

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, OCTOBER 4, 1999 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Moderate initial attack activity was reported in Southern California. Minimal initial attack activity occurred elsewhere. New large fire activity was reported in the Southern California Area. The National Interagency Coordination Center mobilized helicopters, infrared aircraft, radio equipment, a shower unit, commissary, crews, and miscellaneous overhead. Very high to extreme fire indices were reported in Oregon, California, Idaho, Utah, Colorado, Illinois, Indiana, and Georgia.

NORTHERN CALIFORNIA LARGE FIRES:

BIG BAR COMPLEX, Shasta-Trinity National Forest. An Area Command Team (Denton), a Type I Incident Management Team (Bateman) and a Type I Incident Management Team (Frye) are assigned. The complex is 28 miles northwest of Weaverville, CA. The complex consists of the Megram and Onion fires. Steep terrain, heavy fuels and an inversion continue to hamper suppression efforts.

GUN 2, Tehama-Glenn Ranger Unit, California Department of Forestry. A Unified Command with California Department of Forestry (Johnson) and the U.S. Forest Service (Madden) is in place. The fire is 20 miles east of Redding, CA. Access has been difficult, which has slowed firing operations. Control efforts are currently focused on the east side of Mill Creek.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	EST LOSS	\$\$\$ C-T-D

GUN 2	CA	TGU	50973	70	10/8	2947	103	86	33	0	12M	4.4M

SOUTHERN CALIFORNIA LARGE FIRES:

KIRK COMPLEX, Los Padres National Forest. A Type I Incident Management Team (Foster) is assigned to the Kirk Complex North, which includes the Tassajara, Five and Mountain fires. A Type I Incident Management Team (Hutchinson) is assigned to the Kirk Complex South, which includes the Hare and Kirk fires. The fire continued to spread north, has crossed the Carmel River east of Ventana Double Cone and continued to make strong runs against the west flank with spots occurring over the fireline.

LA JOLLA, Cleveland National Forest. A Type II Incident Management Team (Conrad) is assigned. This fire is near Warner Springs, CA. The fire was very active yesterday and made an impressive run down into the Warner Basin. A crew member from a Southwest Type II handcrew received serious

injuries due to being struck by a rolling rock and is currently in critical condition in a San Diego Hospital.

SHOCKEY, San Diego Ranger Unit, California Department of Forestry. This fire is south of Campo, CA. The fire spread rapidly in older heavy fuels, with heavy spotting.

MMU = Madera-Mariposa-Merced Ranger Unit, California Division of Forestry

NORTHWEST AREA LARGE FIRES:

REPEATER, Siskiyou National Forest. A Type II Incident Management Team (Gardner) is assigned. The fire is burning in timber and brush six miles northeast of Brookings, OR. Cooler temperatures and higher relative humidities from a marine layer aided suppression efforts but active fire behavior continued at higher elevations.

OUTLOOK:

*** A FIRE WEATHER WATCH IS POSTED FOR GUSTY SOUTH WINDS AND LOW RELATIVE HUMIDITIES IN SOUTHWEST OREGON. ***

Southwest winds will be on the increase this afternoon from southwestern Oregon to northern California and western Nevada, as a Pacific storm system moves closer to northern California. The onshore winds will bring an increase in relative humidity to the coastal mountains and valleys of northern California, Oregon and Washington. Elsewhere over the western U.S., a broad upper level ridge will keep the West dry with warmer temperatures. High temperatures in the valleys will be mainly in the 70's, except in southern California which will be in the 80's. The mountain high temperatures will be in the 60's. Afternoon minimum relative humidities will generally range from 15 to 30 percent inland and 50 to 70 percent near the coast.

A cold front will be crossing the Gulf states bringing cooler temperatures with a chance of showers and thunderstorms over the eastern portion. High temperatures will be in the mid 70's to upper 80's. Minimum relative humidity will be 30 to 50 percent inland and 60 to 70 percent near the coasts.
