

INCIDENT MANAGEMENT SITUATION REPORT
 TUESDAY, MAY 9, 2000 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

Major growth occurred on the large fires in New Mexico and Texas. The National Interagency Coordination Center mobilized air tankers, helicopters, lead planes, infrared aircraft, radio equipment, meteorological equipment, engines, and miscellaneous overhead. Very high to extreme fire indices were reported in Arizona, New Mexico, Texas, California, Oklahoma, North Dakota, Indiana, and Michigan.

SOUTHWEST AREA LARGE FIRES:

CERRO GRANDE, Bandelier National Monument. A Type I Incident Management Team (Humphrey) is assigned. The fire is burning in mixed conifer one mile southwest of Los Alamos, NM. The fire is threatening the Los Alamos Laboratory, residences in the city of Los Alamos, gas pipelines, and endangered species. Some voluntary evacuations have taken place. Challenges to containment include heavy fuels, high winds, and long range spotting.

CREE, Lincoln National Forest. A Type I Incident Management Team (Hart) is assigned. The fire is burning in pinyon-juniper forest near Ruidoso, NM. High winds and low relative humidities are causing containment problems. Most of the fire's spread was on the north flank. Precautionary evacuations of several subdivisions in the city of Ruidoso were initiated. One Type 6 Forest Service engine was damaged in a burnover on Sunday, but no injuries resulted.

COON CREEK, Tonto National Forest. A Type I Incident Management Team (Bateman) is assigned. The fire is 20 miles north of Globe, AZ in the Sierra Ancha Wilderness. Crews and engines patrolled the fire perimeter with emphasis on the east side of the fire. Helicopters provided bucket support in Cherry Creek and Devil's Chasm.

COON CREEK	AZ	TNF	8752	50	UNK	226	3	7	4	0	NR	4.3M

SOUTHERN AREA LARGE FIRES:

COOK RANCH, Texas State Forest Service. The fire is burning 36 miles south of Ft. Stockton, TX. The fire burned actively all afternoon and into the evening hours yesterday. Current threats are to residences, oil fields, and power lines. Containment is hampered by limited access and

drought conditions.

7 BAR RESERVOIR, George Washington and Jefferson National Forests. The fire is five miles east of Woodstock, VA. Steep, rocky terrain and strong winds are causing control problems. Containment was expected last night.

OUTLOOK:

*** A FIRE WEATHER WATCH IS POSTED FOR LOW RELATIVE HUMIDITIES IN NORTHERN FLORIDA TODAY ***

Florida will be partly cloudy with scattered showers and thunderstorms, mainly over the west and southwest coast. High temperatures will be in the 80's.

New Mexico will be partly cloudy in the north and mostly sunny in the south. Winds will be west at 15 to 25 mph. High temperatures will be in the 80's and 90's, with cooler temperatures in mountainous areas. Minimum afternoon humidities will be 10 to 20 percent.

Arizona will be mostly sunny and breezy with winds of 15 to 25 mph. Afternoon humidities will be 10 to 25 percent. High temperatures will be in the upper 70's to the upper 80's.

West Texas will be mostly sunny and breezy, with a slight chance of afternoon thunderstorms over extreme southwest Texas. Winds will be northwest at 10 to 20 mph. High temperatures will be in the 90's to 100. Low relative humidities will be 10 to 15 percent.
