

INCIDENT MANAGEMENT SITUATION REPORT
 SUNDAY, OCTOBER 3, 1999 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Moderate initial attack activity was reported in California. Minimal initial attack activity occurred elsewhere. New large fire activity was reported in the Eastern Great Basin and Southern Areas. The National Interagency Coordination Center mobilized air tankers, helicopters, infrared aircraft, radio equipment, engines, crews, and miscellaneous overhead. Very high to extreme fire indices were reported in Oregon, Washington, California, Idaho, Utah, Colorado, Illinois, and Georgia.

NORTHERN CALIFORNIA LARGE FIRES:

BIG BAR COMPLEX, Shasta-Trinity National Forest. An Area Command Team (Denton), a Type I Incident Management Team (Bateman) and a Type I Incident Management Team (Frye) are assigned. The complex is 28 miles northwest of Weaverville, CA. The complex consists of the Megram and Onion fires. Indirect fireline is being constructed using existing roads and ridges on the west side of the Megram fire.

GUN 2, Tehama-Glenn Ranger Unit, California Department of Forestry. A Unified Command with California Department of Forestry (Johnson) and the U.S. Forest Service (Madden) is in place. The fire is 20 miles east of Redding, CA. Control efforts are being focused in the Mill Creek area. Once fireline construction has been completed, a firing operation is planned.

SOUTHERN CALIFORNIA LARGE FIRES:

KIRK COMPLEX, Los Padres National Forest. A Type I Incident Management Team (Foster) is assigned to the Kirk Complex North, which includes the Tassajara, Five and Mountain fires. A Type I Incident Management Team (Hutchinson) is assigned to the Kirk Complex South, which includes the Hare and Kirk fires. The fire continues to spread north towards the Carmel River and control efforts in the south are being hampered by high temperatures and low relative humidities.

LA JOLLA, Cleveland National Forest. A Type II Incident Management Team (Conrad) is assigned. This fire is near Warner Springs, CA. Current control problems include low relative humidity and steep terrain.

OUTLOOK:

A high pressure aloft will build over the western states with warmer temperatures and lower relative humidities. A weak surface pressure gradient across the west will limit the potential for strong winds. High temperatures in the valleys will be in the 60's to lower 70's east of the Cascade and Sierra Nevada mountains, with 70's to lower 80's elsewhere. The mountain high temperatures will be 10 to 15 degrees cooler than the valleys. Minimum relative humidities will be 10 to 30 percent, except 40 to 60 percent near the coast.

The Gulf states will have increasing clouds, with a chance of showers and thunderstorms in the afternoon. Mostly sunny condition will prevail inland. High temperatures will be in the 80's to lower 90's. Minimum relative humidities will be 30 to 50 percent inland and 60 to 70 percent near the coast.
