

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, AUGUST 13, 1999 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Containment objectives were reached on the large fires in the Western Great Basin and Northwest Areas. Moderate initial attack activity was reported in the Northwest, California, Eastern, and Southern Areas. The National Interagency Coordination Center processed orders for miscellaneous overhead, smokejumper aircraft, and radio equipment. The NIFC jet will demobilize ten crews from the Western Great Basin to the Southwest Area today. Very high to extreme fire indices were reported in Washington, Oregon, California, Idaho, North Dakota, South Dakota, Montana, Utah, Wyoming, Nevada, Connecticut, Delaware, Massachusetts, Maryland, Maine, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, West Virginia, Oklahoma and Georgia.

EASTERN GREAT BASIN LARGE FIRES:

SOLDIER, Salmon/Challis National Forest. A Fire Use Team (Sexton) is assigned. No new information was received.

RAMEY, Payette National Forest. A Fire Use Team (Hescock) is assigned. This wildland fire use incident is being monitored by the Sheepeater Lookout and by aerial reconnaissance. Fire activity has been minimal due to precipitation and high relative humidities.

SCOTT CREEK, Sawtooth National Forest. A Fire Use Team (Fay) is assigned. The fire is being monitored by aerial reconnaissance. No fire activity occurred yesterday due to high relative humidities, cooler temperatures and little wind.

BROKEN WAGON, Lower Snake River District, BLM. This fire is located 15 miles south of Bruneau, Idaho. Containment efforts were hampered by high rates of spread and rolling terrain.

WEF = Wenatchee National Forest

NORTHERN ROCKIES LARGE FIRES:

RENSHAW, Nez Perce National Forest. This fire is 22 miles east of Lowell, ID. The fire is burning in the Selway Bitterroot Wilderness, and is being managed as a wildland fire use incident. The fire received some precipitation yesterday, which significantly reduced fire activity.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	EST LOSS	\$\$\$ C-T-D
RENSHAW	ID	NPF	107	0	UNK	3	0	0	0	0	NR	.5K

EASTERN AREA LARGE FIRES:

CROW'S NEST, New York State. This fire is located on the northern edge of the West Point Military Reservation, two miles south of Cornwall-on-Hudson, New York. The fire is burning in an area that has been used as an artillery impact area for the U.S. Military Academy since the 1830's. Complete containment of this 900 acre fire is anticipated today. A burnout operation yesterday was successful. Military personnel are patrolling the fireline for hot spots. The New York National Guard, New York Rangers, and U.S. Military Academy aircraft continue to support the incident.

OUTLOOK:

The upper level low pressure area that was over the Great Basin Wednesday will move into the upper plains by Thursday morning. Another upper level low will form off the Pacific northwest coast Thursday morning, which will generate scattered showers and thunderstorms along the Cascade range during the day. Residual moisture and surface heating will cause widely scattered to scattered showers and thunderstorms to form over the Great Basin in the afternoon.

Southern Nevada will be mostly sunny with afternoon temperatures around 105. Maximum temperatures along the west coast will again be in the 60's , following the usual morning low clouds, fog, and drizzle. In the mountains, highs will be in the mid 60's to lower 80's. In the lower valleys, highs will be in the mid 80's to the upper 90's.

Minimum relative humidities will range from 50 percent along the coast to around 20 percent in the inland valleys. Winds will be light, except near thunderstorms.
