

INCIDENT MANAGEMENT SITUATION REPORT  
 TUESDAY, NOVEMBER 23, 1999 - 0800 MST  
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Moderate to high initial attack activity continued in the Southern and Eastern Areas. Containment objectives of large fires were met in the Southern Area and demobilization of resources is starting to occur. Very high to extreme fire indices were reported in Arizona, North Dakota, Nebraska, South Dakota, Missouri and Oklahoma.

SOUTHERN AREA LARGE FIRES:

STANTON COMPLEX, Daniel Boone National Forest. A Type I Incident Management Team (Bennett) is in place and is now managing all fires on the Stanton Ranger District. The fires are eleven miles east of Stanton, Kentucky. Drying fuels produced increased fire activity.

AVEY COMPLEX, National Forests in North Carolina. A Type II Incident Management Team (Kearney) is assigned. The fires are five to eight miles from Robbinsville, North Carolina. The team is also managing the Citico Fire on the Cherokee National Forest. Crews are continuing with rehabilitation efforts.

CITICO, Cherokee National Forest. A Type II Incident Management Team (Kearney) is assigned. Good progress was made on fireline construction and burn out operations.

 VAF = George Washington & Jefferson National Forest's

OUTLOOK:

There will be a chance of showers and thunderstorms for Kentucky, Tennessee, Virginia and North Carolina. The rest of the south can expect morning fog and cloudy conditions. High temperatures will be from the mid 60's to around 70 degrees and minimum humidities can be expected to be in the 55 percent range.

An upper trough will move through the central United States today and

continue northeastward bringing thunderstorms and cooling for Oklahoma and Missouri. Temperatures will range from 55 to 60 degrees.

Southern California's offshore winds should decrease today and temperatures will moderate as a dry Pacific trough moves inland. Winds are forecasted to strengthen behind the trough for Wednesday and Thursday. Conditions will be mostly cloudy with highs in the 40's in the mountains and 55 to 65 in the valleys. There will be local northwest winds from 10 to 20 MPH and relative humidities 20 to 40 percent in the mountains and 10 to 15 percent in the valleys.
