

INCIDENT MANAGEMENT SITUATION REPORT  
 FRIDAY, JULY 16, 1999 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Moderate initial attack activity was reported in most Areas. Containment objectives were reached on most existing large fires in the California and Western Great Basin Areas. In addition to the fires reported below in Alaska's large fire narratives, the state has 58 fires burning in limited and modified protection areas for a total of 775,557 acres. The National Interagency Coordination Center mobilized an air attack aircraft, helicopters and miscellaneous overhead. High to extreme fire indices were reported in Alaska, Oregon, Washington, California, Idaho, Utah, Nevada, Wyoming and West Virginia.

ALASKA LARGE FIRES:

KINK, Northern Field Office, BLM. This fire was started by lightning on June 12 and is currently burning three miles north of Chicken, Alaska. Crews completed a break along the fire edge from a dozer line to Franklin Creek. Crews are working to secure the Franklin cabins along the creek. The contingency plan is complete and in place for structure protection in Chicken and surrounding communities.

ROUNDAABOUT MOUNTAIN, Koyukuk NWR, FWS. This lightning-ignited fire started ten miles south of Huslia, Alaska. Precipitation and increased relative humidity have decreased fire activity. Crews are performing a direct attack on the western flank of the main fire and continuing to mop-up the spot fire on the east bank of the Koyukuk River.

JACKSON, Doyon Native Corporation. This fire is burning in black spruce ten miles east of Tanana, Alaska. Crews made excellent progress despite low relative humidity, high temperatures and steady winds. Crews constructed saw line around 50 percent of the fire, and cold trailed 40 percent.

PITCHUK, Doyon Native Corporation. This fire is seven miles southwest of Bettles, Alaska. Crews made good progress on the right flank to the head of the fire and on 70 percent of a large slopover.

MARSHALL CREEK, Alaska State. This fire was started by lightning on July 2, eight miles southwest of Rampart, Alaska. Planned burnouts on the fire were not completed because of high relative humidity. Mop-up of the perimeter of two allotments was completed. Some resources were released.

-----

WESTERN GREAT BASIN LARGE FIRES:

STILLWATER, Carson City District, BLM. This fire is near Fallon, NV in the Jobs Peak Wilderness Study Area. This fire is being managed to accomplish resource objectives.

OUTLOOK:

\*\*\* A FIRE WEATHER WATCH IS POSTED THIS AFTERNOON FOR THE EAST SIDE OF THE CASCADES IN SOUTHERN WASHINGTON AND THE SOUTHERN COLUMBIA BASIN FOR DRY THUNDERSTORMS. \*\*\*

\*\*\* A FIRE WEATHER WATCH IS POSTED THIS AFTERNOON FOR SOUTH CENTRAL OREGON FOR MODERATE WINDS AND DRY CONDITIONS. \*\*\*

A upper level trough is digging into the northwest states today. An associated weak surface low pressure with a dry cold front will move through Oregon and Washington then into Idaho. The main moisture with this system will bring showers and isolated wet thunderstorms into Washington, with the possibility of isolated dry thunderstorms in eastern Washington and the northeast Oregon mountains. Behind the front, west winds of 15 to 25 MPH are expected on the east side of the Cascades. The trough will also kick off a few afternoon thunderstorms over the Idaho and Montana border. High temperatures will be mostly in the 70's and 80's in northern Idaho and Washington, with 80 to 90 in eastern Oregon and southern Idaho.

Monsoonal moisture will bring scattered wet thunderstorms to northern Arizona, New Mexico, Utah and southern Colorado. Isolated to widely scattered storms are expected over eastern Nevada, most of Wyoming and northwestern Colorado. California will be sunny with patchy morning

stratus and fog on the coast. High temperatures will range in the 80's and 90's with the Southwestern deserts reaching 100 to 105 degrees.

In Alaska, the Mat-Su Valley and McGrath will be mostly cloudy with scattered showers, light winds and highs in the upper 50's and 60's. The Upper Yukon and Northern Region will be mostly cloudy with showers and isolated thunderstorms. High temperatures will be 70 to 75. The Tanana Zone will be cloudy with showers. High temperatures will be 65 to 70.
