

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY SEPTEMBER 3, 1999 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL IV

CURRENT SITUATION:

Initial attack activity was moderate in the Southern Area and minimal in most other areas. New large fire activity was reported in the Eastern Great Basin Area. Large fire activity continued in the Northern California, Southern California, Eastern Great Basin, Northern Rockies and Southern Areas. The National Interagency Coordination Center mobilized infrared aircraft, telecommunications equipment, engines, crews, and miscellaneous overhead. Very high to extreme fire indices were reported in Oregon, Washington, California, Montana, Idaho, Utah, Nevada, Arizona, South Dakota, Kentucky, Alabama, Indiana, Tennessee and Texas.

SOUTHERN CALIFORNIA LARGE FIRES:

WILLOW, San Bernardino National Forest. A Type I Incident Management Team (Stutler) is assigned. This fire is located near Willow Creek, northeast of Lake Arrowhead, CA. Containment firelines are holding on the south and west flanks. Improvement and burnout operations of the east flank are continuing. Precautionary evacuations have been lifted as of 1800 yesterday. Forest closures are still in effect.

MIXING, San Bernardino National Forest. A Type II Incident Management Team (Conrad) is assigned. This fire is located on State Highway 243 near Mountain Center, CA. This will be the last report unless new information is received.

BRIDGE, Angeles National Forest. A Type I Incident Management Team (Carvalho) is assigned. This fire is located on Highway 39 north of the city of Azusa, CA. Due to higher relative humidity and lower temperatures firefighters are able to use direct attack.

NORTHERN CALIFORNIA LARGE FIRES

MHRD COMPLEX, Plumas National Forest. A Type I Incident Management Team (Giachino) is assigned. Three uncontained fires continue to burn activity during the daytime operational period. Good progress was made constructing indirect fireline on the Lookout fire.

HIGH COMPLEX, Shasta-Trinity National Forest. A Type I Incident Management Team (Foster) is assigned. Unified Command with California

Department of Forestry (Young) is in effect. This complex consists of 19 lightning fires 22 miles north of Redding, CA. Smoke continues to affect the Redding and Shasta Lake communities. Good progress continues on fire containment and mopup.

BIG BAR COMPLEX, Shasta-Trinity National Forest. A Type II Incident Management Team (Bacon) is assigned. This complex is 28 miles northwest of Weaverville, CA. The complex consists of five lightning fires, the Onion (3,020 acres), Fawn (1,920 acres), Soldier/Megram (295 acres) and Dee's (1 acre). Burnout operations are proceeding slowly due to mid slope fireline location and variable winds. Indirect fireline has been completed.

EASTERN GREAT BASIN FIRES:

EAST SLICK, Lower Snake River District, BLM. A Type II Incident Management Team (Vorce) is assigned. This fire was expected to be contained on 9/2. This will be the last report unless new information is received.

GOLD SPIKE, Northwest State, Utah. This fire is located adjacent to Golden Spike National Park. Dry, light fuels and brush are contributing to control problems.

OUTLOOK:

A cool upper level trough of low pressure will continue to dominate most of the west even as it moves slowly east. Scattered thunderstorms and rain showers will extend ahead of the trough from eastern Arizona and New Mexico north through the Rockies to Montana. Also associated with and ahead of the trough, are gusty winds to 20 mph.

A stable, drier and warmer air mass will slowly filter into the west coast behind the trough as it moves east. Temperatures Friday will be in the mid 50s to mid 60s along the coast and in most of the mountains, to 70s in the inland valleys. Temperatures will be warming to the 80s and 90s in the southern valleys and to around 100 in the deserts and will continue to warm up going into the weekend across the west.

Minimum relative humidities will range from 50 percent along the coast to 15 to 20 percent in the mountains and lower inland valleys, to 10 percent in the deserts.

A tropical wave along the eastern Texas coast will push moisture north through eastern Texas and eastern Oklahoma and into Arkansas, resulting in scattered showers and thunderstorms. The west will remain dry. Temperatures will continue in the 80s and 90s with minimum relative humidity around 35 percent.
