

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, OCTOBER 7, 1999 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

New large fire activity was reported in the Eastern Great Basin, Southern California and Southern Areas. Containment objectives were reached on fires in the Northwest, Northern California, Southern California, and Southern Areas. Initial attack activity was light. The National Interagency Coordination Center mobilized infrared aircraft, large transport aircraft, a helicopter, engines, heavy equipment, crews, and miscellaneous overhead. Very high to extreme fire indices were reported in California, Oregon, Utah, Idaho, Montana, Wyoming, Colorado, Georgia, and Illinois.

NORTHERN CALIFORNIA LARGE FIRES:

BIG BAR COMPLEX, Shasta-Trinity National Forest. An Area Command Team (Roberts), a Type I Incident Management Team (Bateman) and a Type I Incident Management Team (Frye) are assigned. The complex is 28 miles northwest of Weaverville, CA. The complex consists of the Megram and Onion fires. Indirect fireline on the south, west and northwest flanks of the Megram fire is complete. The southern portion of the complex received one quarter inch of rain, but a drying trend is expected for the next five days. Good visibility, clearing skies in the afternoon and minimal fire activity allowed crews to make good progress yesterday.

TGU = Tehama-Glenn Ranger Unit, California Department of Forestry

SOUTHERN CALIFORNIA LARGE FIRES:

KIRK COMPLEX, Los Padres National Forest. A Type I Incident Management Team (Foster) is assigned to the Kirk Complex North, which includes the Tassajara, Five and Mountain fires. A Type I Incident Management Team (Hutchinson) is assigned to the Kirk Complex South, which includes the Hare and Kirk fires. On the Kirk Complex North, a contingency fireline was prepared yesterday between Ventana Cone and Uncle Sam Mountain. Concerns include the Carmel River Watershed, the Ventana Wilderness and numerous structures. Weather halted firing operations but aided mopup on the Kirk Complex South yesterday. Crews continued to improve fireline, preparing for the possibility of resuming firing operations when winds are favorable.

LA JOLLA, Cleveland National Forest. A Type II Incident Management Team

(Conrad) is assigned. This fire is near Warner Springs, CA. Construction and reinforcement of fireline continued yesterday in anticipation of predicted Santa Ana winds. Extensive mopup will continue for the next several days.

WILLIAMS, Sequoia and Kings Canyon National Park. This lightning ignited fire, which started on 9/18, is being managed to accomplish resource objectives. Fireline construction and burnout operations took place yesterday to protect an archeological site. This will be the last report unless other significant activity occurs.

RSS = Sierra South Region, California Department of Forestry

EASTERN GREAT BASIN LARGE FIRES:

DOG VALLEY, Cedar City Field Office, BLM. This fire is burning 15 miles southeast of Beaver, UT. Current threats include power lines and wildlife habitat. Containment is expected today.

QUEASY, Sawtooth National Forest. This lightning ignited fire, which is 10 miles southwest of Stanley, ID, is being managed to accomplish resource objectives. The fire exhibited minimal spread from mid-August until late September. In the past week low humidities and wind have increased the fire's size sixfold. Smoke settling in the Stanley Valley and Grandjean forced closure of the Payette River Trail. This will be the last report unless significant activity occurs.

OUTLOOK:

A RED FLAG WARNING IS POSTED FOR SOUTHERN CALIFORNIA TODAY FOR LOW HUMIDITY AND GUSTY NORTH WINDS THROUGH AND BELOW MOUNTAIN PASSES AND CANYONS

After passage of a Pacific storm through the Intermountain west, high pressure will build today, resulting in dry conditions and warmer temperatures throughout the west. Santa Ana winds gusting to 50 MPH and a minimum relative humidity of 15 percent are forecast for southern California. Temperatures will range from the 50's and 60's along the northwest coast, 70's and 80's in the Great Basin, and up to the lower 90's in the southwest deserts. Western Washington will be cloudy with showers this afternoon as a Pacific storm moves into the area.

The Gulf states will have increasing clouds and showers by afternoon. Dry

conditions with partly cloudy skies will prevail in the northern portions of the Gulf states. High temperatures will be in the 80's and 90's, with little change in relative humidity.
