

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, JULY 5, 1999 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Large fire activity continued in the Great Basin and Rocky Mountain Areas. Increased initial attack activity was reported in California. Large acreage increases continued to be reported on limited suppression action fires in Alaska. The National Interagency Coordination Center mobilized an infrared aircraft, airtankers, helicopters, caterers, shower units, radio equipment, engines, crews and miscellaneous overhead. High to extreme fire indices were reported in Nevada, California, Arizona, New Mexico, Utah, Colorado, Alaska, Wyoming, west Texas and Idaho.

EASTERN GREAT BASIN LARGE FIRES:

RAILROAD, Richfield Field Office, BLM. A Type I Incident Management Team (Storey) is assigned. This fire is 24 miles northwest of Nephi, UT. Strong gusty winds continued from the southwest. The most active part of the fire was the west flank. Personnel will continue direct attack with engines and dozers followed by hand crews.

WRIGLEY, Moab Field Office, BLM. A Type II Incident Management Team (Suwyn) is assigned. This fire is 50 miles southwest of Grand Junction, CO and has burned into the Black Ridge Complex on Grand Junction District, BLM. Natural barriers helped slow the fires spread. There was moderate fire behavior observed. Terrain and access are difficult, but crews are making good progress. Coordination with the Black Ridge Complex continues.

MEADOW SPRING, Cedar City Field Office, BLM. This fire is 60 miles northwest of Cedar City, UT. The fire made significant runs to the northeast. High winds limited airtanker usage. High winds, low relative humidity, limited access and steep rocky terrain are hindering suppression efforts.

WEST MOUNTAIN II, Uinta National Forest. This fire is five miles from Genola, UT. The fire made significant runs in unburned fuels within the interior. Persistent strong winds pushed the fire across control lines. The fire made significant runs throughout the day.

RUSH, Northwest Utah State. This fire is three miles west of Stockton, UT. No new information was received.

STEAMBOAT, Moab Field Office, BLM. This fire is 50 miles southwest of Grand Junction, CO in a remote area. Ten smokejumpers will be demobilized today and replaced with two type II crews. No problems are anticipated.

ROCKY MOUNTAIN AREA LARGE FIRES:

BIRTHDAY, Craig District, BLM. This fire is near Maybell, CO. Current threats are to a microwave tower, communication site and a ranch house one and a half miles from the fire. Control efforts are hampered by steep rocky terrain, inaccessibility, high winds and erratic fire behavior.

BLACK RIDGE COMPLEX, Grand Junction District, BLM. A Type II Incident Management Team (Sexton) is assigned. The fires in this complex are 20 to 25 miles west of Grand Junction, CO. The Tom's Canyon fires and the fires in the Black Ridge Wilderness Study Area comprise this complex. The Wrigley fire (Moab Field Office) has burned into this complex. The Incident Management Teams of the two fires are working closely together, sharing resources and coordinating plans. Strong winds caused major runs.

NORTH RIDGE, Craig District, BLM. A Type II Incident Management Team (Hart) is assigned. This fire is near Meeker, CO. Crews continued to make good progress despite high winds, high temperatures, low relative humidity and difficult terrain.

WESTERN GREAT BASIN LARGE FIRES:

PAH RAH, Carson City District, BLM. This fire is north and east of Sparks, NV. Rapid rates of spread and limited road access are hampering containment efforts. Flame lengths of six to 10 feet were observed on the fire yesterday.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC	EST LOSS	\$\$\$ C-T-D

EKD = Elko Field Office, BLM

NORTHERN CALIFORNIA LARGE FIRES:

LOWDEN, California Department of Forestry, Shasta-Trinity Ranger Unit. A State Type I Incident Management Team (Johnson) is assigned. This fire is near the community of Lewiston, CA. The fire experienced two slopovers due to winds and low humidities. Personnel are concentrating on improving lines and mopping up the interior.

OUTLOOK:

As the upper level trough over the northwestern states moves into Canada, an upper-level high pressure system will begin to build over eastern Colorado and northern New Mexico. Moving up the western flank of this high will be monsoonal moisture which will bring scattered mountain thunderstorms to western New Mexico and eastern Arizona. Widely scattered thunderstorms will reach into southwestern Colorado, with isolated thunderstorms over northern Colorado and southeastern Utah at the northern fringe of the moisture plume. Western Colorado may see some dry thunderstorms, with low relative humidities forecast for 5-15% in Colorado's northwest plateau.

No other precipitation is expected over the western states except a few showers in extreme north Washington, Idaho and Montana. Mostly sunny conditions will prevail throughout the Great Basin, Northwest and California. The southern deserts of California will have southwest winds at 10 to 20 MPH.

A cold front associated with the exiting northern trough will stretch along the eastern borders of Montana and Wyoming early this morning. In the wake of this front, southwest winds of 15 to 25 MPH with a few gusts to 35 MPH will blow across eastern and southern Wyoming as well as

northern and northwestern Colorado. Near Red Flag conditions are posted for strong winds and low relative humidity in south-central Wyoming.

High temperatures will range from the 60's to mid 70's along the Pacific coast and from the 70's to lower 80's in Oregon, Washington, Idaho, Montana and Wyoming. Inland California, Nevada, Utah and the higher elevations in Arizona and New Mexico will be in the 80's and 90's. The lowest valleys from southern Utah to the Mexican border will experience highs from the 90's to 112 degrees.
