and large areas of bug killed trees in the vicinity.

NORTHERN CALIFORNIA LARGE FIRES:

HAUL, Mendocino NF. A Type II Incident Management Team (Madden) is assigned. (The Team has assumed command of both the Haul and Garcia Fires.) This fire is located 60 miles west of Willows. Steep terrain and rolling material combined with temperatures of 100+ degrees and low humidities are hampering containment.

GARCIA, Mendocino NF. A Type II Incident Management Team (Madden) is assigned. The fire is located 65 miles west of Willows. The Garcia consists of five fires burning in heavy logging slash and timber. No other information was received.

WESTERN GREAT BASIN LARGE FIRES:

CROWLEY CREEK, Winnemmucca District, BLM. The fire is located 70 miles north northeast of Winnemmucca. The current threat is to riparian cutthroat trout habitat.

TOQUOP, Ely District, BLM. This fire is located 50 miles south southeast of Caliente. Erratic fire behavior was observed. Air tankers were used in conjunction with engines, water tenders and crews to attack the fire.

OUTLOOK:

FIRE WEATHER WATCHES ARE POSTED IN WESTERN MONTANA, IDAHO, OREGON (EXCEPT THE NORTHWEST CORNER), WASHINGTON, AND NORTHERN CALIFORNIA FOR DRY

CONDITIONS, DRY LIGHTNING AND GUSTY WINDS. Weather for the western U.S. will continue to be hot with isolated to scattered afternoon/evening thunderstorms. It will be mostly dry in the Pacific Northwest. Thunderstorms in the southwest states, however, will be mostly wet. High temperatures are expected to range from the 90's to 110 in the valleys and from the mid 70's to 80's in the mountains.
