*** A RED FLAG WARNING IS POSTED FOR THE COASTAL AREA AND CASCADE RANGE OF NORTHWEST OREGON FOR STRONG EAST WINDS AND LOW RELATIVE HUMIDITY. ***

The low pressure currently along the west coast will produce strong easterly winds and low relative humidities as high pressure builds in behind it. A cold front moving through Colorado, Arizona and New Mexico will produce gusty northwest winds and cooler temperatures along with scattered showers and thunderstorms. Montana and Wyoming will become dry

with cooler temperatures and gusty northwest winds. The Northwest will have cooler and more stable air.
