

INCIDENT MANAGEMENT SITUATION REPORT  
 WEDNESDAY, SEPTEMBER 15, 1999 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack activity was moderate in California, Southern, and Northwest Areas, and minimal elsewhere. Large fire activity continued in California and the Northwest Areas. Containment objectives were reached on large fires in Western Great Basin and Southern Areas. The National Interagency Coordination Center mobilized infrared aircraft, large transport aircraft, a helicopter, crews, a caterer, a shower, radio equipment, and miscellaneous overhead. Very high to extreme fire indices were reported in Nevada, California, Oregon, Washington, Idaho, Utah, Indiana, South Dakota, Georgia, Alabama, and Tennessee.

NORTHERN CALIFORNIA LARGE FIRES:

BIG BAR COMPLEX, Shasta-Trinity National Forest. A Type II Incident Management Team (Welch) is assigned. This complex is 28 miles northwest of Weaverville, CA. The complex consists of the Onion, Fawn and Soldier/Megram fires. Current concerns are with holding the Fawn fire on the southern and northwest perimeters. The Megram fire is burning actively to the north and northeast. Crews are successfully holding the Onion fire within the existing fireline. Residential structures, key watershed, salmon and steelhead habitat and wilderness areas continue to be threatened.

STEIN, Klamath National Forest. This fire is in the Marble Mountain Wilderness Area, twelve miles northeast of Forks of the Salmon, CA. Transition to a Type III Forest Incident Management Team was completed yesterday. Fire activity is minimal. Crews mopped up remaining hot spots.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	EST LOSS	\$\$\$ C-T-D
BIG BAR COMPLEX	CA	SHF	31293	55	UNK	873	25	38	9	0	NR	11.5M
STEIN	CA	KNF	876	95	9/16	318	3	0	3	0	NR	2.2M
MHRD COMPLEX	CA	PNF	46143	100	---	2197	120	77	7	0	NR	27.5M

SOUTHERN CALIFORNIA LARGE FIRES:

KIRK COMPLEX, Las Padres National Forest. A Type I Incident Management Team (Greenhoe) and a Type II Incident Management Team (Smith) are assigned. This complex is in the Ventana Wilderness, approximately twenty miles southeast of Carmel, CA. The Type I Team is managing the Tassajara and Five fires, while the Type II Team has the Hare and Kirk fires. Fire behavior on both sets of fires is expected to increase significantly today due to warmer and drier weather conditions.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	EST LOSS	\$\$\$ C-T-D
KIRK COMPLEX	CA	LPF	2475	20	UNK	1008	26	16	22	0	NR	3.0M

SOUTHERN AREA LARGE INCIDENTS:

HURRICANE FLOYD. A Type II Incident Management Team (Ferguson) is staged in Atlanta, Georgia, and a Type I Incident Management Team (Melton) is on standby in anticipation of the landfall of Hurricane Floyd some time today or tomorrow. Mandatory evacuation of coastal Florida, Georgia and South Carolina is occurring.

NORTHWEST LARGE FIRES:

MONTEITH ROCK, Willamette National Forest. A Type II Incident Management Team (Gardner) is assigned. This fire is four miles east of Oakridge, OR. Light winds and cooperative weather are aiding suppression efforts. Burnout operations are planned for today to strengthen control lines. The presence of heavy fuels in old-growth timber will require extensive mop up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	EST LOSS	\$\$\$ C-T-D
MONTEITH ROCK	OR	WIF	275	30	9/17	622	30	11	6	0	2.5M	716K

OUTLOOK:

\*\*A FIRE WEATHER WATCH IS POSTED FOR THE WESTERN FLORIDA PANHANDLE FOR LOW HUMIDITY THIS AFTERNOON\*\*

High pressure on the surface and aloft will weaken over the Northwest today. Dry conditions will prevail, along with seasonable temperatures across Washington, Oregon, Idaho, Montana, and Wyoming.

A weak upper level low moving into Utah will bring a chance of afternoon and evening showers and thunderstorms into eastern Nevada, Utah, Arizona, Colorado, and New Mexico. It will remain dry across California as this upper level low moves east.

Southern Texas will be warm and dry as high pressure remains in place. A cold front sagging across northern Texas will create a slight chance for afternoon showers and thunderstorms.
