

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY, SEPTEMBER 18, 1999 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack activity was heavy in the Southern Area and was minimal elsewhere. New large fire activity was reported in the Eastern Great Basin, Eastern and Southern Areas. Large fire activity continued in California, the Northwest and Southern Areas. The National Interagency Coordination Center mobilized helicopters, infrared aircraft, telecommunications equipment, weather equipment, a commissary unit and miscellaneous overhead. Very high to extreme fire indices were reported in Oregon, Washington, California, Idaho, Montana, Utah, Nevada, South Dakota, Wyoming, Illinois, Indiana, Alabama, Georgia, Kentucky, Mississippi, Tennessee, and Texas.

NORTHERN CALIFORNIA LARGE FIRES:

BIG BAR COMPLEX, Shasta-Trinity National Forest. A Type I Incident Management Team (Dubois) is assigned. The complex is 28 miles northwest of Weaverville, CA. The complex consists of the Fawn, Soldier, Megram, and Onion fires. There is concern with the Fawn fire holding on the southern and northwest portions. Fire on the northwest perimeter continues to spread to the west of Jeep Ridge and has crossed to the north side of Soldier Creek. The Megram fire has burned to the south into the Fawn fire and has crossed Virgin Creek to the west and Eagle Creek to the east. The fire is burning northerly toward the Klamath National Forest boundary. Ridge top firelines are being scouted and prepared for holding actions.

			CTN	CTN	PERS					LOSS	LOSS	C-T-D
BIG BAR COMPLEX	CA	SHF	42436	55	UNK	1056	39	51	9	0	NR	14.4M

SOUTHERN CALIFORNIA LARGE FIRES:

KIRK COMPLEX, Los Padres National Forest. A Type I Incident Management Team (Greenhoe) is assigned to the Kirk Complex North, which includes the Tassajara, Five, and Mountain fires. A Type II Incident Management Team (Smith) is assigned to the Kirk Complex South, which includes the Hare and Kirk fires. Unified Command with California Department of Forestry (Haines) is in effect. This complex is in the Ventana Wilderness, approximately twenty miles southeast of Carmel, CA. The Five and Tassajara fires continue to spread both to the northeast, into Miller Canyon and to the south. Indirect fireline construction and preparation for a large burnout continues.

SOUTHERN AREA LARGE INCIDENTS:

HURRICANE FLOYD. A Type I Incident Management Team (Melton) has set up a receiving and distribution center at Shaw Air Force Base. A Type II Incident Management Team (Ferguson) has set up a receiving and distribution center at Dobbins Air Force Base near Atlanta. No new information was received.

BEAVER CREEK, Texas State. This fire is near Lampasa, TX. Containment was expected yesterday. This will be the last report unless new information is received.

FIVE MILE SWAMP, Florida Division of Forestry. This fire is in Santa Rosa County, FL. Current threats are to Moors Golf Course and Interstate 10.

FIVE MILE SWAMP	FL	FLS	870	60	9/20	89	0	5	1	0	NR	NR

NORTHWEST LARGE FIRES:

MONTEITH ROCK, Willamette National Forest. A Type II Incident Management Team (Gardner) is assigned. This fire is four miles east of Oakridge, OR. Light winds and higher relative humidity recovery has aided suppression efforts. Mopup is well under way on the areas of the fire that have cooled down. Resources are beginning to be demobilized. Containment was expected last night.

INS = Indiana State Forestry.

OUTLOOK:

Residual and tropical moisture will continue from eastern California through the Great Basin, eastward to the front range of Colorado and south along the Mexican border. Isolated thunderstorms will continue in the Sierra Nevada and front range of Colorado with scattered thunderstorms in the Great Basin and southwest. Dry flow aloft will keep minimum relative humidities over the Pacific Northwest in the 10 to 20 percent range. Surface winds will be gusty from the east along the Washington coast.

Texas, Louisiana, Mississippi and Alabama will have dry high pressure dominate the gulf states. Florida will have partly cloudy skies and minimum relative humidities of 25 to 30 percent. Moist flow across Florida will cause scattered showers with minimum relative humidities of 40 percent.
