

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY, SEPTEMBER 4, 1999 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack activity was moderate in the Southern Area and minimal in most other areas. New large fire activity was reported in the Northwest Area. Large fire activity continued in the Northern California and Southern California Areas. The National Interagency Coordination Center mobilized infrared aircraft, telecommunications equipment and miscellaneous overhead. Very high to extreme fire indices were reported in Oregon, Washington, California, Utah, Nevada, Arizona, South Dakota, Kentucky, Alabama, Indiana, Tennessee and Texas.

SOUTHERN CALIFORNIA LARGE FIRES:

WILLOW, San Bernardino National Forest. A Type I Incident Management Team (Stutler) is assigned. This fire is located near Willow Creek, northeast of Lake Arrowhead, CA. The south and west flanks are holding. Improvement and burnout of the east flank is continuing.

BRIDGE, Angeles National Forest. A Type I Incident Management Team (Carvalho) is assigned. This fire is located on Highway 39 north of the city of Azusa, CA. Steep terrain, rolling rocks, low humidity and shifting winds are causing control problems.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	EST LOSS	\$\$\$ C-T-D
WILLOW	CA	BDF	63375	50	UNK	2733	102	41	13	30	NR	6M
BRIDGE	CA	ANF	7100	72	UNK	1073	39	75	7	3	NR	1.3M

NORTHERN CALIFORNIA LARGE FIRES

MHRD COMPLEX, Plumas National Forest. A Type I Incident Management Team (Giachino) is assigned. Steep and rocky terrain are causing control problems. Spike camps are being set up on the remote fires. Fireline construction and firing operations are continuing.

HIGH COMPLEX, Shasta-Trinity National Forest. A Type I Incident Management Team (Foster) is assigned. Unified Command with California Department of Forestry (Young) is in effect. This complex consists of 19 lightning fires 22 miles north of Redding, CA. Burnout operations are in progress and two miles of fireline have been completed with fireline explosives. Mopup and rehabilitation are in progress on some fires in the complex.

BIG BAR COMPLEX, Shasta-Trinity National Forest. A Type II Incident Management Team (Bacon) is assigned. This complex is 28 miles northwest of Weaverville, CA. The complex consists of five lightning fires, the

Onion (3,020 acres), Fawn (1,920 acres), Soldier/Megram (295 acres) and Dee's (1 acre). Indirect fireline has been completed and burnout operations continue. Uphill runs and spotting are expected when the inversion lifts and the weather becomes hotter and drier.

DRY CREEK	OR	ORS	200	100	----	21	0	6	0	NR	NR	NR

ORS = Northeast Oregon District, Oregon State.

OUTLOOK:

Showers, thunderstorms and cool temperatures will continue from central New Mexico north to eastern Montana. The cool upper level trough of low pressure that brought thunderstorms and cool temperatures to the states adjacent to the Rockies will finally move northeast to the plains by Sunday. In the wake of the low pressure trough, skies will clear and temperatures and relative humidities will return to normal from the west coast to the western side of the Rockies. Minimum relative humidities will range from 50 percent along the coast where morning low clouds and fog will continue, 20 to 40 percent in the mountains and 10 percent in the inland valleys and deserts.

A tropical wave along the Texas coast will continue to push moisture north and east through eastern Texas, eastern Oklahoma, Arkansas and east

through the gulf states, resulting in scattered to widely scattered showers and thunderstorms.

At the same time a cool front will push east out of the Rockies and reach northern Texas and western Oklahoma during the day resulting in scattered thunderstorms across west Texas and the balance of Oklahoma.
