OUTLOOK:

*** A RED FLAG WARNING IS POSTED FOR THE SOUTHWEST OREGON COASTAL MOUNTAINS FOR EAST WINDS AND LOW RELATIVE HUMIDITY. ***

*** A RED FLAG WARNING IS POSTED FOR THE NORTHWEST OREGON COASTAL MOUNTAINS FOR NORTH TO NORTHEAST WINDS AND LOW RELATIVE HUMIDITY. ***

*** A FIRE WEATHER WATCH IS POSTED FOR WESTERN OREGON AND WESTERN WASHINGTON FOR EAST WINDS AND LOW RELATIVE HUMIDITY. ***

Surface high pressure in central Oregon and central Washington, coupled with surface thermal low pressure along the coast will set up strong easterly winds and low relative humidities in the coastal mountains of Oregon and Washington. Isolated to widely scattered thunderstorms will continue in California, western Arizona and Nevada from residual moisture from old hurricane Greg and monsoonal moisture. Scattered thunderstorms will occur along the Arizona and New Mexico borders north into Colorado and Utah, where a stationary surface front is located. A cold front moving east into the northern plains will bring scattered rain showers and widely scattered thunderstorms to eastern Wyoming and eastern Montana. Cooler and more stable air will cover the northwest.
